## COURSE TOPICS

**OSHA, Infection Control and the CA Dental Practice Act (Lecture):** *This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, and infection control with Noel Kelsch. The California Dental Practice Act segment with Pat Wood will include:* Basic requirements of the Dental Board, how to avoid Dental Board problems AND Present actual case studies of dentists subjected to Board discipline **PLUS he will present a Bonus Course-Navigating the Dental Transition Minefield:** Whether you own or plan to own a dental practice, this bonus segment is for you! Subjects include- Pitfalls in the purchase agreement ♦ Issues you face while when purchasing or selling a dental practice, entering into a partnership buy-in, or becoming an associate ♦ Lease issues which can destroy your investment ♦ Continuing to practice dentistry after a sale

**Great Products and Techniques for Your Practice (Lecture):** *This seminar covers clinical procedures from start to finish, highlighting the best products, materials and techniques that enable dentists to produce the highest quality dentistry in the least amount of time, at a low level of stress. It will include hands-on demos where the attendees can practice using many new products.* This course is designed to increase hourly production and will demonstrate many ways that clinical dentistry can be enhanced, upgraded, simplified, done quicker and made more fun for the entire dental team. You will go home with a "cookbook of Pearls" that can be immediately implemented in your office.

**Preventive and Restorative Dentistry Working in Concert for the Best, Most Predictable Outcomes** This course will cover strategies to help you patients from prevention of dental caries to restorative strategies that offer long-term results. Clinical results and the profit potential of a caries management program alongside comprehensive restorative treatment planning and implementation will be covered. Cases will be discussed in depth and attendees will be able to participate in the evaluation of patients for caries risk, risk management, documentation and restorative treatment.

**Improving the Patient Anesthesia Experience- Decreasing Pain in the Dental Office (Lecture):** *The number one way dental providers are judged relates to the pain experienced by a patient during care. This presentation covers the patient experience and reviews the new anesthesia agents, devices, and techniques that improve outcomes and build practices, including:* Discuss new research and anesthetic agents that impact the practice of pain management in dentistry ♦ Discuss occurrences and basic management of local anesthesia adverse events ♦ Gain knowledge on new anesthetic products that impact patient outcomes ♦ Discuss basic anesthetic armamentarium with updates in methodology

**Geriatric Care (Lecture):** *The biggest boom in dentistry will be the ever growing geriatric population. What is a geriatric patient? Is it age dependent and the answer is not really! Decisions are often very challenging on what is best for the patient. Treatment planning and case presentations and other highlights are:* Prevention is for all ages and doesn't stop here! ♦ Customizing your approaches for plaque, xerostomia and so much more. ♦ Reparative dentistry, when, where and why and what materials are best to utilize ♦ Grafting decisions and why you need to incorporate these into your practice ♦ Direct restorative materials that are must haves for this group Indirect options that are essential to understand and how embrasures and margins are age dependent

**Updates in Pediatric Dentistry (Lecture):** The course will begin with modern concepts of caries management and minimally invasive dentistry. The importance of preventive care in pediatric dentistry cannot be over-emphasized. Diagnostic aids necessary to determine the best methods for prevention will be described and techniques for prevention recommended for the different cases as presented. The apprehensive child patient may be very challenging, and therefore the correct psychological management of these patients must be addressed. There is a substantial number of complicating factors that must be considered with these patients, such as, parenting, societal changes, and stage of development. The coping methods to allow for successful treatment will be presented including sedation, nitrous oxide analgesia, and treatment under general anesthesia. The restorative care of all dental patients require a strong knowledge of dental materials and their applications. The course will present new concepts in adhesion and current research into new dental materials familiarizing the participant with current technology. Pulpal therapy has undergone a number of changes with many practitioners sadly out of date. The discussion of current methods, research and animal studies will update the attendee to new, promising procedures in pulpal therapy.

DENTAL

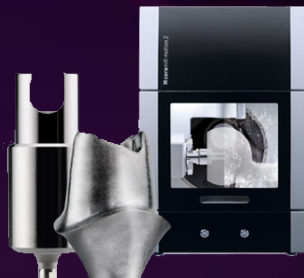

EDUCATION  
CENTER

Esthetic Professionals Dental Education Center offers ***Comprehensive Programs*** (4 or more days) that provide the dentist the most complete hands-on and clinical educational programs offered anywhere. Our ***Multi-Day Programs*** (2-3 days) provide a wide scope of information that can be put into practice immediately and confidently. Our ***One-Day Programs*** are more limited in scope. They offer an opportunity to take a specific topic that is also offered as part of our Comprehensive Programs. The topics include a broad spectrum of esthetic related topics ranging from diagnosis, esthetic communications, restorative procedures and materials.

Esthetic Professionals is now proud to announce that it has become a national distribution center for Amann Girbach, Carestream Dental, and Panadent to name a few. As leaders and users of some of the finest technology in the world, Esthetic Professionals has decided to distribute some of our favorite and most indispensable products.

# Carestream

## MATERIALS

All ceramic and composite options available.

Looking for an inexpensive non-nickle alternative?

Inquire about  
Chrome/Cobalt CAD/CAM  
as an alternative.

Esthetic Professionals, located in Tarzana, California was created in 1997 by Dr. Bruce and Vicky Crispin with a singular mission to help make every dentist a better dentist. As a result, *Esthetic Professionals Dental Education Center* and *EP Dental Laboratory* were created to both educate and bridge the gap between private practice and the laboratory. At Esthetic Professionals, Dr. Crispin shares his over 40 years of prosthodontic experience along with the many experts that provide a wide range of courses.

As a leader in both dental education and the dental laboratory business, Esthetic Professionals has exposure to a broad range of materials and technologies. As a result, the *Esthetic Professionals Distribution Center* was established in 2015 to promote and distribute technologies and materials that have a proven track record at Esthetic Professionals. Our mission is to promote and distribute only what we are truly passionate about to help make the decision processes easier for the consumer.

Let Esthetic Professionals be your partner in success.
