COURSE TOPICS

Digital Dentistry: Treatment planning, designing and executing complex restorative and esthetic cases, especially those involving implants and fixed prosthodontics are daunting. Digital dental workflows have made this process more efficient and rewarding. We will discuss the rise in success that dentists and laboratories are experiencing with digital methods. This course will guide you step-by-step how to have success creating and restoring single units, implants and complex restorative cases digitally, showing you many practical clinical "gems" via numerous successful and failed cases, to improve your removable and fixed prosthodontic skills. This course will also briefly touch upon digital dentures.

Intro to Dental Sleep Medicine (8 CE Units): *This course is intended to provide a comprehensive overview of diagnosis and treatment of sleep apnea cases for dentists interested in adding this growth area to their practices. Dr. Veis will cover all aspects diagnosis and the sleep study, deciding which appliances to use for treatment, measuring and fitting the appliances, interacting with the fabricating lab, and how to manage the billings to medical insurance, including:* Introduction to sleep stages, disorders and why there is a need for treatment? ♦ Sleep apnea signs/symptoms/clinical issues and treating sleep apnea via dental appliance protocol review ♦ Services to do and read sleep tests ♦ Overview of Appliances - pro's and con's of all of the major sleep appliances ♦ Model analysis, mixed dentition and how to take construction bites for making certain appliances ♦ Group work on an actual case and diagnosing appliance ♦ Services to fully take care of the medical billing for these services

Clinical Treatment Planning and Problem Solving: *Dr. Lowe will discuss creative ways to handle situations "that don't necessarily follow the textbook", to save time AND money, let alone avert a clinical failure! Topics include:* Treatment options for complex cases: Do you have a "Plan B"? Can you think "outside the box" for solutions to not only be a "textbook" treatment planner? ♦ Materials options for restorative dentistry: Choosing the best materials based on clinical circumstances (being the doctor!) ♦ Multidisciplinary Treatment Planning: The Periodontal Restorative Connection and the Importance of a "Solid Foundation." ♦ No Prep Veneers: Manufacturer "hype" or realistic clinical option? How new dental materials can make this a more realistic approach for some cases. ♦ Instant Orthodontics: Viable treatment option or "quick fix cop out" revisited - prosthetic tooth repositioning for aesthetics and function limitations and long-term results ♦ Creative Treatment Planning and Execution.... It's all in the details and it's all about the options! Case reviews that "don't necessarily fit" classic treatment protocols ♦ Can orthognathic surgery and orthodontics be done with only crown and bridge??

Clarifying the Confusion in Adhesion Dentistry: *This course will present advanced adhesion techniques and materials supported by important key research that minimize the removal of healthy tissue and maximize bond strengths, including:* Immediate dentin sealing: the most important advancement in adhesion dentistry and why it dramatically increases dentin bond strengths for direct and indirect restorations ♦ A minimally invasive approach to tooth preparation ♦ How to elevate deep margins with direct composite ♦ How adhesive materials react to and interact with natural tooth structure ♦ Temporization of minimally prepared teeth ♦ How to treat cracks in dentin
