## COURSE TOPICS

**Hands-on Comprehensive Appliance Therapy:** Whether you are placing a retainer, creating space for an implant or delivering a sleep appliance, attendees will learn via hands-on models and casework to properly select, deliver, and adjust these appliances. Take your appliance therapy offerings in your practice to the next level with this course!

**Biomimetic Dentistry:** Dentistry is undergoing a paradigm shift in restoring teeth, moving away from full crowns to multi-component restorations where the clinician uses adhesive dentistry to replicate the biomechanics of the intact tooth. This movement has been termed "Biomimetic Dentistry." Dr. Cohen reviews the fundamentals of this shift and shows step-by-step, from start-to-finish how to create biomimetic treatment plans and securely bonded, fail safe restorations that avoid the downsides of full cut-down crowns.

**Revolutionary Endo:** *This seminar covers the latest research and techniques, based on Biomimetic principals of maximizing tooth structure, for having endodontic success in your practice. Dr. Salehrabi will present numerous cases to show attendees the following:* Appropriate case selection ♦ Executing accurate diagnosis methods to find the right tooth and treat it correctly ♦ Maximizing improvements in file technologies to improve outcomes and preserve tooth structure ♦ Using cutting-edge materials to mimic natural dentine and provide a range of effective treatment option in addition to standard therapies and restorations after performing root canals to maximize success

**The** Herman Ostrow School of Dentistry is proud to offer to you this comprehensive parenteral moderate sedation course. The 2017 course expands its curriculum to include new drug regimens, advances in patient monitoring, and ACLS Certification. This intensive course consist of 12 days totalling 96 hours: 8 days of lectures and hands-on workshops, and 4 days of clinical patient interaction. Each clinical Saturday will be followed by 2 hours of debrief and classroom troubleshooting. The course meets (and exceeds) the educational requirements established by the ADA Guidelines and fulfills most state regulations for administration of IV moderate sedation to dental patients. Each didactic day begins with a pre-session knowledge assessment and concludes with a case-based group learning exercise. Participants will perform physical evaluation, take medical histories, outline an anesthetic

plan, initiate and confirm intravenous access, administer and become competent in the titration of sedative medications, and perform dental procedures under close supervision of faculty who have had post-graduate training in dental anesthesiology. They will also receive over-the-shoulder demonstration of airway management in a live patient setting. For detailed course information, please contact 213.821.2127 or [cedental@usc.edu](mailto:cedental@usc.edu).

**DR. PERIKLIS PROUSSAEFS** is a prosthodontist. He obtained a certificate in Prosthodontics, a certificate in Implant Dentistry, and a Master's degree from Loma Linda University (LLU) in year 2000. Dr Proussaefs has published over 45 peer-reviewed articles in the dental literature, and has been serving as an Editorial Board member for the Journal of Prosthetic Dentistry, the Journal of Prosthodontics, and the Journal of Oral Implantology. Among many others, he is the recipient of the prestigious Tylman award by the American Academy of Fixed Prosthodontics, the Judson C. Hickey Scientific Writing Award by the Journal of Prosthetic Dentistry, and the Robert James Achievement Award by the Advanced Education program in Implant Dentistry at LLU. Since year 2000, he has been an Assistant Professor at LLU

where he conducts research and seminars.

**DR. PROUSSAEFS** has received formal training in all forms of sedation since 1997. Part of his residence program at LLU included full time training in general anesthesia. He has been providing dental care for patients under I.V. (moderate) sedation or oral (minimal) sedation having completed thousands of cases. Having tremendous exposure in sedating patients over the years, his seminars will be focused on SAFETY, and in particular airway management, patient monitoring, and handling emergencies. The course involves lecturing, hands-on practicing on a mannequin, and real patient experience. The discussion with the instructor will focus on sharing the instructor's 20 years' experience in sedating dental patients.
