Sal Gaytan, Director of
The Pinhole Academy

- ✓ **33 month study (IJPRD October 2012)**
- ✓ **43 consecutive patients (16 men, 27 women)**
- ✓ **121 teeth treated**

Visit PinholeAcademy.com to view the 33 month study on The Pinhole® Surgical Technique as published in the International Journal of Periodontics & Restorative Dentistry*.

***Conclusion on page 530:** "PST may be deemed a **predictable, effective, minimally invasive, and time and cost effective** alternative to FCTG techniques for obtaining optimal patient based outcomes".

Over 1,700+ doctors trained world-wide in PST!

****The Scalpel-free, Suture-free, Graft-free method is the only method taught at the PST® Seminar.***

Top 10 Benefits of the Pinhole procedure for patients:

1. Can correct gum recession in as little as 1 treatment session. Long term results are documented in the International Journal of Periodontology & Restorative Dentistry. (October 2012)
2. Minimal discomfort and swelling in most cases because the method is scalpel-free, suture free and graft free.
3. Typically, only 1-2 pinholes are made in the gums per quadrant of treatment.
4. The pinholes heal in 24 hours in most cases.
5. Only 2 over-the-counter pain pills required after treatment on average per the study in the International Journal of Periodontology & Restorative Dentistry. (October 2012)
6. Can prevent tooth loss and the need for other costly procedures such as implants or dentures.
7. Treatment sessions can be completed in as little as 1-2 hours in many cases.
8. Can enhance a more youthful and attractive appearance.
9. It is not unusual for patients to describe feeling happier due to being able to smile proudly without the shame or guilt associated with an ugly smile.
10. Most patients are back to work and normal light activities within 24-48 hours.

The logo features the text "PEARSON DENTAL" in a bold, black, sans-serif font. The text is centered within a yellow oval that has a thin white border. This oval is set against a brown background. A thick, yellow rope with a black outline is coiled around the oval, forming a rectangular frame with rounded corners. The rope has a detailed braided texture.

Hyperion X9 3D

Provecta S-Pan Cephalometric

AIR
TECHNIQUES
equipped for life

- Very fast scan in **4.1 seconds** (lat. head)
- Exceptional image quality
- Low radiation dose
- No sensor change from pan to ceph, 2 high-end Csl sensors are integrated
- **20 images** are acquired and sliced into 20,000 fragments. The best are selected and compiled to generate a single exceptionally sharp panoramic image – automatically!

- Panroamics from A to Z - An extensive range of bidimensional examinations also covering specific requirements such as orthogonal projections, bitewing exposures, advanced TMJ views

Starting At **\$895.00** Per Month

- Cephalometrics is less than a sensor away - To perform cephalometric projections, you can opt for a second sensor, but you are not obliged to because MyRay has also considered offering the relocatable option. By opting for just one sensor, this can be switched to and from the ceph arm and incorporates a no-risk safety device to prevent it being dislodged accidentally.

- CB3D Radiography - A straightforward upgrade to volumetric examinations is a no more than a step away from your initial purchase. With 3D capability, one scan generates a wealth of data taking you into a wider realm of diagnostic imaging.

Myray Hyperion X5

Introducing the smallest Panoramic X-Ray
on the market !!!

3' by 3' foot print at full rotation

- Take adult, Child, TMJ and Maxillary Sinus projections
- Mount it on a wall like an intra oral x-ray, on a 90 corner of your room or on a free standing base
- Includes IRYS imaging software and works with most other software
- Can be used with Windows or MAC, and has available APP to view on an iPad
- *Qualifies for a Free CU2-HD Intraoral Camera

Euro Delivery Option

Smart Touch Display The new instrument control panel is divided into two parts: a touch screen on the upper part, used to manage functions and read instrument/hygiene system data, and a keypad to control patient chair movements, operating light and cuspidor bowl.

LED Light Option

Cart Option

-The Cart version ensures absolute working freedom. The mobility of the dentist's module is perfect for any workplace and allows optimal positioning of the operating instruments. Whether right-handed or left-handed, the Cart solution offers an immediate response. Height-adjustable, the module features an easy-grip handle, a large table area and ergonomic instrument layout.

