COURSE TOPICS

Hands-on Biomimetic Restorations: *The main focus in dentistry the past decade has been fast adhesive techniques. Unfortunately, many of these techniques can result in negative patient outcomes. This workshop will demonstrate stress-reduced composite placement techniques that dramatically increases dentin bond strengths (77% - 400%) as well as how to raise sub-gingival margins & prepare for indirect ceramic onlays, including:* How to virtually eliminate post-operative sensitivity ♦ How to select restorative materials based-on structural integrity of remaining tooth structure ♦ How to prep for onlay restorations ♦ How to conservatively identify & remove infected tooth structure ♦ Practice, hands-on, these techniques for a large Class II Restoration, with an onlay!

Contemporary Restorative Dentistry: *Modern dentistry is ever changing with new materials and techniques. Long held beliefs may not always be accurate and it is difficult to decide which to implement. With our aging population it is also important to use age-appropriate restorative materials. His subjects will include:* review the development of dentin bonding agents and understand the challenges including post operative sensitivity, MMPs, aprismatic enamel and hydrolyzation ♦ Review the improvements in composites including pre-polymerized, glass ionomer, spherical, and nano fillers and new resin polymers ♦ Updated pulp capping protocols ♦ New products that improve patient- new tooth whitening systems, anesthesia buffering, sonically activated composite systems & resin infiltrated micro-invasive techniques ♦ Crown & bridge materials to simplify treatment ♦ Innovative smile design to predictably produce esthetic smile outcomes

Updates in Pediatric Dentistry: *This course features a comprehensive update in Pediatric Dentistry, including:* New psychological insights and research on Behavior Guidance, the dental implications for the increase in Autism, preterm births ♦ ADHD caries formation and prevention as well as how to perform a CAMBRA caries risk assessment ♦ How using Xylitol, Fluoride Varnish, MI Paste, Chlorhexadine, and sealants are effective preventive measures ♦ Indirect Pulp Caps and MTA/Biodentine pulpotomies. ♦ New designs in tooth preparation & when to use GIC, RMGI's, and a new flowable composite for Class I to Class V preps ♦ Diagnosis and treatment of simple and complex traumatic injuries in addition to a simple method for splinting.

Intro to Dental Sleep Medicine (8 CE Units): *This course is intended to provide a comprehensive overview of diagnosis and treatment of sleep apnea cases for dentists interested in adding this growth area to their practices. Dr. Veis will cover all aspects diagnosis and the sleep study, deciding which appliances to use for treatment, measuring and fitting the appliances, interacting with the fabricating lab, and how to manage the billings to medical insurance, including:* Introduction to sleep stages, disorders and why there is a need for treatment? ♦ Sleep apnea signs/symptoms/clinical issues and treating sleep apnea via dental appliance protocol review ♦ Services to do and read sleep tests ♦ Overview of Appliances - pro's and con's of all of the major sleep appliances ♦ Model analysis, mixed dentition and how to take construction bites for making certain appliances ♦ Group work on an actual case and diagnosing appliance ♦ Services to fully take care of the medical billing for these services
