## **CECILIA CHEN ESQ**

Cecilia Chen is a dental attorney who specializes in representing dentists and specialists in purchase and sale of dental practices, leases, associate agreements, partnerships, as well as forming dental service organizations. Cecilia received her undergraduate degree in finance from Boston University and her Juris Doctorate from American University. Cecilia's background was representing large fortune 500 companies in mergers and acquisition transactions when she began her practice in 2004, founded her own law firm in 2009 and has been focusing in the dental and healthcare niche since 2011. Cecilia is based in southern California but works with clients throughout California and nationwide.

## **ROBERT S. THOMPSON, RT, JD, MBA, LLM(DR), AIC, ARM, ARe, RPLU, CPCU,**

Patient Safety & Risk Solutions Dental Lead Robert has a diverse background in law, medicine, professional liability insurance, and healthcare risk management. Robert's previous roles also include senior vice president of risk management and director of client education for two professional liability insurance companies. Robert earned his bachelor's degree in business administration summa cum laude from North Georgia State University, his juris doctorate degree from the University of Georgia School of Law, a master of business administration degree from Lincoln University, and a master of laws degree in dispute resolution from the University of Missouri School of Law. Robert's responsibilities include developing and delivering risk management and patient safety services to MedPro-insured dentists and national dental organizations. Robert also serves in a business development role by providing educational seminars on risk reduction and proactive risk management to prospective clients and dental students

## **MANOLITA ABBY TEH DMD**

Dr The has more than 30 years' experience in the dental field. Dr Teh is teaching at Fullerton Dental Assistant School and Downey Unified School District (Downey Adult School) as instructor. Dr The is also BLS Instructor from American Heart Association. Currently member of ADAA (American Dental Assistant Association), CTA (California Teacher Association), table clinic judge in CDA and program director of Fullerton Dental Assistant for continuing education specializing on Infection Control and Dental Practice Act. Dr Teh is former Dental Consultant and Subject Matter Expert on Curriculum Evaluation for RDA Exam for the Dental Board of California. Infection Control Outline: Legal and ethical aspect of infection control procedures. Terms and protocols specified in the regulations of the board regarding the minimum standards for infection control. Sharp management, Waterline maintenance, Regulatory and non-regulatory waste management, California Code of Regulation, Title 16, Section 1005 will be covered in its entirety.

**LIVE  
WEBINAR  
SERIES**  
w/LIVE CE  
Units!

NOW as a LIVE WEBINAR Series w/LIVE CE Units

**Feb. 20, 2022: Trends in Minimally Invasive Pediatric Dentistry** *Dr. Jeanette MacLean is a Diplomate of the American Board of Pediatric Dentistry, a recommended speaker of the American Academy of Pediatric Dentistry's Speakers Bureau, & internationally recommended as an expert on minimally invasive dentistry.*

**March 27: OSHA, CA Dental Practice Act, Infection Control PLUS a BONUS COURSE: Becoming the "Go-To" Dentist in your Community with these Seven Critical Steps!**

*Carrie Ibbetson, RDH, lectures nationwide using her unique humor and cutting edge information to present tough subject matter in an interesting way. Jim Richardson, the CEO of Click-thru Consulting, is the Amazon best-selling author of "Word of Mouse Marketing for Dentists." He helps dentists refine their messages & drive new patients to their practices.*

**May 1: Making Dentures the Old Fashioned Way- Building Patient Satisfaction and Your Bottom Line!** *Dr. Gordon Fraser is an internationally acclaimed lecturer who served as a Periodontist in the US Air Force. He founded PURE PERIO and also the Southern Georgia Dental Education, a resource for continuing education for dentists.*

**May 22: So Easy, a Prosthodontist Can Do It: The Tips, Tricks, and Techniques from the Daily Life of a Dual-Certified Prosthodontist/Dental Technician (including What Every Lab Tech Wants to Tell Their Dentists, but Won't)!** *Dr. M. Reed Cone started his career as a lab tech, became a GP and is now a prosthodontist and lecturer, who uses his vast experience to help GPs improve their technique and practices.*

**June 26: Intro to the Biomimetic Approach: Permanent Restorations that Mimic Natural Teeth (including Adhesives, Fiber Reinforced Composites & Biomimetic Vital Pulp Therapy)** *Dr. Matt Nejad is an expert in biomimetic and esthetic dentistry. He is a Fellow of the Academy of Biomimetic Dentistry, the highest level of accreditation possible. He lectures nationally and internationally & is a member of the ADA Standards Committee on Dental Products (SCDP). His areas of research and interest are adhesion, polymerization stress, residual stress, biomechanics, occlusion, and esthetics. Dr. Robert Salehrabi is a Clinical Professor at USC and a recommended speaker of the American Association of Endodontists.*

CBCT WEBINAR  
FOR SERIES  
MEMBERS!

