COURSE TOPICS

Prosthodontic Gems: Treatment planning, designing and executing complex restorative and esthetic cases, especially those involving implants, dentures & fixed prosthodontics are daunting. This course will guide you step-by-step how to have success creating dentures, restoring implants and complex restorative cases, showing you many practical clinical "gems" via numerous successful and failed cases, to improve your removable and fixed prosthodontic skills.

Hands-on Comprehensive Appliance Therapy: Whether you are placing a retainer, creating space for an implant or delivering a sleep appliance, attendees will learn via hands-on models and casework to properly select, deliver, and adjust these appliances. Take your appliance therapy offerings in your practice to the next level with this course!

Biomimetic Dentistry: Dentistry is undergoing a paradigm shift in restoring teeth, moving away from full crowns to multi-component restorations where the clinician uses adhesive dentistry to replicate the biomechanics of the intact tooth. This movement has been termed "Biomimetic Dentistry." Dr. Cohen reviews the fundamentals of this shift and shows step-by-step, from start-to-finish how to create biomimetic treatment plans and securely bonded, fail safe restorations that avoid the downsides of full cut-down crowns.

Revolutionary Endo: *This seminar covers the latest research and techniques, based on Biomimetic principals of maximizing tooth structure, for having endodontic success in your practice. Dr. Salehrabi will present numerous cases to show attendees the following:* Appropriate case selection ♦ Executing accurate diagnosis methods to find the right tooth and treat it correctly ♦ Maximizing improvements in file technologies to improve outcomes and preserve tooth structure ♦ Using cutting-edge materials to mimic natural dentine and provide a range of effective treatment option in addition to standard therapies and restorations after performing root canals to maximize success