Anthos R7 Chair

- Hydraulic
- Double-Articulating Headrest
- Standard joystick chair foot control
- Available in ultraeather plush upholstery
- Pneumatic headrest option available

Assistant's Vac Pack

- 1 3-Way Heated Syringe
- 2 HVE, 1 SE
- Touchpad cuspidor and chair control

Venus Plus-L LED Light

- Dual LED Reflected-Lights
- Head features 3-axis adjustment
- On/Off Switch
- Light intensity from 6,000 to 50,000 lux
- Color temperature 5,000K
- Autoclavable Handle

Anthos R7 Unit

- Smart Touch w/Implant library Digital Display
- Surgical I.V hook up option
- 2 Auto-Handpiece Control Unit
- Ceramic Cuspidor Bowl Option Available
- Doctor's Side Tray Holder

Smart Touch Display

The new Smart Touch instrument control panel provides advantages that go beyond those of a standard user-friendly touch screen. The extremely advanced control electronics gives the dentist precise control of instrument parameters and the main dental unit functions.

Setting parameters via the display icons and reading data couldn't be simpler, faster or more intuitive. Interactive electronics ensures attainment of maximum induction micromotor performance, with control of both speed and torque, expressed in effective Ncm.

Sopro 617 W/USB Docking Station

Its elegant (curved) design improves your viewing access into the patient's mouth. The 105° angle of view (a 15 degree increase) differentiates it from other cameras on the market by allowing for better exploration of the distal areas.

The SOPRO 617 camera is equipped with "fixed focus" – its large depth of field provides you a clear image in any circumstance.

\$1,995

Sopro Life W/USB Docking Station

The auto fluorescence technology allows you to detect occlusal or interproximal decay, even in its earliest stages, which can often be missed by the eyes or by x-rays. It allows you to differentiate healthy from infected tissue in order to excavate only the tissue which is diseased. Soprolife functions "live" in three modes and is free from ultraviolet or ionizing rays. Images of unmatched quality!

\$4,195

Ultra PC™ Nitrous Unit 2 Year Warranty

Designed for the clinician preferring the dual control method of establishing N2O settings and state-of-the-art design innovation. The unit combines conventional operation with optimal safety, and its revolutionary styling complements modern operator aesthetics

- Independent O2 & N2O controls
- O2 flow & on/off switch combined
- N2O lock™ (An Accutron exclusive)
- Ever-ready oxygen flush
- Oxygen resuscitation connector
- Emergency air valve
- Directional check valve

\$3,195

Newport Flowmeter System

Offers a practical solution to the challenges associated with operator space planning and ready availability of conscious sedation equipment. A totally integrated mobile unit with a stabilizing low gravity center, it glides easily between operatories and can be positioned discreetly under standard-height counter space.

- Enclosed 4-cylinder portable system
- Tilt-out cylinder cradle
- Flow tubes at a 15° angle
- Directional check valve
- Oxygen fail-safe
- Ever-ready oxygen flush
- Emergency air valve
- Single-knob on/off and total flow control
- Rubber goods storage area
- N2O ratio control with 70% maximum
- N2O Lock™ (an Accutron exclusive)
- Oxygen resuscitation connector

Clio Sensor

User Friendly

Minimize time for staff training so you can focus on patient care. One step tool functions allow for super fast editing capabilities.

Touch Screen Ready

Cliosoft was specifically designed with large colored buttons for touch screen tablets.

Cost Efficient

All you need is a tablet, a Clio sensor, and Cliosoft to efficiently practice state-of-the-art imaging.

Crystal Clear Image

Clio sensors have 20 line pairs per mm and coupled with Cliosoft's automatic image processing technology, you get the best image quality shot after shot. Features such as SOTA PoP allows for the highest diagnostic x-ray image from a touch of a button.

