Sal Gaytan, Director of
The Pinhole Academy

- ✓ **33 month study (IJPRD October 2012)**
- ✓ **43 consecutive patients (16 men, 27 women)**
- ✓ **121 teeth treated**

Visit PinholeAcademy.com to view the 33 month study on The Pinhole® Surgical Technique as published in the International Journal of Periodontics & Restorative Dentistry*.

***Conclusion on page 530:** "PST may be deemed a **predictable, effective, minimally invasive, and time and cost effective** alternative to FCTG techniques for obtaining optimal patient based outcomes".

Over 1,700+ doctors trained world-wide in PST!

****The Scalpel-free, Suture-free, Graft-free method is the only method taught at the PST® Seminar.***

Top 10 Benefits of the Pinhole procedure for patients:

1. Can correct gum recession in as little as 1 treatment session. Long term results are documented in the International Journal of Periodontology & Restorative Dentistry. (October 2012)
2. Minimal discomfort and swelling in most cases because the method is scalpel-free, suture free and graft free.
3. Typically, only 1-2 pinholes are made in the gums per quadrant of treatment.
4. The pinholes heal in 24 hours in most cases.
5. Only 2 over-the-counter pain pills required after treatment on average per the study in the International Journal of Periodontology & Restorative Dentistry. (October 2012)
6. Can prevent tooth loss and the need for other costly procedures such as implants or dentures.
7. Treatment sessions can be completed in as little as 1-2 hours in many cases.
8. Can enhance a more youthful and attractive appearance.
9. It is not unusual for patients to describe feeling happier due to being able to smile proudly without the shame or guilt associated with an ugly smile.
10. Most patients are back to work and normal light activities within 24-48 hours.

The logo is set against a solid brown background. It features a thick, yellow rope with a black outline, coiled into a rectangular shape with rounded corners. At the top center of the rope, there is a small knot. In the center of the rope's frame is a horizontal yellow oval with a thin white border. Inside this oval, the words "CLOUD-SYNERGY" are written in a bold, black, sans-serif font.

CLOUD-SYNERGY

Find Talent

Our online platform makes it easier than ever to find great talent. We offer the following tools:

A

Get free access to profiles, showing personal qualifications, user reviews, and real-time schedules.

B

Find temporary help, by booking a dental professional on demand, using live schedules.

C

Send messages directly to dental professionals regarding interviews and logistics for temporary or permanent positions.

D

Post jobs to fill any full-time, part-time, or temporary positions.