**July 17: CBCT Indications and Interpretations & Incidental Findings (this course is NOT included in the Series)** *Dr. Reyhaneh Alimohammadi, DDS, MS is a certified Oral and Maxillofacial Radiologist from the University of Texas. She is a co-author of "Radiologic Clinics of North America" and a reviewer for the Journals of DentoMaxilloFacial Radiology (DMFR) and Oral Surgery, Oral Pathology, Oral Medicine, Oral Radiology.*

COURSE SERIES  
SPONSORED BY:

## COURSE TOPICS

**Trends in Minimally Invasive Pediatric Dentistry:** Learn how to restore cavities in a quick, effective, and painless way using Glass Ionomer Cement, stainless steel crowns, and SDF, known as Silver Modified Atraumatic Restorative Treatment (SMART) and the Hall Technique. Find out how offering minimally-invasive options like SDF, SMART, and Hall crowns can attract new patients, improve patient satisfaction, and increase internal marketing and word of mouth referrals to your practice. As an advocate for minimally invasive dentistry, Dr. MacLean teaches three simple and painless options to manage enamel defects. MI Paste, ICON Resin Infiltration, and etch/bleach seal can improve or even completely reverse the appearance of congenital enamel defects and white spot lesions while preserving tooth structure and repairing the patient's natural enamel.

**OSHA, Infection Control and the CA Dental Practice Act:** *This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, and Infection Control with Carrie Ibbetson. The California Dental Practice Act segment will include:* Basic requirements of the Dental Board, how to avoid Dental Board problems AND Present actual case studies of dentists subjected to Board discipline. **PLUS In our bonus one-hour interactive workshop, we'll take each audience member through an interactive, personal exercise that will teach them how to create their unique compelling message. They will:** Discover their marketing problems ♦ Follow a proven, seven-step process to record their unique message script ♦ Leave with more confidence about their compelling reason a new patient should choose them

**Making Dentures the Old Fashioned Way:** *Over 85% of the American population is missing one or more teeth and over 35% are totally edentulous in one arch or the other. Dr. Fraser will teach numerous strategies to create successful dentures and how he created a multimillion-dollar practice with dentures as his most profitable procedure, including:* Denture tooth selection, denture teeth molds and the steps in denture fabrication ♦ How to prevent remakes and adjusting dentures to patient satisfaction ♦ Using special liners for the really tough cases

**Prosthodontic Tips for Success:** *This course will cover many of the current concepts, materials & techniques available in the restoration of implants, fixed crown and bridge, and removable prosthetic treatment plans. It will address clear & concise chairside/benchtop protocols that will ensure the highest efficacy as well as quality final product at delivery. The presentation will also candidly address what laboratory techs would tell their dentists if they didn't face the repercussion of losing a client, including:* The most frequently cited roadblocks to communication between dental laboratory techs & the referring dentist. ♦ Comparing and analyzing the components of successful cases with those that have failed ♦ Applying concepts within the dental laboratory/office to achieve optimum patient care.

**A Biomimetic Approach to Dentistry:** *The intact natural tooth has the perfect combination of properties via dentin, enamel, and the DEJ. The properties of these individual layers combine to result in superior performance as a multi-laminar structure. An understanding of the structure, function, and resulting biomechanics of natural teeth allows for maximum success in restorative dentistry. This course will cover numerous biomimetic restorative techniques to improve your practice, including:* Dental Materials' properties suitable for enamel, dentin, and DEJ substitute ♦ The Adhesive Equation: Techniques to maximize bond strength and minimize polymerization stresses ♦ Tooth Biomechanics and the resulting prep guidelines ♦ Exciting possibilities of fiber reinforced composites for a variety of restorative techniques including direct, indirect, endodontically treated, and severely damaged and compromised teeth ♦ Preserving pulp-vitality with scientifically supported caries removal endpoints ♦ How to treat deep caries without endo treatment

**Interpreting CBCT Scans & Incidental Findings (This course is NOT Included in the Series):** *This course will build your confidence for reviewing your Cone Beam data sets and give you guidance on how to proceed with incidental findings. Learning objectives include:* When to prescribe CBCT scans. ♦ Decipher 256 shades of gray by learning anatomy, anatomical variations, & pathology basics. ♦ Common incidental findings & when to refer ♦ Understand how to create a CBCT image report.
