FAZEL MOSTASHARI

MBT, Dental CPA, Dental Tax, Accounting,
Valuation and Due Diligence

310-270-6347

Cal.Dental.Cpa@gmail.com

DentalCPAca.com

Fazel Mostashari is a Dental CPA, Forensic Accountant and Financial Professional, specialized on topics relevant to dentists.

His clients seek his advice on dental practice transitions, creation of corporations and partnerships, tax, accounting, financial planning and compliance, financial due diligence, comprehensive dental practice evaluation, and valuation of all kinds of practices for purchase, sale or divorce purposes.

Additionally, as a respected dental CPA, he is a frequent speaker on topics such as practice transitions, negotiations strategies, practice ownership, and tax and financial planning. Fazel is recognized as an exceptional speaker and educator that simplifies complex business topics and has lectured extensively throughout the United States- Currently he has a weekly webinar and Facebook live discussing business issues for dentists with industry and business professionals.

Fazel's expertise is not only taxation issues for dentists but also in his knowledge of dental practice metrics and benchmarks. Fazel has the ability to look at a dentist's profit and loss statements and practice management reports and identify profit holes in his client's practice. In addition, Fazel's specialties include buy-in and buy-out consulting, practice start-ups, compensation plan development, operation evaluations, and litigation support for dentists.

He is married to a dentist and together with his wife they operate a successful multi-specialty dental office in Woodland Hills, CA.

COURSE TOPICS

Oral Surgery for GPs: *This presentation will cover the “basics” of oral surgery for the general practitioner. The typical dentist’s training in oral surgery is usually quite rudimentary, but in private practice, referral to a specialist may not be an option in every case. Yet, should a problem arise, general practitioners are held to the same standard of care as the specialist. This course aims to increase the knowledge level and comfort zone of the general dentist when performing surgical procedures. Topics to be covered include:* Evaluation of the patient’s medical history, management of the patient on anticoagulants, antibiotic prophylaxis, and informed consent ♦ Presurgical planning, local anesthesia, design and use of surgical flaps, handpieces and hand instruments ♦ Classification of third molar impactions, surgical techniques for impacted teeth, and management of the surgical site ♦ Biopsy indications and techniques, and management of complications ♦ Many surgical techniques will be illustrated using video of the procedures discussed.

Reimagined Endo: *Minimally invasive, restorative driven, endodontic treatment, has revolutionized the way we save teeth, with long-term successful outcomes. This unique course will help you wade through the latest materials and techniques and highlight what advanced endodontic treatment looks like today. Info will be presented via numerous case studies and interactive discussions of treatment protocols. Actual disciplinary cases of dental boards and endo-related malpractice cases will be presented to help dentists avoid similar issues. Learning Objectives Include:* Describe the importance and details of endodontic diagnosis and case selection ♦ List cases that should be referred vs. cases that could be addressed in a GP setting ♦ Procedural errors and their prevention ♦ Diagnosis of cracked teeth and treatment options ♦ Endodontic retreatment vs. implants—when, where and how to decide, Dentin replacement materials and their applications in complex cases ♦ Restoring endodontically treated teeth with bonded core composites

TUITION	2 COURSE SERIES	EACH INDIVIDUAL COURSE
