MANDATORY
Opioid
Requirement
W/SEP. 20
Webinar!

NOW as a LIVE WEBINAR Series w/LIVE CE Units

Aug. 30, 2026: **Non-Invasive Treatments for Incipient Proximal Carious Lesions & Minimally Invasive Cosmetic Treatment Options for Enamel Defects** Dr. Jeanette MacLean is back with BRAND NEW TOPICS! She is a Diplomate of the American Board of Pediatric Dentistry, a recommended speaker of the American Academy of Pediatric Dentistry's Speakers Bureau, & internationally recommended as an expert on minimally invasive dentistry.

Sep. 20: **Why is Periodontitis so Difficult to Treat & How to Incorporate a Periodontal Program in Your Office & Requirements of Prescribing Schedule II Opioid Drugs (now MANDATORY for ALL TX, IL & CA license renewals & can only be given by pre-approved CA CE providers)** Dr. Hardev Singh is a Diplomate of the American Board of Periodontology and Dental Implant Surgery. He provides advanced periodontal and implant surgical care across multiple practices while prioritizing patient education and interdisciplinary collaboration.

Oct. 25: **Morning Segment: The Nuts and Bolts of Implant-Based Removable Dentures with Dr. Stephen Wagner and Afternoon Segment: Medical Emergencies in the Dental Office with Dr. Sanjukta Mohanta** Dr. Stephen Wagner is a Clinical Professor at Texas Tech & a Diplomate of the American Board of Prosthodontics and recipient of the American College of Prosthodontists Private Practice Award. He serves on the Review Board of the International Journal of Oral and Maxillofacial Implants and is the Editor of the American College of Prosthodontists' Board Study Guide. He is in his 47th year of private practice in Albuquerque. Dr. Sanjukta "Sanj" Mohanta received the Alumni of Influence award from the University of Toronto & started the New Dentist Study Club and hosts their podcast. She received the Ontario Dental Association's (ODA) Merit Award and Service Award. Sanj provides dental care to remote Indigenous communities with the ODA's Remote Areas Program.

Nov. 15: **OSHA, Infection Control & the CA Dental Practice Act (can only be given by CA pre-approved CE providers)** Leslie Canham, RDA, lectures nationwide using her unique humor and cutting-edge information to present tough subject matter in an interesting way.

Dec. 20: **Endodontic Updates for General Dentists** Dr. Robert Salehrabi is an assistant clinical professor at the University of Colorado Dental School and GPR program, author of articles in the Journal of Endodontics and other peer-reviewed journals & the International Endodontic Federation Research Award recipient.

Jan. 10, 2027: **Step-by-Step Interdisciplinary Restorations- Including Direct & Indirect Techniques & Restoring Implants** Dr. John Cranham practices in Chesapeake, Virginia focusing on esthetic & implant dentistry, occlusal reconstruction, TMJ/Facial Pain and solving complex problems with an interdisciplinary focus & was clinical director of the Dawson Academy.

**ALL LIVE WEBINARS ARE ON SUNDAYS, 8AM-3PM PACIFIC TIME
AND 7 LIVE CE UNITS - TUNE IN AND ENJOY OUR COURSES FROM ANYWHERE!**

**\$149 FOR EACH LECTURE, OR THE ENTIRE 6 COURSE
WEBINAR SERIES, 42 CA APPROVED LIVE CEs,
FOR ONLY \$549 (THAT IS LESS THAN
THE COST OF FOUR COURSES)!!**

COURSE TOPICS

Minimally Invasive Pediatric Dentistry: Don't just watch non-cavitated proximal lesions, arrest or remineralize them! Help your patients delay or avoid entering the restorative dentistry death cycle with noninvasive caries treatments. This course reviews early interventions and nonsurgical options for managing incipient proximal caries lesions including topical fluorides, silver diamine fluoride, resin infiltration, and remineralization agents. This course will also review three simple and painless options to manage enamel defects. MI Paste, Icon Resin Infiltration, and Etch Bleach Seal can improve or even completely reverse the appearance of congenital enamel defects and white spot lesions while preserving tooth structure and repairing the patient's natural enamel. Objectives Include: Review the evidence for noninvasive caries treatments ♦ Discuss case selection and treatment planning ♦ Demonstrate the proper application technique for various non-surgical proximal caries treatments ♦ Review the evidence (incl. pros & cons) for using MI Paste, for Icon Resin Infiltration & Etch Bleach Seal & the clinical protocol for each

