

The logo features the text "XCEL SEMINARS" in a bold, black, sans-serif font, centered within a yellow oval. This oval is framed by a thick, yellow rope with a black outline, which is coiled into a rectangular shape with rounded corners. The rope has frayed ends at the top. The entire design is set against a solid brown background.

## COURSE TOPICS

**Geriatric Care:** *The biggest boom in dentistry will be the ever growing geriatric population. What is a geriatric patient? Is it age dependent and the answer is not really! Decisions are often very challenging on what is best for the patient. Treatment planning and case presentations and other highlights are:* Prevention is for all ages and doesn't stop here! ♦ Customizing your approaches for plaque, xerostomia and so much more. ♦ Reporative dentistry, when, where and why and what materials are best to utilize ♦ Grafting decisions and why you need to incorporate these into your practice ♦ Direct restorative materials that are must haves for this group Indirect options that are essential to understand and how embrasures and margins are age dependent

**Updates in Pediatric Dentistry:** The course will begin with modern concepts of caries management and minimally invasive dentistry. The importance of preventive care in pediatric dentistry cannot be over-emphasized. Diagnostic aids necessary to determine the best methods for prevention will be described and techniques for prevention recommended for the different cases as presented. The apprehensive child patient may be very challenging, and therefore the correct psychological management of these patients must be addressed. There is a substantial number of complicating factors that must be considered with these patients, such as, parenting, societal changes, and stage of development. The coping methods to allow for successful treatment will be presented including sedation, nitrous oxide analgesia, and treatment under general anesthesia. The restorative care of all dental patients require a strong knowledge of dental materials and their applications. The course will present new concepts in adhesion and current research into new dental materials familiarizing the participant with current technology. Pulpal therapy has undergone a number of changes with many practitioners sadly out of date. The discussion of current methods, research and animal studies will update the attendee to new, promising procedures in pulpal therapy.

**Intro to Dental Sleep Medicine (8 CE Units):** *This course is intended to provide a comprehensive overview of diagnosis and treatment of sleep apnea cases for dentists interested in adding this growth area to their practices. Dr. Veis will cover all aspects diagnosis and the sleep study, deciding which appliances to use for treatment, measuring and fitting the appliances, interacting with the fabricating lab, and how to manage the billings to medical insurance, including:* Introduction to sleep stages, disorders and why there is a need for treatment? ♦ Sleep apnea signs/symptoms/clinical issues and treating sleep apnea via dental appliance protocol review ♦ Services to do and read sleep tests ♦ Overview of Appliances - pro's and con's of all of the major sleep appliances ♦ Model analysis, mixed dentition and how to take construction bites for making certain appliances ♦ Group work on an actual case and diagnosing appliance ♦ Services to fully take care of the medical billing for these services
