NOW as a LIVE WEBINAR Series w/LIVE CE Units

Jan. 23, 2022: Dental Management of Patients with Common Medical Conditions *Dr. Patrick Quaranta* is back by popular demand for a new subject! He is a former professor of Oral Medicine at UMDNJ-New Jersey Dental School.

Feb. 20: Trends in Minimally Invasive Pediatric Dentistry *Dr. Jeanette MacLean* is a Diplomate of the American Board of Pediatric Dentistry, a recommended speaker of the American Academy of Pediatric Dentistry's Speakers Bureau, & internationally recommended as an expert on minimally invasive dentistry.

March 27: OSHA, CA Dental Practice Act, Infection Control PLUS a BONUS COURSE: Becoming the "Go-To" Dentist in your Community with these Seven Critical Steps!

Carrie Ibbetson, RDH, lectures nationwide using her unique humor and cutting edge information to present tough subject matter in an interesting way. *Jim Richardson*, the CEO of Click-thru Consulting, is the Amazon best-selling author of "Word of Mouse Marketing for Dentists." He helps dentists refine their messages & drive new patients to their practices.

May 1: Making Dentures the Old Fashioned Way- Building Patient Satisfaction and Your Bottom Line! *Dr. Gordon Fraser* is an internationally acclaimed lecturer who served as a Periodontist in the US Air Force. He founded PURE PERIO and also the Southern Georgia Dental Education, a resource for continuing education for dentists.

May 22: So Easy, a Prosthodontist Can Do It: The Tips, Tricks, and Techniques from the Daily Life of a Dual-Certified Prosthodontist/Dental Technician (including What Every Lab Tech Wants to Tell Their Dentists, but Won't)! *Dr. M. Reed Cone* started his career as a lab tech, became a GP and is now a prosthodontist and lecturer, who uses his vast experience to help GPs improve their technique and practices.

June 26: Intro to the Biomimetic Approach: Permanent Restorations that Mimic Natural Teeth (including Adhesives, Fiber Reinforced Composites & Biomimetic Vital Pulp Therapy) *Dr. Matt Nejad* is an expert in biomimetic and esthetic dentistry. He is a Fellow of the Academy of Biomimetic Dentistry, the highest level of accreditation possible. He lectures nationally and internationally & is a member of the ADA Standards Committee on Dental Products (SCDP). His areas of research and interest are adhesion, polymerization stress, residual stress, biomechanics, occlusion, and esthetics. *Dr. Robert Salehrabi* is a Clinical Professor at USC and a recommended speaker of the American Association of Endodontists.

ALL LIVE WEBINARS ARE ON SUNDAYS, 8 AM - 3:00 PM PACIFIC TIME AND 7 LIVE CE UNITS - TUNE IN AND ENJOY OUR COURSES FROM ANYWHERE!

\$149 FOR EACH LECTURE, \$299 FOR THE CBCT WEBINAR OR THE ENTIRE 6 COURSE WEBINAR SERIES, 42 CA APPROVED LIVE CEs, FOR ONLY \$549 (THAT IS LESS THAN THE COST OF FOUR COURSES)!!

COURSE TOPICS

Managing Common Medical Conditions: *Medical advances have enabled patients who hitherto were treated only in hospital-based dental clinics, to seek care at our private dental practices. Also, the "baby-boomer" generation is at an age where chronic medical problems are extremely common. This course systematically addresses the most common medical conditions of ambulatory patients. It addresses these patients' dental management and pharmaceutical and emphasizes safety issues. Objectives Include:* Confidently assess & manage ambulatory dental patients with cardiovascular disease, diabetes, COPD, bleeding disorders and on anticoagulant therapy, hepatitis, HIV, organ transplants and osteoporosis ♦ The use of medical guidelines, current antibiotic prophylaxis, & the limitations of guidelines ♦ Precautions for patients on medications that manage their conditions and drug interactions ♦ Be able to diagnose & generate a useful and appropriate medical consultation ♦ How to take a relevant medical history and what to do with that information

Trends in Minimally Invasive Pediatric Dentistry: Learn how to restore cavities in a quick, effective, and painless way using Glass Ionomer Cement, stainless steel crowns, and SDF, known as Silver Modified Atraumatic Restorative Treatment (SMART) and the Hall Technique. Find out how offering minimally-invasive options like SDF, SMART, and Hall crowns can attract new patients, improve patient satisfaction, and increase internal marketing and word of mouth referrals to your practice. As an advocate for minimally invasive dentistry, Dr. MacLean teaches three simple and painless options to manage enamel defects. MI Paste, ICON Resin Infiltration, and etch/bleach seal can improve or even completely reverse the appearance of congenital enamel defects and white spot lesions while preserving tooth structure and repairing the patient's natural enamel.

