COURSE TOPICS

Morphology & Occlusion: ***Every restoration placed has the potential to alter the occlusal relationship of the patients' dentition. Thus, understanding, visualizing, and reproducing proper dentate morphology following occlusal concepts regardless of the material used is the key to long-lasting dental restoration. In this lecture, Dr. Lowe will review in detail techniques to create dental restorations that show how the principles of morphology and occlusion can be maintained using today's modern dental materials to produce "world class" dental restorations, including:*** The Principles of Morphology in Direct and Indirect Dental Restorations – Reproducing nature's functional and aesthetic contours – A basis of occlusal understanding. ♦ The importance of "linguovision" in understanding occlusion. ♦ The "ABC" Porkorny Construct of Occlusal Contact: What do those "little dots" mean? ♦ Occlusal Adjustment or "Spheroiding": Maintaining morphologic shape and form when performing occlusal adjustment. ♦ The Art and Science of Provisionalization: A biologic and occlusal prototype for definitive reconstruction. ♦ Tissue Management During Master Impressions: "Tissue Mirrors Technique!" ♦ Definitive cementation protocols for conventional, bioactive, and resin cements: Occlusal adjustment during the cementation process. ♦ Combined Therapy and "Perio-by-the-Numbers" The perioprosthetic connection to restorative dentistry. ♦ Creative Treatment Options: Abstracting Reality! Solutions to aesthetic and functional dental problems you probably have not considered.

Dental Pharmacology with Opioids and Cannabis-What Dentists Should Know: ***Dentists oversee the treatment and management of acute and chronic pain and relieving anxiety in connection with dental treatment. Increased awareness of the addiction potential of opioids has resulted in many new laws and guidelines for the prescribing of these medications. Although dentists are not usually involved in the prescribing or dispensing of cannabis products, as health care professionals we should have a working knowledge of these substances. Information presented will include:*** The latest biomedical ramifications of addiction/substance, including the disease model of addiction, biopsychosocial predispositions, and genetic susceptibilities ♦ The concepts of tachyphylaxis (drug tolerance), psychological dependence, physical dependence and the drugs used in the short-term treatment of substance abuse detox-withdrawal syndromes ♦ Opioid use and misuse ♦ New guidelines and laws regarding the prescribing of opioids as well as the DEA scheduling of drugs ♦ The nature of cannabinoids, natural and synthetic ♦ CBD and the OTC CBD oil craze ♦ An understanding of CBD labeled products ♦ The dangers of super-high potency marijuana preparations ♦ Cannabinoid drugs and common side effects as well as adverse effects

TUITION	BOTH COURSES	EACH INDIVIDUAL COURSE
More than 14 days before an event	**Dentist: $249, Staff: $199**	**Lecture Dentist: $149, Staff: $129**
Less than 14 days before an event	**Dentist: $269, Staff: $219**	**Lecture Dentist: $169, Staff: $149**

Courses are 8am-2:30pm Pacific Standard Time.
