**LIP AUGMENTATION
AND DESIGN FOR
DENTISTRY USING
INJECTIBLE FILLERS**

**A Technique Workshop
Presented By**

Howard Katz DDS

ENHANCE YOUR DENTISTRY WITH IDEALLY PROPORTIONED LIPS

ELIMINATE SMOKERS LINES AND DEEP NASIO-LABIAL FOLDS WITH IDEAL LIP DESIGN

CURRICULUM: Find out why these procedures should only be done by a dentist

- The relationship between the size, shape and position of the lip relative to the face, occlusion, teeth and gums
- Treatment and marketing co-ordination with cosmetic surgeons and estheticians
- Realistic expectations, contraindications, precautions, and potential risks
- Proper preparation and injection techniques.
- Instruction in pain management.
- Techniques to create the ideal lip design to complement the front teeth, gingiva and face.
- How to avoid creating "fish lips" or "duck lips"

Attendees will receive a course manual including injection sites and techniques, types of materials, pre- and post-operative patient instructions, and consent forms.

HANDS-ON TRAINING

1. Attendees may serve as a patient model or bring one qualified model (each model should need treatment in the lips, nasolabial folds, and oral commissures) or we will provide a model, all by prior arrangement.
Models with any infection in treatment areas or lip disease will not be accepted.
All patients will be injected with local anesthetic Lips may be swollen after injections for 1-2 days.
2. Attendees must contact course administrators regarding the purchase of non- immunogenic fillers for use in the course (**this working material is an extra cost of \$219 per syringe**). All other materials will be provided.
3. Local anesthetic will be provided in disposable plastic syringes. Bring your own metallic dental anesthetic syringe if you would prefer this option.

Dentists may treat all lesions and imperfections of the lips as covered by the Dental Practice Act of their state.

Your dental board will NOT approve of the use of micro-fillers EXCEPT in and around the mouth to complement dental esthetics.

This 1-day intensive academic and hands-on training workshop is for physicians, dentists, RN's and NP's.

The course will cover:

The history, background, and development of fillers (including animal and non-animal collagen and hyaluronic acid fillers (Hylaform, Perlane and Restylane, and new fillers on the horizon).

The ideal relationship between the size, shape and position of the lip relative to the face, occlusion, teeth and gums

Attendees will learn how to perform these procedures themselves and/or how to prescribe treatment to other esthetic professionals

Also covered will be the management and correction of mistakes in technique and design.

A decorative banner with a rope border and a central oval containing text. The rope is yellow with a black outline and is braided. The central oval is yellow with a white outline. The text is in a bold, black, sans-serif font.

NOMAD™ Portable X-Ray

Anytime... Anyplace...

NOMAD™ is a handheld intra-oral x-ray system that is cordless, battery-powered, true DC, lightweight, and simple to use. An external backscatter shield and unique internal radiation shielding ensure operator safety that exceeds regulatory requirements. NOMAD's true portability doesn't compromise the diagnostic quality of the x-ray images. It's economical; in the office or field, NOMAD does the work of multiple conventional x-rays. Anytime...Anyplace you need x-ray, NOMAD is here!

Introducing the
I-Max Easy
Digital Panoramic Imaging

LOWEST PRICE
EVER
on a digital pano!

Group Practice
The unit is supplied with a Compact Flash card that can be used to store images without a PC connection. The removable card can then be taken to any other PC in the practice.

Higher quality
The image is digitized at source, when the image is taken, to avoid the risk of information loss.

Greater control
Digital technology is very flexible and enables post-compensation of anomalies to "fix" any exposure errors.

Greater diagnosis precision
Zoom in or out, reverse video, pseudo-colours, etc. QuickVision software can manipulate the image in ways that help you better understand the patient's pathology.

Easier storage
The image is available immediately and stored automatically in the patient file. It can easily be sent over the Internet to a colleague or a health insurance agency, or printed on paper.

The **new** I-Max Easy digital panoramic unit is the fruit of a perfect combination of recognized simplicity (as already seen in the analog version in use in more than 15,000 practices around the world) and very high precision digitalization..

