

Xcel Seminars Presents

3RD ANNUAL COMPREHENSIVE SKILLS SERIES

Aug. 29, 2010: Introduction to Implants & Bone Grafting

Drs. Dennis Smiler and Muna Soltan have both published and lectured extensively on prepping for and properly placing dental implants.

Oct. 17, 2010: What's Hot and Getting Hotter in Today's Restorative **Dentistry** Dr. Howard Glazer is Past President of the AGD, a former professor and is the Deputy Chief Forensic Dental Consultant to the NY Office of Chief Medical Examiner

Nov. 14, 2010: Restoring Implants- The Evolution of Treatment Options Dr. Antonio Mancuso is one of Canada's leading experts on restorative dentistry.

Dec. 12, 2010: OSHA, Infection Control & the CA DPA (meets new 2010 requirements) Leslie Canham, CDA, RDA, has informative and entertaining methods to help the dental team navigate the sea of state and federal regulations.

Feb. 6, 2011: Cosmetic and Minimally Invasive Dentistry Dr. Frank Milnar, past editor of the American Academy of Cosmetic Dentistry magazine and esthetic dentistry expert.

Kenneth Carver, DDS: US Dental Institute lecturer on orthodontics, who has helped thousands of GPs incorporate non-complex ortho treatments into their practices.

CROWNE PLAZA SAN JOSE/SILICON VALLEY 777 Bellew Drive Milpitas, CA (Minutes from the 880, 680, 101 & 237 Fwys) All Courses are on Sundays 8AM-4PM & 7 CA CEs each

6 COURSE SERIES (42 CA CEs) FOR ONLY \$475 OR \$165 EACH

STEP-BY-STEP COSMETIC RESTORATIONS:

Two Locations:

Friday, Nov. 5 in San Francisco & Sunday, Nov. 7 in San Jose

SERIES SPONSORED BY:

✓ Henry Schein® DENTAL

HANDS ON COURSE

ONLY **\$199**

FOR SERIES MEMBERS

(7**CE**s)

Approved PACE Program Provider FAGD/MAGD Credit Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. (10/01/08) to (09/30/2011)

Course Topics

Intro to Implants and Bone Grafting: Speakers will discuss new and predictable implant design and placement techniques, basic treatment planning considerations, related surgical procedures, and biologic width considerations
 Concepts include: development of the recipient site, synthetic vs. other bone grafts, presentations showing simple methods and materials for bone grafting success

What's Hot in Dentistry: A program about real dentistry for real people by a real dentist! He includes a potpourri of materials and techniques that will make your days easier, more productive and fun \diamond Topics include: desensitization and adhesives, composites for esthetic fillings, sandwich techniques, impression materials, cements, tissue retraction and fluid control, reducing sensitivity, whitening systems that work and assessing clinical situations and their impact on treatment

Restoring Implants: This program will discuss the evolution of restoring implants over the last 20 years, including: Mandibular overdentures on 2 implants and Mandibular/Maxillary bar overdentures \blacklozenge Locator attachments \blacklozenge Fixed/ Detachable dentures \blacklozenge Mini Implants \blacklozenge Selecting alloys for implant restorations \blacklozenge "All-on-4" concepts \blacklozenge Pretreatment considerations for proper treatment outcomes \blacklozenge Treatment planning for crowns and bridges \blacklozenge Cases from single tooth implant restorations to full mouth reconstructions utilizing implants.

Infection Control and CA DPA: This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen Training, the California Dental Practice Act and Infection Control.

Esthetic and Minimally Invasive Dentistry: This course will discuss skills required to perform complex direct restorations, creating highly accurate natural looking restorations with a high degree of esthetic appeal. Topics include: Expanded use of composite materials \blacklozenge Creating three dimensional restorations \blacklozenge Confidently treating difficult class IV, diastema, and composite veneer restorations \blacklozenge Learning a predictable method to finish and polish composites

Adding Ortho to Your Current Practice: This course will explain how you can treat non-complex ortho cases, including: an intro to the straight wire system < The role of functional appliances and Invisalign in patient treatment
A description of a complete system to become familiar with orthodontics

Hands-On Cosmetic Restorations: (An additional fee is required for this course) Essential principles of esthetic restorations, including techniques for setting up the arch form of a crowded, anterior veneer case and step-by step preparation, temporization and contouring techniques

REGISTRATION								
TUITION	6 COURSE SERIES MEN	IBERSHIP	EACH INDIVIDUAL CO	URSE				
Registration By August 13	Dentist: \$475, Staff: \$235 (Add \$199 for the Hands-on)		Dentist: \$165, Staff: \$135 (\$269 for the Hands-on)					
After August 13 (Onsite Add \$20 fee)	Dentist: \$495, Staff: \$275 (Add \$229 for the Hands-on)		Dentist: \$185, Staff: \$155 (\$299 for the Hands-on)

Jerome H. Stroumza, DDS, MS, DSc

Dr. Stroumza received his DDS in Paris, France with emphases in endodontics, periodontics, oral surgery and radiology. After practicing and teaching in Paris, he trained at UCLA where is received a Master's of Science in Oral Biology for research in growth factors and the extraction and testing of BMP (Bone Morphogenic Protein) which had been discovered by Professor Urist. He continued his formal endodontic specialty training at Boston University under Prof. Schilder where he received his Doctorate in Science for research on human osteoblastic cell migration and the impact of endotoxin in healing of lesions of endodontic origin.

Since teaching at UCSF, he maintains a full time practice in San Francisco teaching locally and lecturing nationally and internationally. In the mid 90s, Dr. Stroumza laid the foundation of his novel approach in the decision-making process and management of complex endodontic cases combining endodontics with the field of 3D radiography, bone grafting and implantology. Founder of the concept: EndoImplantology as the paradigm shift in endodontics. As a member of Real World Endo's Board of Advisors, Dr. Stroumza is certified to conduct lectures and seminars on Precision-Based Endodontics.

The Endo-Restorative Continuum

This presentation will concentrate on two areas. 1) How to perform Endodontics in a predictable, reproducible manner, and 2) How to do root canal therapy in such a manner that you actually enhance the long-term prognosis of the tooth. The goal of this program is to have dentists learn how to perform endodontics in such a way that they can offer their patients a long-term natural dentition option as an alternative to implants.

Included in the lecture component will be a thorough discussion concerning access, non-surgical ultrasonic use, rotary file design, instrumentation techniques, and various obturation options. Particular emphasis will be placed on developing endodontic synchronicity between a machined preparation and a laser verified primary or single cone. Additionally, various techniques will be discussed that will facilitate the restoration of the endodontically treated tooth.

During this lecture:

- 1. How to perform minimally invasive endodontics the .04 preparation.
- 2. The benefits of developing "endodontic synchronicity".
- 3. The advantages of new bioceramic technology in endodontics.
