Sal Gaytan, Director of
The Pinhole Academy

- ✓ **33 month study (IJPRD October 2012)**
- ✓ **43 consecutive patients (16 men, 27 women)**
- ✓ **121 teeth treated**

Visit PinholeAcademy.com to view the 33 month study on The Pinhole® Surgical Technique as published in the International Journal of Periodontics & Restorative Dentistry*.

***Conclusion on page 530:** "PST may be deemed a **predictable, effective, minimally invasive**, and **time and cost effective** alternative to FCTG techniques for obtaining optimal patient based outcomes".

Over 1,700+ doctors trained world-wide in PST!

****The Scalpel-free, Suture-free, Graft-free method is the only method taught at the PST® Seminar.***

Top 10 Benefits of the Pinhole procedure for patients:

1. Can correct gum recession in as little as 1 treatment session. Long term results are documented in the International Journal of Periodontology & Restorative Dentistry. (October 2012)
2. Minimal discomfort and swelling in most cases because the method is scalpel-free, suture free and graft free.
3. Typically, only 1-2 pinholes are made in the gums per quadrant of treatment.
4. The pinholes heal in 24 hours in most cases.
5. Only 2 over-the-counter pain pills required after treatment on average per the study in the International Journal of Periodontology & Restorative Dentistry. (October 2012)
6. Can prevent tooth loss and the need for other costly procedures such as implants or dentures.
7. Treatment sessions can be completed in as little as 1-2 hours in many cases.
8. Can enhance a more youthful and attractive appearance.
9. It is not unusual for patients to describe feeling happier due to being able to smile proudly without the shame or guilt associated with an ugly smile.
10. Most patients are back to work and normal light activities within 24-48 hours.

The logo features the word "DENTIMAX" in a bold, black, sans-serif font, centered within a horizontal yellow oval. This oval is framed by a thick, yellow rope with a black outline, which is knotted at the top and bottom. The entire design is set against a solid brown background.

The logo features the text "XCEL SEMINARS" in a bold, black, sans-serif font, centered within a yellow oval. This oval is surrounded by a thick, yellow rope that forms a rectangular border with rounded corners. The rope has a detailed braided texture and is set against a solid brown background.

XCEL SEMINARS

11th Annual Comprehensive Dental Skills Series

Embassy Suites Milpitas

Oct. 30, 2016: Updates in Pediatric Dentistry *Dr. Mark Cannon is a Pedodontic Diplomate and Professor at Northwestern University who has worked on the cutting edge of learning and teaching the newest and best dental care for children*

Nov. 13: Hands-on Oral Surgery & Setting the Stage for Optimal Ridge Preservation *Dr. Ron Wang has received extensive training in oral and periodontal surgery, implants and fixed prosthetics. A passionate student of the art and science of dentistry, Dr. Wang lectures extensively on esthetic dentistry and multi-disciplinary treatment planning.*

Dec. 11: Potpourri of Prosthodontic Gems-From Treatment Planning to Final Treatment *Dr. M. Reed Cone is both a CDT and Prosthodontist who loves to teach GPs all aspects of removable and fixed prosthodontics via his fun and refreshing case study method, including successes and his case failures!*

Jan. 29: Biomimetic Dentistry: A Paradigm Shift *Dr. Randall G. Cohen is a full time practicing restorative dentist, an instructor with the Alleman-Deliperi Center for Biomimetic Dentistry, and has published and lectured on adhesive dentistry.*

Feb. 19: Revolutionary Endodontics: Biomimetic Principles to Preserve & Save More Teeth *Dr. Robert Salehrabi is back by popular demand for this brand new topic! He maintains a private practice, is an Associate Professor of Clinical Endodontics at USC and a recommended speaker of the American Association of Endodontists.*

Dec. 11 course is at the
The Beverly Heritage Hotel - 1820 Barber Ln, Milpitas, CA 95035 - (408) 943-9080
ALL other courses will be at the
Embassy Suites Milpitas 901 E Calaveras Blvd, Milpitas, CA 95035 (408) 942-0400
(Minutes from 880, 680, 101 & 237 Fwys)

ALL COURSES ARE ON SUNDAYS & 7 CA & AGD CEs EACH
\$179 PER LECTURE, \$399 FOR HANDS-ON
ORAL SURGERY OR THE ENTIRE 5 COURSE
SERIES (35 CA & AGD CEs) FOR ONLY \$599

COURSE SERIES
SPONSORED BY:

COURSE TOPICS

Updates in Pediatric Dentistry: The course will cover modern concepts of caries management, minimally invasive dentistry, preventive care, diagnostic aids and addressing apprehensive children, all shown in different clinical cases. There is a substantial number of complicating factors that must be considered with apprehensive patients, such as, parenting, societal changes, and stage of development. The coping methods to allow for successful treatment will be presented including sedation, nitrous oxide analgesia, and treatment under general anesthesia. The course will present new concepts in restorative care, adhesion and current research into new dental materials and current technology. Pulpal therapy has undergone a number of changes with many practitioners' sadly out of date, so current methods, research and animal studies will also update the attendee to new, promising procedures in pulpal therapy.

Prosthodontic Gems: Treatment planning, designing and executing complex restorative and esthetic cases, especially those involving implants, dentures & fixed prosthodontics are daunting. This course will guide you step-by-step how to have success creating dentures, restoring implants and complex restorative cases, showing you many practical clinical "gems" via numerous successful and failed cases, to improve your removable and fixed prosthodontic skills.

Hands-on Intro to Oral Surgery and Ridge Preservation (this Hands-on course on pig's jaws is included in the 5 course series): *This comprehensive program will show hands-on surgical extractions and socket grafting. Topics Include:* Gain a greater appreciation for diagnosis and assessment of tooth root anatomy and alveolar shape and form ♦ Understanding the socket anatomy based treatment algorithm ♦ Understand how to treatment plan in the best way to reach the desired outcome ♦ Learn the principles of minimally traumatic tooth extraction ♦ Gain an understanding of the biology of ridge resorption after extraction of a tooth ♦ Learn about the biofunctionality of biomaterials and its influence on extraction socket healing ♦ (HANDS-ON) Practice important techniques for minimally invasive tooth extraction plus preparing and placing biomaterials to achieve optimal ridge preservation

Biomimetic Dentistry: Dentistry is undergoing a paradigm shift in restoring teeth, moving away from full crowns to multi-component restorations where the clinician uses adhesive dentistry to replicate the biomechanics of the intact tooth. This movement has been termed "Biomimetic Dentistry." Dr. Cohen reviews the fundamentals of this shift and shows step-by-step, from start-to-finish how to create biomimetic treatment plans and securely bonded, fail safe restorations that avoid the downsides of full cut-down crowns.

Revolutionary Endo: *This seminar covers the latest research and techniques, based on Biomimetic principals of maximizing tooth structure, for having endodontic success in your practice. Dr. Salehrabi will present numerous cases to show attendees the following:* Appropriate case selection ♦ Executing accurate diagnosis methods to find the right tooth and treat it correctly ♦ Maximizing improvements in file technologies to improve outcomes and preserve tooth structure ♦ Using cutting-edge materials to mimic natural dentine and provide a range of effective treatment option in addition to standard therapies and restorations after performing root canals to maximize success
