

PINHOLE SURGICAL TECHNIQUE

Feeling Trapped by Traditional Dentistry?

**Break Out
with Pinhole®**

- Almost every dentist offers the same services and competition for patients is fierce.
- Millions of patients need treatment for gum recession but they don't want painful grafting.
- Less than 1% of all dentists in California offer Pinhole Gum Rejuvenation™.
- According to ABC News Pinhole Gum Rejuvenation™ fees are \$500-\$1,800 per tooth depending on the number of teeth treated. Pinhole® can increase office production greatly.
- Learn Pinhole® and be able to offer millions of patients what they want now.

COURSE TOPICS

OSHA, Infection Control and the CA Dental Practice Act: *This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, and infection Control with Noel Kelsch. The California Dental Practice Act segment with Pat Wood will include:* basic requirements of the Dental Board, how to avoid Dental Board problems AND Present actual case studies of dentists subjected to Board discipline PLUS he will present a Bonus Course **New Economics of Dentistry:** *Whether you own or plan to own a dental practice, this bonus segment is for you! Subjects include:* ♦ current trends in associate positions ♦ corporate vs. private practices ♦ Lease issues affecting practice ownership ♦ dissecting the Associate Position ♦ compensation structures ♦ proper vs. improper models ♦ reviews the differences between employee vs. independent contractor

Modern Endo: *This lecture addresses endodontic problems and how new concepts in access design, dentine conservation, and file techniques can remedy these problems, including:* How anatomic danger zones and tooth anatomy effect rotary file design selection and techniques and how root canal file techniques can compensate ♦ Current, pertinent, and professional literature fundamental to successful endodontics, including - access, rotary file design, instrumentation techniques, and various obturation options. ♦ Specialist knowledge and understanding of how various procedures and dentin conservation techniques contribute to a predictable, reproducible therapy which enhances the long-term prognosis of the tooth.

Hands-on Intro to Oral Surgery and Ridge Preservation: *This comprehensive program will show hands-on surgical extractions and socket grafting. Topics Include:* Gain a greater appreciation for diagnosis and assessment of tooth root anatomy and alveolar shape and form ♦ Understanding the socket anatomy based treatment algorithm ♦ Understand how to treatment plan in the best way to reach the desired outcome ♦ Learn the principles of minimally traumatic tooth extraction ♦ Gain an understanding of the biology of ridge resorption after extraction of a tooth ♦ Learn about the biofunctionality of biomaterials and its influence on extraction socket healing ♦ (HANDS-ON) Practice important techniques for minimally invasive tooth extraction plus preparing and placing biomaterials to achieve optimal ridge preservation

Esthetic Pedo and Treating Trauma: This presentation will discuss all aspects of Esthetic Pediatric Dentistry for the demanding patient and parent! Specifically; anterior and posterior composites, esthetic crowns (zirconium and IPS e.max), tissue regeneration, laser therapy, preventive and interceptive orthodontics, esthetic space maintainers, and, of course, behavior management. Dr. Cannon will also provide a comprehensive review of preventive dentistry, using the latest in probiotic therapy and the latest in microbiome research.
