### DR. FRANK J. VERTUCCI

Frank J. Vertucci, D.M.D., Professor, Chairman, and Director of Postgraduate Endodontics. Dr. Vertucci completed both his D.M.D. degree and specialty training in endodontics at the University of Medicine and Dentistry of New Jersey. He holds board certification in endodontics and is a fellow of the American and International College of Dentists. He joined the Department of Endodontics at the University of Florida in 1975, was named department chairman in 1980, and became the director of the Postgraduate Endodontic Program in 1996. Dr. Vertucci has received the Teacher of the Year Award and Outstanding Clinical Professor Award in recognition of his teaching. An internationally known author and lecturer, he is currently researching the effects of new endodontic material and effect of calcium hydroxide and endosonics on canal disinfection and cleanliness.

### Synopsis:

- Technological advances in endodontics.
- Biological basis for treatment and how this affects success.
- Different approaches for treating endodontic problems.
- Endodontic failures happen and know keys to improving endodontic success.
- Problems in access preparations that affect therapy.
- Relationship between endodontics and a clean root canal system.
- Use of sodium hypochlorite chlorhexidine, BioPure MTAD, and antibiotic pastes in improving endodontic success.
- Rationale for one- and two-visit endodontics.
- Limitation of rotary instrumentation.
- Knowledge of the newest obturation systems.
- Calcium hydroxide is the cause or cure for endodontic infections.
- Endodontic emergency care.
- Endodontic surgery.
- Place of biolase and ozone in canal disinfection.