I-Max Easy can be used for all the most common panoramic radiographs:

- Standard adult or child panoramic
- TMJ mouth open or closed
- Sinus

Increased safety
The digital sensor technology is more sensitive, allowing the radiation dosage needed to take an image to be significantly reduced.

Additional benefits
Going digital will cut out developing costs and associated pollutants, and free up the space previously occupied by the darkroom.

Instant availability
Once the image is taken, it is instantly available on your computer screen. No more waiting around - the diagnosis is immediate.

Remarkable Adaptation
With I-Max Easy, sharing resources becomes the key to profitably managing your practice, regardless of its current configuration.

I want to sell my practice.

Name _____

Address _____ City _____ State _____ Zip _____

E-mail _____ Phone _____ Mobil _____ Home _____

WINDOW OF OPPORTUNITY

If your not now securing 20 to 30 new patients a month and achieving a \$500,000 gross or more perhaps you're in the wrong place, or perhaps you do not have a marketing system that provides you enough patients to fill a 4 day practice. New patients are the driving force behind a thriving practice.

There are numerous methods of marketing and some are effective in one location and not in another location. Trial and error sometimes is necessary to find the most effective method for your location. P.P.S., Consultants are available to help you prepare your practice for sale as well as give you options that have been effective for others.

Scores of individual dentists have tried marketing, spending Thousands of Dollars with little success and then decided marketing was not for them, and learned to be happy with what they have been able to generate without marketing.

Marketing rarely worth the effort if it is done with no goals or no plans for success. Marketing is a function not only of money but also the period over which you spend your marketing dollar. In other words a successful marketing program is a function of both time and money. It is better to divide your marketing money over 52 weeks and do something each week. To a certain extent you can tweak your marketing programs over time to zero in on an effective marketing campaign for practices.

Dean, Wally and I have literally visited thousands of offices and believe we can help you sell your practice as it exists now or can help better prepare you for a future sale when your practice is groomed for the maximum selling price.

Window of Opportunity - This is the best time in history to cash in on your practice. You can take advantage of what you know works for you and apply your skills in a new location with more favorable demographics or retire.

Register on our Web site for immediate notification of a new practice for sale.

**SOUTHERN CALIFORNIA ACADEMY
OF GENERAL DENTISTRY**

Southern California Academy of General Dentistry

Presents

SCAGD Fellowship Examination Review Course

Course Objectives:

- To Assist AGD members as a review for the Fellowship written examination.
- To Provide general dentists with systematic review of the major components of clinical dentistry.

Description:

This review course is designed to provide significant insight in to all phases of general dentistry (10 disciplines). It will help dentists to prepare for the AGD Fellowship examination. The course is a lecture and review by 2 different instructors over two 10 hr days (Saturday and Sunday). The format will follow the subject matter covered in the Fellowship examination. **SCAGD will provide review notes.** In addition, participants can purchase an AGD Fellowship exam study guide directly from the national AGD office.

Speakers:

Both speakers are experienced clinicians who have achieved distinguished Fellowship and Mastership Awards and have pursued board certification in general dentistry.

Washington University, St Louis,
Graduate. Fellowship and Mastership
in AGD. Private practice,
South Gate, CA

Chikka M. Raju, BDS, DMD, MAGD

USC, graduate.
Fellowship & Mastership in AGD
Private practice, Alta Loma, CA.

Jeff Lloyd, DDS, MAGD

CE credits:

20 AGD and California board approved credit hours from SCAGD. Those who have purchased the AGD study guide will get an additional 25 hours by submitting the answer sheet to the national AGD office. (AGD members only)

Tuition:

\$400 for the 2-day course and SCAGD review notes, before deadline. Registration after that date is \$475. The fee includes continental breakfast, group lunch and beverages on both days.

Deadline for registration: May 22, 2006

Venue and Dates:

**Saturday and Sunday, May 27 and 28, 2006. 7:00 AM-----6:30 PM.
Sheraton Cerritos Hotel. 12725 Center Court Dr. Cerritos, CA 90703
For information and registration call SCAGD at 800-762-2511, 310-471-4916
Executive Director: Dr. R. E. Garfield**
