Precision Based Endodontics

Sunday, September 10, 2006 - Cerritos, California

Tom Massarat, DDS, MS

Dr. Tom Massarat received his DDS degree from Northwestern University in 1989 and AGD certificate in 1990 from Northwestern University. He went on to receive his Master of Science Degree and Certificate in Endodontics from Northwestern University in 1992. A Diplomate of the American Board of Endodontics, Dr. Massarat maintains a private practice in San Diego, California. At the AAE meeting in San Francisco in 1992, he was awarded "first place" for his research on bone and cartilage. He serves as an Endodontic Advisor for the San Diego Summit Study Club and the Experdent Group. As a member of Real World Endo's Board of Advisors, Dr. Massarat lectures and conducts hands-on seminars on Precision-Based Endodontics.

Precision Based Endodontics - Presentation with Demonstration

"Precision-Based Endodontics" by Real World Endo® is an all day multi-media presentation that covers a broad spectrum of topics. This course will demystify endodontics, covering everything from bulletproof diagnosis to precision obturation. The approach of Real World Endo® is entirely practical and is a comprehensive all inclusive course for the general practitioner. Drs. Koch and Brave approach endodontic education from a totally different perspective; that of the real world clinician.

Participants will neither be intimidated - nor get seduced - by technology. The focus will be primarily on the conceptual issues.

Real World Endo will share with you strategies and techniques developed over years of clinical practice. You'll learn techniques so sophisticated, they're simple. These are time tested techniques that will work well for you too! The goal is for all clinicians to gain precision in their endodontics. Precision not just in instrumentation, but precision as well in obturation. Participants will have the opportunity to actually view a demonstration of the techniques discussed.

During this lecture you will learn how to:

1. Understand and perform a logical differential diagnosis
2. Routinely anesthetize "Hot Teeth" effectively
3. Visualize and create the "Ideal Access" preparation
4. Fully understand "Crown-Down" philosophy
5. Appreciate and perform the fully tapered .06 preparation
6. Differentiate between Constant and Variable Taper Systems
7. Make instrumentation and obturation "Precision-Based" and quality oriented
8. Appreciate new hand file designs that compliment rotary techniques
9. Experience "Rheostat-free" Endodontics
10. Perform "Painless Endodontics" in your practice.

Putting the case together – Clinical Sequencing

Dr. Snyder received his D.D.S. in 1994 from the University of California at Los Angeles, School of Dentistry. He subsequently completed a General Practice Residency at the V.A. Medical Center, La Jolla, California. In 1995, Dr. Snyder returned to the UCLA School of Dentistry. As faculty in UCLA's Center for Esthetic Dentistry (CED) he co-developed and was co-director of the first and only two-year postgraduate program in Esthetic and Contemporary Restorative Dentistry. He still maintains his faculty status at UCLA in the section of Biomaterials. Dr. Snyder is also a faculty member at Esthetic Professionals training facility in Los Angeles.

Dr. Todd Snyder

Selection of indirect restorations that will fit case's desired results.

In today's dentistry choice is in no short supply, but making the right selection from all of the available options can get complicated. Even doing your homework and sorting through the manufacturer's advertorials and solid research. It is still difficult to make the right choice of materials for each patient's unique needs. David French from Burbank Dental laboratory will share what an esthetic / commercial lab has seen after doing thousands of the various brand name restorations over the past 12 years. Learn what the strengths and weaknesses of various materials, and then when & where to use those materials.

David French

Burbank Dental Laboratory

7 Secrets to Case Acceptance

Did you know that each interaction creates a ripple effect in building trust and relationship? Did you know that, KNOWING your patient could be the key to having your patients say YES. Join Suzanne Black, President of The Coaching Center, sponsor of the original Dental Boot Kamp as she takes you through the 7 secrets that every dentist and team member need to know to succeed in building the Trust required for patients to say Yes. Be ready to laugh while you are learning and We promise you will have pearls you can use on Monday morning to create that ripple effect for your practice.

Suzanne Black

This great learning experience is only \$89 for member dentists and \$59 for dental assistants. For information and registration call SCAGD:310-471-4916, 800-762-2511

The logo consists of a thick, braided rope in a golden-yellow color, outlined in black. The rope is arranged in a rectangular shape with rounded corners, with the ends of the rope crossed at the top center. Inside this rope border is a large, horizontal oval with a white outline and a solid golden-yellow fill. The text "DENTON, INC" is centered within this oval in a dark blue, serif font.

DENTON, INC

ENHANCE YOUR PATIENTS' SMILES WITH IDEALLY PROPORTIONED FULLER LIPS CREATE BEAUTIFUL NATURAL LOOKING LIPS AND APPEARANCE OF IDEAL DENTAL SUPPORT

Lip augmentation techniques vary with different occlusions, profiles and smile esthetics. This 1-day intensive academic and hands-on training workshop is for dentists, and physicians, RN's and NP's who want to learn how to augment lip size and shape to match the face, occlusion and dental esthetics.

The course lectures will compare all popular fillers (Hylaform, Juvsyn, Reversse, Perlane, Restylane, and new fillers on the horizon). Find out which materials to use and WHICH MATERIALS NOT TO USE.

Learn how to implement ideal lip augmentation in your office and how to prescribe correct lip design that enhances the appearance of the front teeth to other esthetic professionals.