OSHA, Infection Control and the CA Dental Practice Act: *This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, and Infection Control with Carrie Ibbetson. The California Dental Practice Act segment will include:* Basic requirements of the Dental Board, how to avoid Dental Board problems AND Present actual case studies of dentists subjected to Board discipline. **PLUS In our bonus one-hour interactive workshop, we'll take each audience member through an interactive, personal exercise that will teach them how to create their unique compelling message. They will:** Discover their marketing problems ♦ Follow a proven, seven-step process to record their unique message script ♦ Leave with more confidence about their compelling reason a new patient should choose them

Making Dentures the Old Fashioned Way: *Over 85% of the American population is missing one or more teeth and over 35% are totally edentulous in one arch or the other. Dr. Fraser will teach numerous strategies to create successful dentures and how he created a multimillion-dollar practice with dentures as his most profitable procedure, including:* Denture tooth selection, denture teeth molds and the steps in denture fabrication ♦ How to prevent remakes and adjusting dentures to patient satisfaction ♦ Using special liners for the really tough cases

Prosthodontic Tips for Success: *This course will cover many of the current concepts, materials & techniques available in the restoration of implants, fixed crown and bridge, and removable prosthetic treatment plans. It will address clear & concise chairside/benchtop protocols that will ensure the highest efficacy as well as quality final product at delivery. The presentation will also candidly address what laboratory techs would tell their dentists if they didn't face the repercussion of losing a client, including:* The most frequently cited roadblocks to communication between dental laboratory techs & the referring dentist. ♦ Comparing and analyzing the components of successful cases with those that have failed ♦ Applying concepts within the dental laboratory/office to achieve optimum patient care.

A Biomimetic Approach to Dentistry: *The intact natural tooth has the perfect combination of properties via dentin, enamel, and the DEJ. The properties of these individual layers combine to result in superior performance as a multi-laminar structure. An understanding of the structure, function, and resulting biomechanics of natural teeth allows for maximum success in restorative dentistry. This course will cover numerous biomimetic restorative techniques to improve your practice, including:* Dental Materials' properties suitable for enamel, dentin, and DEJ substitute ♦ The Adhesive Equation: Techniques to maximize bond strength and minimize polymerization stresses ♦ Tooth Biomechanics and the resulting prep guidelines ♦ Exciting possibilities of fiber reinforced composites for a variety of restorative techniques including direct, indirect, endodontically treated, and severely damaged and compromised teeth ♦ Preserving pulp-vitality with scientifically supported caries removal endpoints ♦ How to treat deep caries without endo treatment

Interpreting CBCT Scans & Incidental Findings (This course is NOT Included in the Series): *This course will build your confidence for reviewing your Cone Beam data sets and give you guidance on how to proceed with incidental findings. Learning objectives include:* When to prescribe CBCT scans. ♦ Decipher 256 shades of gray by learning anatomy, anatomical variations, & pathology basics. ♦ Common incidental findings & when to refer ♦ Understand how to create a CBCT image report.

TUITION	6 COURSE SERIES	EACH INDIVIDUAL COURSE
More than 14 days before an event	Dentist: \$549, Staff: \$399 \$199 to add CBCT Webinar to the Series	Lecture Dentist: \$149, Staff: \$129 \$299 for CBCT Webinar
Less than 14 days before an event	Dentist: \$569, Staff: \$419 \$219 to add CBCT Webinar to the Series	Lecture Dentist: \$169, Staff: \$149 \$319 for CBCT Webinar

Courses are 8AM-3PM Pacific Standard time and each course is 7 Live CE Units.
