COURSE TOPICS

The Latest Restorative Trends: *Modern dentistry is ever changing with new materials and techniques. Long held beliefs may not always be accurate and it is difficult to decide which to implement. With our aging population it is also important to use age-appropriate restorative materials. His subjects will include:* review the development of dentin bonding agents and understand the challenges including post operative sensitivity, MMPs, aprismatic enamel and hydrolyzation ♦ Review the improvements in composites including pre-polymerized, glass ionomer, spherical, and nano fillers and new resin polymers ♦ Updated pulp capping protocols ♦ New products that improve patient- new tooth whitening systems, anesthesia buffering, sonically activated composite systems & resin infiltrated micro-invasive techniques ♦ Crown & bridge materials to simplify treatment ♦ Innovative smile design to predictably produce esthetic smile outcomes

Efficient and Effective Endo: *This comprehensive course will cover latest and most efficient endodontic techniques. You will gain practical skills that can be immediately incorporated into your day to day work flow, to build confidence in your endo outcomes and consistency, including:* Key endodontic diagnosis and case selection indicators ♦ Understanding of access and canal preparation ♦ Latest tools for efficient endodontic shaping ♦ Options for effective irrigation ♦ State of the art methods for delivering warm, flowable gutta-percha

Intro to Dental Sleep Medicine (8 CE Units): *This course is intended to provide a comprehensive overview of diagnosis and treatment of sleep apnea cases for dentists interested in adding this growth area to their practices. Dr. Veis will cover all aspects diagnosis and the sleep study, deciding which appliances to use for treatment, measuring and fitting the appliances, interacting with the fabricating lab, and how to manage the billings to medical insurance, including:* Introduction to sleep stages, disorders and why there is a need for treatment? ♦ Sleep apnea signs/symptoms/clinical issues and treating sleep apnea via dental appliance protocol review ♦ Services to do and read sleep tests ♦ Overview of Appliances - pro's and con's of all of the major sleep appliances ♦ Model analysis, mixed dentition and how to take construction bites for making certain appliances ♦ Group work on an actual case and diagnosing appliance ♦ Services to fully take care of the medical billing for these services

Hands-on Treating Edentulous Patients, Including Denture Fabrication: *This course will teach the art of prosthesis stabilization, including the performing these techniques in the hands-on segment:* Create spare provisional dentures for the healing phase of implants and allow repair of failing removable prosthetics ♦ Duplicate existing prosthesis for accurate information transfer when changing vertical dimension ♦ Create precision CBCT scanning guides for treatment planning, diagnosis and precise implant placement (Three different radiopacities are available to us) ♦ Create all styles of surgical guides for precise implant placement (Both single tooth and fully edentulous)