Recognition and management of side-effects and correction of mistakes in technique and design will be discussed in detail.

COURSE DIRECTOR

A course will be given from a cosmetic dentist and a periodontist's perspective by Dr. Howard Katz. Dr. Katz is the creator of the design protocols for ideal lip proportions using dental and skeletal landmarks. His protocols are recommended by the leading manufacturers of lip fillers. Dr. Katz's dynamic lectures are sold out nationally and internationally. His articles have been published in peer reviewed journals internationally.

CURRICULUM

- Lip support – dental treatment options. Intra-oral and extra-oral approaches
- Filler injection techniques to create the ideal lip design to complement the front teeth, gingiva and face
- The correct sequence of dental and facial esthetic treatments
- Realistic expectations, contraindications, precautions, and potential risks
- Management of technique problems and correcting mistakes
- Instruction in pre-medication, pain management and complications.
- How to avoid giving your patients "duck" or "fish" lips.

Attendees will receive a course manual. This will include all necessary supporting forms and templates such as history, consent, policy/procedure forms.

HANDS-ON TRAINING

1. Attendees may serve as a model or bring one qualified model (each model should need treatment in the lips, nasolabial folds, and oral commissures) or we will provide a model, all by prior arrangement. Models with any infection in treatment areas will not be accepted.
2. Attendees must contact course administrators regarding the purchase of non-immunogenic fillers for use in the course. Lips and nasio-labial folds usually require at least 3 syringes. These filler materials are an additional expense.

Attendees may require additional training before ordering certain fillers. Dentists may treat all lesions of the lips as covered by the Dental Practice Act. Your dental board MAY NOT approve of the use of micro-fillers EXCEPT in and around the mouth and to enhance dental esthetics.

This program is not related to any other program offered by DentoFacial Courses

INJECTIBLE ESTHETICS AND THERAPEUTICS

Presented By:
DENTOX INC

BOTULINUM TOXINS

FOR DENTISTRY:

THE NEW PARADIGM

Learn from the world experts that originated many of the Botulinum toxin treatment concepts and protocols.

WHY YOU SHOULD ATTEND

- 99% of all past attendees rate this course as "vastly exceeding expectations"
- If you want your practice to be on the cutting edge of your profession for pain and cosmetic treatment.
- Botulinum Toxin is very effective in reducing extra-capsular myogenic TMD, parafunctional clenching, sialorrhoea, and improving tolerance of prostheses
- 25 million patients in the USA suffer from trigeminally mediated conditions that respond to this therapy.
- Most patients are unwilling to have comprehensive dental treatment for a transient TMD condition.

WHO SHOULD ATTEND?

If your practice includes esthetics and comfort:

General Dentistry,
TMD,
Orthodontics,
Periodontics,
Oral Surgery,
Cosmetics
Prosthetic Dentistry.

WHAT YOU WILL LEARN

- History and mechanism of action of all Botulinum Toxins including Botox®, Dysport® and Myoblock®.
 - The basic head and neck anatomy as it relates to the use of Botulinum Toxin
 - The causes of dento facial pain disorders
 - How to explain and obtain an ideal patient release
 - Know which patients to treat and which to refer
 - Understand the effectiveness of Botulinum Toxin and how it works
 - The position of the FDA on the use of Botulinum Toxin for dento-facial conditions
 - The position of the Dental Boards
 - Safety record and avoiding side-effects
 - How Botulinum Toxins augment other Dentofacial treatments
 - When to use a splint with Botulinum Toxins
 - The relationship between cosmetics and dento-facial treatments
 - Why Botulinum Toxin is the most conservative and cost effective treatment
 - How to implement a new technology in your office with minimal capital expense
 - How to efficiently submit claims to insurance companies
 - Live injection demonstrations on a huge projector screen
 - Injection techniques inclusive of cosmetic implications
 - Answers to all your questions
- Bring your own patient or you can receive treatment, all by pre-arrangement.

Fax your medical or dental license to Ann Katz at the DENTOX office at 858 550 9533.

There is an additional fee for the Botox® plus supplies.

Go to the Dentox website at www.dentox.com for more information regarding this comprehensive program. There are no other programs as comprehensive as this for the dentist or physician who is interested in implementing therapeutic and esthetic botulinum neurotoxin treatments in their offices.

Force Majeure: If for any reason beyond Dentox's reasonable control, including but not limited to strikes, labor disputes, acts, regulations or orders of government authorities, civil disorder, disasters, acts of war, acts of God, fires, floods or other emergency conditions, Dentox is unable to perform its obligations under this agreement, such non-performance is excused and may terminate this agreement without further liability of any nature, upon return of attendees deposit.

Dentox will not be responsible for any other intentional or unintentional, consequential or inconsequential, related or unrelated expenses and costs incurred by anyone who intends attending or does attend their courses. These include but are not limited to loss of income, travel expenses, meals and accommodations.

The intention of Dentox Seminars is to educate dentists, physicians, other medical personnel including supporting staff about the use of Botulinum toxins in the realm of dentistry. The State Regulatory Boards have determined which attendees are licensed to perform treatments on the dento-facial and masticatory musculature. All attendees that treat patients at the meetings do so under their own malpractice insurance.

Dentox Inc does not receive any financial support for this program. This course has no relationship to any other courses promoted by The Dentofacial Course Center.