XCEL SEMINARS

11th Annual Comprehensive Dental Skills Series

Embassy Suites Milpitas

Nov. 13, 2016: Hands-on Oral Surgery & Setting the Stage for Optimal Ridge Preservation *Dr. Ron Wang has received extensive training in oral and periodontal surgery, implants and fixed prosthetics. A passionate student of the art and science of dentistry, Dr. Wang lectures extensively on esthetic dentistry and multi-disciplinary treatment planning.*

Dec. 11: Potpourri of Prosthodontic Gems-From Treatment Planning to Final Treatment *Dr. M. Reed Cone is both a CDT and Prosthodontist who loves to teach GPs all aspects of removable and fixed prosthodontics via his fun and refreshing case study method, including successes and his case failures!*

Jan. 29: Biomimetic Dentistry: A Paradigm Shift *Dr. Randall G. Cohen is a full time practicing restorative dentist, an instructor with the Alleman-Deliperi Center for Biomimetic Dentistry, and has published and lectured on adhesive dentistry.*

Feb. 19: Revolutionary Endodontics: Biomimetic Principles to Preserve & Save More Teeth *Dr. Robert Salehrabi is back by popular demand for this brand new topic! He maintains a private practice, is an Associate Professor of Clinical Endodontics at USC and a recommended speaker of the American Association of Endodontists.*

Dec. 11 course is at the
The Beverly Heritage Hotel - 1820 Barber Ln, Milpitas, CA 95035 - (408) 943-9080
ALL other courses will be at the
Embassy Suites Milpitas 901 E Calaveras Blvd, Milpitas, CA 95035 (408) 942-0400
(Minutes from 880, 680, 101 & 237 Fwys)

ALL COURSES ARE ON SUNDAYS & 7 CA & AGD CEs EACH
\$179 PER LECTURE, \$399 FOR HANDS-ON
ORAL SURGERY OR THE ENTIRE 4 COURSE
SERIES (28 CA & AGD CEs) FOR ONLY \$579

COURSE SERIES
SPONSORED BY:

COURSE TOPICS

Prosthodontic Gems: Treatment planning, designing and executing complex restorative and esthetic cases, especially those involving implants, dentures & fixed prosthodontics are daunting. This course will guide you step-by-step how to have success creating dentures, restoring implants and complex restorative cases, showing you many practical clinical "gems" via numerous successful and failed cases, to improve your removable and fixed prosthodontic skills.

Hands-on Intro to Oral Surgery and Ridge Preservation (this Hands-on course on pig's jaws is included in the 4 course series): *This comprehensive program will show hands-on surgical extractions and socket grafting. Topics Include:* Gain a greater appreciation for diagnosis and assessment of tooth root anatomy and alveolar shape and form ♦ Understanding the socket anatomy based treatment algorithm ♦ Understand how to treatment plan in the best way to reach the desired outcome ♦ Learn the principles of minimally traumatic tooth extraction ♦ Gain an understanding of the biology of ridge resorption after extraction of a tooth ♦ Learn about the biofunctionality of biomaterials and its influence on extraction socket healing ♦ (HANDS-ON) Practice important techniques for minimally invasive tooth extraction plus preparing and placing biomaterials to achieve optimal ridge preservation

Biomimetic Dentistry: Dentistry is undergoing a paradigm shift in restoring teeth, moving away from full crowns to multi-component restorations where the clinician uses adhesive dentistry to replicate the biomechanics of the intact tooth. This movement has been termed "Biomimetic Dentistry." Dr. Cohen reviews the fundamentals of this shift and shows step-by-step, from start-to-finish how to create biomimetic treatment plans and securely bonded, fail safe restorations that avoid the downsides of full cut-down crowns.

Revolutionary Endo: *This seminar covers the latest research and techniques, based on Biomimetic principals of maximizing tooth structure, for having endodontic success in your practice. Dr. Salehrabi will present numerous cases to show attendees the following:* Appropriate case selection ♦ Executing accurate diagnosis methods to find the right tooth and treat it correctly ♦ Maximizing improvements in file technologies to improve outcomes and preserve tooth structure ♦ Using cutting-edge materials to mimic natural dentine and provide a range of effective treatment option in addition to standard therapies and restorations after performing root canals to maximize success

TUITION	4 COURSE SERIES MEMBERSHIP	EACH INDIVIDUAL COURSE
More than 14 days before an event	Dentist: \$579 Staff: \$345	Dentist: \$179 Staff: \$149 \$399 for the Hands-on
