COURSE TOPICS

Minimally Invasive Adhesion Dentistry: *It is now possible to mimic the natural bond strength of the DEJ with certain techniques and materials. This level of adhesion enables the clinician to restore severely broken-down teeth with direct, low-stress, composite build-ups & onlays in lieu of full-coverage restorations. This lecture will review some of these techniques, materials and key research to perform advanced adhesion, including:* How to seal restorations & dramatically increase bond strengths prior to impressions & temporaries ♦ Layer composites with low-stress & double dentin bond strengths ♦ Identify & treat dentin cracks ♦ Virtually eliminate post-operative sensitivity ♦ How & when to place fibers in composites ♦ How to discuss advanced techniques with patients

Intro to Dental Sleep Medicine (8 CE Units): *This course is intended to provide a comprehensive overview of diagnosis and treatment of sleep apnea cases for dentists interested in adding this growth area to their practices. Dr. Veis will cover all aspects diagnosis and the sleep study, deciding which appliances to use for treatment, measuring and fitting the appliances, interacting with the fabricating lab, and how to manage the billings to medical insurance, including:* Introduction to sleep stages, disorders and why there is a need for treatment? ♦ Sleep apnea signs/symptoms/clinical issues and treating sleep apnea via dental appliance protocol review ♦ Services to do and read sleep tests ♦ Overview of Appliances - pro's and con's of all of the major sleep appliances ♦ Model analysis, mixed dentition and how to take construction bites for making certain appliances ♦ Group work on an actual case and diagnosing appliance ♦ Services to fully take care of the medical billing for these services

Smile Design & Ceramics: Case selection, tooth prep, material choice and then proper bonding techniques will be presented in a practical manner. Smile Design principles will be covered including rational for new practical principles that result in pleasing natural-looking smiles. Many cosmetic cases will be presented for a variety of techniques using indirect restorations. We will go from treatment planning all the way through insertion with step by step instruction for conservative and more complex cases
