

The logo consists of a thick, yellow rope with a black outline, forming a rectangular border with rounded corners. At the top center, the rope is knotted. Inside the rope border is a large, horizontal, yellow oval with a thin white outline. The text "BINA DENTAL INSTITUTE" is written in a bold, black, sans-serif font across the center of the oval.

**BINA DENTAL INSTITUTE**

# Simple Solutions to Restorative Implant Dentistry

Presented by Shahin Issac Bina, DDS, FAGD, FICOI

**Lecture and Hands-On workshop**

Hosted by **Bina Dental Institute**

Sunday, November 3, 2019 • 7 CE Credit Hours

## COURSE DESCRIPTION

This hands-on workshop will simplify the seemingly complicated implant restoration process and enable you to make sense of the myriad of dental implant systems currently on the market. This beginner to intermediate course addresses common areas of confusion and covers necessary steps for cost-effective dental restoration, improving dental impression-taking and emphasizes time-saving techniques that make implant dentistry easier to perform. You will leave this workshop confident in your abilities to select components and deliver a variety of dental implants successfully and consistently.

## LEARNING OBJECTIVES

- You will learn different impression taking techniques such as Open-tray and Closed-tray techniques and when to use each technique
- Understand the difference between abutments and proper abutment selection such as UCLA, Custom, Angeled abutments and more
- Increase proficiency in impression taking
- Have a hands-on opportunity to use the components for impression taking

## Shahin Issac Bina, DDS, FAGD, FICOI

Dr. Bina graduated from Stony Brook School of Dentistry in 1994 and finished a General Practice Residency at **The NY Hospital Medical Center of Queens**. He then joined the faculty at the NYU School of Dentistry in the department of **Comprehensive Care and Applied Practice Administration** where he served as a clinical instructor.

While he earned his Fellowship with the Academy of General Dentistry, Dr. Bina maintained a private practice in Great Neck, NY. He then moved to California and provided in-house dental implant services for over 30 offices before he opened his office, and **Bina Dental Institute** in Encino, CA. He enjoys teaching dentists the art of implant placement and restoration. Dr. Bina has observed first-hand the restorative obstacles and frustrations general dentists face in restoring dental implant and as a result has designed a hands-on course to help them build the confidence and knowledge to overcome those obstacles. He is a graduate of the **Misch International Implant Institute, Fellow of the International Congress of Oral Implantologists, and a Fellow of the Academy of General Dentistry.**

## Simple Solutions to Restorative Implant Dentistry

\*\*\* A Hands-on Workshop \*\*\*

### Introduction:

As an independent general dentist, I have been providing implant placement and restorations for over 30 offices in SoCal for the past 15 years as well as taking referrals and patients in my private practice. I have taught many GPs how to restore implants. I have noticed that many general dentists don't have enough confidence or knowledge in this field and they avoid offering this service to their patients. Restoring dental implants is very simple, and is very productive if done right. Let me help you to gain Basic knowledge and confidence so you can restore implants from single crowns to big cases!

### Synopsis:

- In this course, you will learn 7 different techniques (5 hands-on) for taking impressions.
- You will learn when, how and why to use each technique, while working on provided models
- You will be placing different abutments, impression copings on implants.
- You will place screw-retained, cement retained crowns and practice applying proper torques.
- You will learn about factors to consider in implant crown design, occlusion, choice of materials,
- You will learn how to avoid common problems like implant screw loosening, and much more

My goal is to make implant restoration simple and help you avoid costly mistakes so you can **offer your patients better treatment options** and **increase your productivity** at the same time. After this extremely educating course you will be able to incorporate implant restorations into your practice and be able to make it a part of your daily treatment planning and **boost your practice production enormously!**

## COURSE TOPICS

**Oral Medicine for GPs:** *This course gives dentists the tools to diagnose abnormal and pathological conditions within the mouth. Using clinical pictures and x-ray imaging and by teaching diagnostic process and differential diagnosis (DiffDx), the course addresses systemic health conditions manifesting as oral changes and also possible treatment of oral conditions, including:* What a lesion looks like, the general concepts of diagnostics and value of patient histories ♦ Appropriate communication with other doctors ♦ Review common lesions including, candidiasis, frictional hyperkeratosis, lichen planus, auto-immune diseases manifested in the mouth, aphthous ulcers, hemangiomas, hematomas and ecchymosis, HSV 1, HPV and other viral lesions, oral cancers and radiographic lesions.

**Intro to Dental Sleep Medicine (8 CE Units):** *This course is intended to provide a comprehensive overview of diagnosis and treatment of sleep apnea cases for dentists interested in adding this growth area to their practices. Dr. Veis will cover all aspects diagnosis and the sleep study, deciding which appliances to use for treatment, measuring and fitting the appliances, interacting with the fabricating lab, and how to manage the billings to medical insurance, including:* Provide an understanding of the scope of the problem and why we need to be at the front lines in its recognition and treatment. ♦ Talk the talk and walk the walk... definitions and terms needed to understand the problem and communicate with your peers. ♦ Learn how to screen every patient in your practice regardless of their age. ♦ The Who, What, When, Where and How of getting a Diagnosis ♦ Overview of treatment possibilities ♦ How to do a thorough exam and why it's critical to choosing the best treatment option ♦ Achieve an understanding of sleep appliances ♦ Working in a team approach and staying within the scope of your practice act ♦ Integrating sleep into your practice...a medical model in a dental practice ♦ Getting paid...services to take care of the medical billing

**Comprehensive Treatment Planning and Care:** This course will cover strategies to help you patients from prevention of dental caries to restorative strategies that offer long-term results. Clinical results and the profit potential of a caries management program alongside comprehensive restorative treatment planning and implementation will be covered. Cases will be discussed in depth and attendees will be able to participate in the evaluation of patients for caries risk, risk management, documentation and restorative treatment.