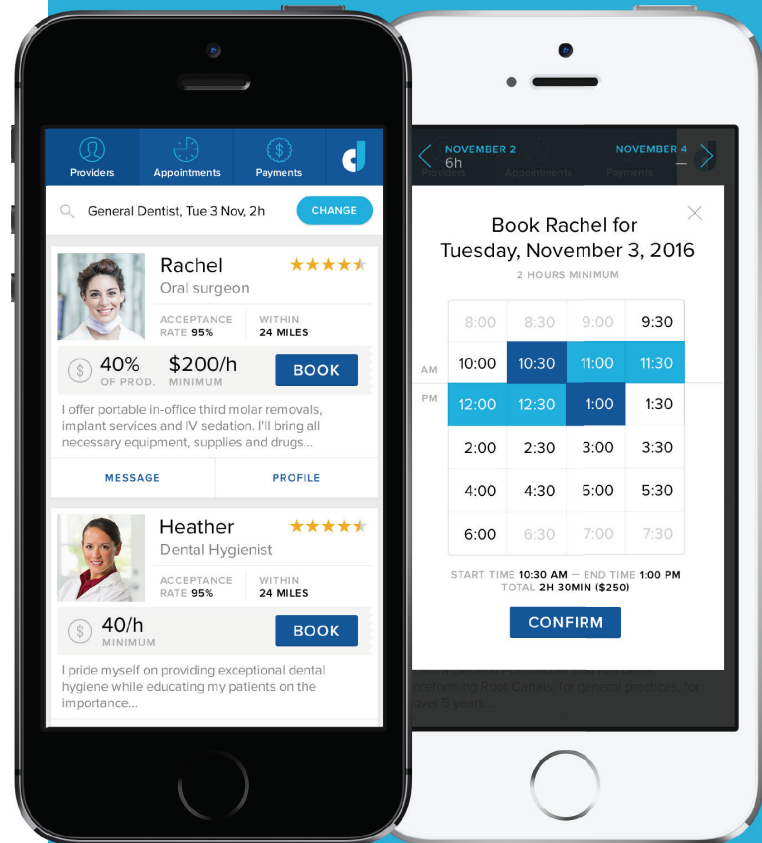

What sets us apart?

- ✓ Hire who you want, when you want
- ✓ Unlimited real-time bookings
- ✓ Unlimited direct messaging
- ✓ Unlimited job postings
- ✓ No contracts required
- ✓ No percent markups on provider rates
- ✓ No daily temp fees
- ✓ No permanent placement or buyout fees

COURSE TOPICS

Great Products and Techniques for Your Practice: *This seminar covers clinical procedures from start to finish, highlighting the best products, materials and techniques that enable dentists to produce the highest quality dentistry in the least amount of time, at a low level of stress. It will include hands-on demos where the attendees can practice using many new products.* This course is designed to increase hourly production and will demonstrate many ways that clinical dentistry can be enhanced, upgraded, simplified, done quicker and made more fun for the entire dental team. You will go home with a "cookbook of Pearls" that can be immediately implemented in your office.

Preventive and Restorative Dentistry Working in Concert for the Best, Most Predictable Outcomes This course will cover strategies to help you patients from prevention of dental caries to restorative strategies that offer long-term results. Clinical results and the profit potential of a caries management program alongside comprehensive restorative treatment planning and implementation will be covered. Cases will be discussed in depth and attendees will be able to participate in the evaluation of patients for caries risk, risk management, documentation and restorative treatment.

Improving the Patient Anesthesia Experience- Decreasing Pain in the Dental Office: *The number one way dental providers are judged relates to the pain experienced by a patient during care. This presentation covers the patient experience and reviews the new anesthesia agents, devices, and techniques that improve outcomes and build practices, including:* Discuss new research and anesthetic agents that impact the practice of pain management in dentistry ♦ Discuss occurrences and basic management of local anesthesia adverse events ♦ Gain knowledge on new anesthetic products that impact patient outcomes ♦ Discuss basic anesthetic armamentarium with updates in methodology

Geriatric Care: *The biggest boom in dentistry will be the ever growing geriatric population. What is a geriatric patient? Is it age dependent and the answer is not really! Decisions are often very challenging on what is best for the patient. Treatment planning and case presentations and other highlights are:* Prevention is for all ages and doesn't stop here! ♦ Customizing your approaches for plaque, xerostomia and so much more. ♦ Reporative dentistry, when, where and why and what materials are best to utilize ♦ Grafting decisions and why you need to incorporate these into your practice ♦ Direct restorative materials that are must haves for this group Indirect options that are essential to understand and how embrasures and margins are age dependent

Updates in Pediatric Dentistry: The course will begin with modern concepts of caries management and minimally invasive dentistry. The importance of preventive care in pediatric dentistry cannot be over-emphasized. Diagnostic aids necessary to determine the best methods for prevention will be described and techniques for prevention recommended for the different cases as presented. The apprehensive child patient may be very challenging, and therefore the correct psychological management of these patients must be addressed. There is a substantial number of complicating factors that must be considered with these patients, such as, parenting, societal changes, and stage of development. The coping methods to allow for successful treatment will be presented including sedation, nitrous oxide analgesia, and treatment under general anesthesia. The restorative care of all dental patients require a strong knowledge of dental materials and their applications. The course will present new concepts in adhesion and current research into new dental materials familiarizing the participant with current technology. Pulpal therapy has undergone a number of changes with many practitioners sadly out of date. The discussion of current methods, research and animal studies will update the attendee to new, promising procedures in pulpal therapy.
