

The logo features the word "DENTOX" in a bold, black, sans-serif font, centered within a yellow oval. This oval is surrounded by a thick, yellow rope border that forms a rectangular frame with rounded corners. The rope has a detailed braided texture and ends in small tassels at the top and bottom. The entire design is set against a solid brown background.

COURSE TOPICS

Minimally Invasive, Biomimetic Dentistry: *In the last 25 years, materials & techniques have improved dramatically yet they are not being used in most dental practices. This course teaches, via step-by-step with clinical images & videos, how to simply perform advanced adhesion techniques (which are backed by published science) on a daily basis, while eliminating post-op pain & increasing restoration longevity. Topics include:* IDS (Immediate Dentin Sealing)- "THE most important advancement in adhesion dentistry" that increases direct restorations dentin bond strengths by 80% and quadruples indirect restorations dentin bond strengths ♦ Creating low stress, high bond strength composites-Hint: it's all in how you place it ♦ Repairing anterior pediatric trauma ♦ Preserve & repair geriatric dentition ♦ New, simple and durable technique for desensitizing - How to identify, treat & bond dentin cracks

Esthetic Pediatric Dentistry & Treating Trauma: This presentation will discuss all aspects of Esthetic Pediatric Dentistry for the demanding patient and parent! Specifically; anterior and posterior composites, esthetic crowns (zirconium and IPS e.max), tissue regeneration, laser therapy, preventive and interceptive orthodontics, esthetic space maintainers, and, of course, behavior management. Dr. Cannon will also provide a comprehensive review of preventive dentistry, using the latest in probiotic therapy and the latest in microbiome research.

Intro to Dental Sleep Medicine (8 CE Units): *This course is intended to provide a comprehensive overview of diagnosis and treatment of sleep apnea cases for dentists interested in adding this growth area to their practices. Dr. Veis will cover all aspects diagnosis and the sleep study, deciding which appliances to use for treatment, measuring and fitting the appliances, interacting with the fabricating lab, and how to manage the billings to medical insurance, including:* Introduction to sleep stages, disorders and why there is a need for treatment? ♦ Sleep apnea signs/symptoms/clinical issues and treating sleep apnea via dental appliance protocol review ♦ Services to do and read sleep tests ♦ Overview of Appliances - pro's and con's of all of the major sleep appliances ♦ Model analysis, mixed dentition and how to take construction bites for making certain appliances ♦ Group work on an actual case and diagnosing appliance ♦ Services to fully take care of the medical billing for these services

Revolutionary Endo: *This seminar covers the latest research and techniques, based on Biomimetic principals of maximizing tooth structure, for having endodontic success in your practice. Dr. Salehrabi will show numerous cases to teach the following:* Appropriate case selection ♦ Executing wholistic diagnosis methods to find the right tooth and treat it correctly ♦ Maximizing improvements in file technologies to improve outcomes and preserve tooth structure ♦ Using cutting-edge materials to biomimetically mimic natural dentine and provide a range of effective treatment option in addition to standard root canals and restorations after performing root canals to maximize success.
