The logo features the text "XCEL SEMINARS" in a bold, black, sans-serif font, centered within a yellow oval. This oval is framed by a thick, yellow rope with a black outline, which is coiled into a rectangular shape with rounded corners. The rope has frayed ends at the top. The entire design is set against a solid brown background.

XCEL SEMINARS

10th Annual Comprehensive Dental Skills Series

Embassy Suites Milpitas

Jan 31, 2016: Comprehensive Treatment of Untreatable Teeth: From Atraumatic Extractions to Implant Placements and Final Restorations *Dr. Mike Smilanich is nationally renowned educator on comprehensive treatment planning of difficult cases, advanced reconstructive techniques and aesthetic implant rehabilitation.*

Feb 28: Preventive and Restorative Dentistry Working in Concert for the Best, Most Predictable Outcomes *Dr. Pamela M. Maragliano-Muniz whose experience as a dental hygienist, clinical professor and prosthodontist help her to give this informative and unique course, that addresses the whole continuum of care GPs provide to their patients.*

March 13: Current Advances in Endodontic Treatment *Dr. Matthew Chesler is an Endodontist currently practicing in the U.S. Navy. He has lectured extensively on a wide variety of Endodontic-topics relevant to GPs.*

April 17: Treatment Planning, Designing and Delivering Complex Restorative and Multidisciplinary Cases *Dr. Marc Geissberger Chairs the Department of Integrated Reconstructive Dental Sciences at UoP, running their prestigious complex and esthetic rehabilitation program.*

June 5: OSHA, Infection Control & the California Dental Practice Act *Nancy Andrews, RDH, has entertaining methods to help the dental team navigate the sea of state and federal regulations.*

June 26: Great Products, Techniques, and Strategies for your 2016 Practice (including live hands-on demos of more than 10 new products) *Dr. Joe Blaes, is Past Editor of Dental Economics Magazine. He created a unique, insurance-free, fee-for-service practice emphasizing preventive, esthetic, reconstructive & implant dentistry. Because of his interest in new, innovative and more efficient materials & techniques for his office, Dr. Blaes began writing a column, "Pearls for Your Practice" in Dental Economics and is now a renowned lecturer.*

Jan. 31 and June 26 courses will be at the:

Doubletree Newark-Fremont 39900 Balentine Drive, Newark, California, 94560 (510) 490-8390
All Other Courses: Embassy Suites Milpitas, 901 E Calaveras Blvd, Milpitas, CA 95035 (408) 942-0400
(Minutes from 880, 680, 101 & 237 Fwys)

COURSE TOPICS

Comprehensive Treatment of Untreatable Teeth: *This course will cover comprehensive treatment planning of the hopeless tooth, including:* Atraumatic extractions, site selection, case development, surgical decisions; flap or trans epithelial surgical approach, as well as a complete and thorough guide to success in the most demanding of aesthetic case types. ♦ A traumatic extraction for trans-gingival immediate implant placement ♦ The Decision Tree; where, when, how, why do we place and restore an anterior implant. ♦ Staged Protocol; Two Stage approach; proven and cautious, Single Stage; Tooth out, implant in, or Immediate Restore Protocol; with patient leaving with aesthetic provisional, all will be explained in detail. ♦ Advanced Provisionalization Techniques; A clinical model that will simplify the provisionalization of Implants, Mini-implants, Direct and Indirect Veneers and Full mouth rehabilitation with crown and bridge will be presented.

Preventive and Restorative Dentistry: This course will cover strategies to help you patients from prevention of dental caries to restorative strategies that offer long-term results. Clinical results and the profit potential of a caries management program alongside comprehensive restorative treatment planning and implementation will be covered. Cases will be discussed in depth and attendees will be able to participate in the evaluation of patients for caries risk, risk management, documentation and restorative treatment.

Current Scientific Treatments in Endo: *This course is designed for the dental clinician who desires to stay at the forefront of the latest scientific advancements, endodontic techniques and schools of thought. Discussion will include:* The Science & Physics of Instrumentation: Advances in metallurgy and file engineering that address cyclic fatigue and file separation. ♦ Efficiency with Fewer Files: Design enhancements that deliver consistent canal shapes in less time and with fewer instruments ♦ Energized Irrigation Protocols: New technologies and techniques for removing bacteria and the smear layer ♦ Obturation: State of the art, centrally condensed gutta-percha technologies vs. single-cone techniques.

Treatment Planning Complex Restorative Cases: *Treatment planning, designing and managing complex restorative and esthetic cases can be daunting. Dr. Geissberger introduces some universal principles to help doctors achieve optimal results, emphasizing specific techniques and design concepts to aid practitioners in achieving optimal functional and esthetic results.*

Attendees will learn how to: Diagnose a variety of complex clinical situations ♦ Sequence complex cases to optimize outcomes, including with multiple specialties (orthodontics, periodontics, oral surgery, and endodontics) ♦ Design a case with the final product in mind ♦ Select appropriate materials based on functional needs and esthetics ♦ Manage and quarterback all members of the treating team, including specialists ♦ Work effectively with laboratory support team to achieve lasting, esthetic results ♦ Optimize case acceptance through an increased understanding various patient types

Hands-on Intro Oral Surgery and Socket Grafting (this course requires an additional fee)

Participants will learn how to properly examine a patient, correct and simplified oral surgical techniques with proper instrument selection and their use, appropriate pre and post op use of medications and other post op considerations, including: Biological processes of alveolar healing and the possible precautions to prevent hard and soft-tissue loss following tooth extractions. • Hands-on techniques for socket and ridge preservation, treatment concepts that can be utilized and determining appropriate treatment for the successful case management.

OSHA, Infection Control and CA DPA: This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, the California Dental Practice Act and Infection Control.

Great Products and Techniques for Your Practice: This seminar covers clinical procedures from start to finish, highlighting the best products, materials and techniques that enable dentists to produce the highest quality dentistry in the least amount of time, at a low level of stress. It will include hands-on demos where the attendees can practice using many new products. This course is designed to increase hourly production and will demonstrate many ways that clinical dentistry can be enhanced, upgraded, simplified, done quicker and made more fun for the entire dental team. You will go home with a "cookbook of Pearls" that can be immediately implemented in your office.