Treating Periodontitis & Prescribing Opioids: Periodontitis remains one of the most challenging chronic diseases in dentistry due to its multifactorial etiology and patient compliance issues. This lecture explores the biological complexity of periodontal disease, reviews strategies to improve treatment outcomes & provides practical treatment options. Objectives include: Describe the multifactorial causes of periodontitis & clinical implications ♦ Explain challenges related to diagnosis and patient compliance ♦ Develop a structured periodontal program tailored to the practice's needs ♦ Implement communication strategies to increase patient acceptance of periodontal care This segment covers best practices for prescribing opioids, including: Understanding Practices for Pain Management in Dentistry & Procedures for Managing Vulnerable or Substance Use Disorder Patients ♦ Cover Regulatory Requirements for Prescribers and Dispensers-New guidelines and laws regarding the prescribing of opioids as well as the DEA scheduling of drugs

Nuts & Bolts of Dentures & Treating Medical Emergencies: Morning Segment - A practical course on the diagnosis, surgical planning, and prosthetic execution of implant-retained overdentures. Centered on the McGill consensus standard of care for the edentulous mandible, with maxillary applications and attachment-system selection. Objectives Include: Identify candidates for implant-retained overdentures ♦ Plan implant position and attachment selection with the prosthodontic outcome in mind ♦ Manage the long-term maintenance and component replacement that implant-retained removables require. Afternoon Segment- Medical Emergencies in the Dental Office: This interactive session will help you prevent & manage common medical emergencies in the dental office. We will discuss how to manage syncope, cardiac conditions, panic attacks, hyperventilation, local anesthetic toxicity, allergies, asthma, and hypoglycemia. It is recommended that this course is completed by every member of the dental team annually. Objectives include: List the items required in a dental emergency kit & understand how and when to use them ♦ Learn how to prevent medical emergencies in the dental office ♦ Manage a medical emergency confidently

OSHA, Infection Control and the CA Dental Practice Act: This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, and Infection Control. The California Dental Practice Act segment will include: Basic requirements of the Dental Board (including, the new CA state mandated ethics content), how to avoid Dental Board problems AND Present actual case studies of dentists subjected to Board discipline.

Endo Updates for GPs: This course explores the very latest in evidence-based endodontic diagnosis & treatment, covering cutting-edge restorative procedures that enable clinicians to save compromised teeth and ensure a positive long-term prognosis. This case-based lecture will discuss many techniques to biomimetically create tooth structure to perform a root canal & avoid extraction. Objectives include: Understanding the deep margin elevation technique for deep carious lesions enabling you to save more teeth while eliminating the need for crown lengthening ♦ Learning Treatment of resorption cases ♦ Master vital pulp therapy ♦ Cover the restoration of most endo treated teeth without a post ♦ Learn how to treat cracked teeth

Step-by-Step Interdisciplinary Restorations- Including Direct & Indirect Techniques & Restoring Implants: Step-by-Step Interdisciplinary Restorations: Being able to design comprehensive treatment plans that will address occlusal, aesthetic & biologic principals, along with the correct material selection, are essential to the successful restorative practice. Dr. Cranham will discuss detailed techniques for case selection, tooth preparation and restorative techniques. Objectives include: Learn "clinical pearls" to predictably treatment plan & solve patient's esthetic problems ♦ Understand how to place durable posterior composites predictably & esthetically & also the prep & cementation of crowns ♦ Explain how to select & integrate restorative materials & adhesive protocols for indirect ceramic restorations

TUITION	6 COURSES	EACH INDIVIDUAL COURSE
More than 14 days before an event	Dentist: \$549, Staff: \$399	Lecture Dentist: \$149, Staff: \$129
Less than 14 days before an event	Dentist: \$569, Staff: \$419	Lecture Dentist: \$169, Staff: \$149

Courses are 8AM-3PM Pacific Standard time and each course is 7 Live CE Units.
