**\$149 FOR EACH LECTURE OR THE ENTIRE 6  
COURSE WEBINAR SERIES, 43 CA APPROVED  
LIVE CES, FOR ONLY \$549 (THAT IS LESS  
THAN THE COST OF FOUR COURSES)!!**

## COURSE TOPICS

**Trends in Minimally Invasive Pediatric Dentistry:** Learn how to restore cavities in a quick, effective, and painless way using Glass Ionomer Cement, stainless steel crowns, and SDF, known as Silver Modified Atraumatic Restorative Treatment (SMART) and the Hall Technique. Find out how offering minimally-invasive options like SDF, SMART, and Hall crowns can attract new patients, improve patient satisfaction, and increase internal marketing and word of mouth referrals to your practice. As an advocate for minimally invasive dentistry, Dr. MacLean teaches three simple and painless options to manage enamel defects. MI Paste, ICON Resin Infiltration, and etch/bleach seal can improve or even completely reverse the appearance of congenital enamel defects and white spot lesions while preserving tooth structure and repairing the patient's natural enamel.

**Dental Pain Management of Patients with Common Medical Conditions and Prescribing Opioids (8CE Units):** *Medical advances have enabled patients who were treated only in hospital-based clinics, to come to our private dental practices. Also, chronic medical problems are now extremely common. This course systematically addresses the most common medical conditions of ambulatory patients, and their dental & pain management, and emphasizes safety issues. The course will also cover specifics of guidelines and laws regarding the prescribing of opioids (for both medically complex and other patients) as well as the DEA scheduling of drugs. Objectives Include:* Confidently assess & manage ambulatory dental patients with cardiovascular disease, diabetes, COPD, bleeding disorders and on anticoagulant therapy, hepatitis, HIV, organ transplants and osteoporosis ♦ Precautions for patients on medications that manage their conditions and drug interactions ♦ Understanding Practices for Pain Management in Dentistry & Procedures for Managing Vulnerable or Substance Use Disorder Patients ♦ Become Familiar with Regulatory Requirements for Prescribers and Dispensers-New guidelines and laws regarding the prescribing of opioids as well as the DEA scheduling of drugs

**OSHA, Infection Control and the CA Dental Practice Act:** This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, and Infection Control. The California Dental Practice Act segment will include: Basic requirements of the Dental Board (including, the new CA state mandated ethics content), how to avoid Dental Board problems AND present actual case studies of dentists subjected to Board discipline.

**Preventive and Restorative Dentistry Working in Concert for the Best, Most Predictable Outcomes:** This course will cover strategies to help your patients from prevention of dental caries to restorative strategies that offer long-term results. Clinical results and the profit potential of a caries management program alongside comprehensive restorative treatment planning and implementation will be covered. Cases will be discussed in depth and attendees will be able to participate in the evaluation of patients for caries risk, risk management, documentation and restorative treatment.

**Minimum Dentistry Maximum Results:** *This course will provide participants with creative solutions to enhance patients' esthetics through minimally invasive dental products and procedures. The participants will learn how to obtain outstanding functional and esthetic results while biologically respecting the hard and soft tissues. Direct bonded restorations will be discussed in detail from both the clinician's & patient's viewpoints. Objectives include:* Learn to conservatively treatment plan and sequence procedures for predictable esthetic & functional results ♦ Learn to combine different treatment modalities and products to achieve conservative yet outstanding esthetic and functional results ♦ Learn simple techniques to expand the use of direct composite restorations

**Dental Implants for GPs:** *Dr. Fraser demystifies implant dentistry & shows offices how to integrate this vital procedure into their practice. More importantly, he shows how to make implant dentistry cost-effective, efficient, and affordable for patients. After all, people want teeth - not dental implants! Designed for the general dentist, attendees will learn the importance of treatment planning, diagnostics, and radiographic interpretation. This course covers procedures such as single tooth replacement, overdentures, and multiple tooth replacement in easy-to-follow, step-by-step protocols. Objectives include:* Guide the patient through the decision of fixed vs. removable prosthesis ♦ Understand the appropriate use of traditional vs. mini-implants ♦ Analyze CBCT scans to identify ideal sites for implants ♦ Evaluate the anatomical limitations of each case ♦ Learn chairside techniques for denture locator attachments ♦ Discuss bone biology and osseointegration for clinical success ♦ Perform the pre-implant oral, anatomical & radiographic exam ♦ Modify an existing denture to utilize implants ♦ Prepare the surgical site for the placement of 2-4 implants ♦ Select the optimal retention attachment to achieve desired results
