SUPRA-GINGIVAL DENTISTRY ANTERIOR ESTHETICS WORKSHOP EASY, PREDICTABLE PORCELAIN VENEERS, PJCS & ALL CERAMIC CROWNS

SYNOPSIS

Porcelain veneers when performed correctly can yield exquisitely beautiful results with minimal tooth preparation and no negative side effect; thus bringing great joy to both patients and clinician. However, if performed incorrectly, it can easily become a destructive, unpredictable and often unsuccessful procedure. This may be the reason why full crowns are more popular. Achieving consistent patient satisfaction requires more than good restorative principles, it also requires excellent communication with the patient, to understand their unique esthetic perspective and goals and then implement a system, to record this information and blend it with our own esthetic preferences and goals. It is also of great importance to consider the longevity of our restorations, which always involves occlusal management.

It is thus evident that achieving great results with porcelain veneers and PJs requires the thorough understanding of restorative principles, dental materials, smile design and occlusion. Dr. Ruiz will present his practical, logical and scientifically based approach to incorporating all of these important components into an easy logical and highly predictable system which will virtually guarantee excellent results and patient satisfaction every time.

IN THIS WORKSHOP YOU WILL LEARN:

- Understand how to record patients' unique esthetic perspective and goals and how to blend it with our own, and perform a smile design.
- Prepare and cement several veneers using learned techniques.
- Understand how proper diagnosis and smile design dictates proper tooth preparation and restorative material selection.
- Learn what restorative materials and porcelains to use for long term stability.
- Learn which bonding systems and techniques will yield better longevity and low sensitivity.
- Step by step techniques, and much, much more...

WHAT PARTICIPANTS HAVE TO SAY:

"Dr. Ruiz's Veneers workshop gives you the tools and confidence to tackle complex cases in your practice by teaching you a systematic way. The hands on component of the course allows you to practice the newly learned technique on a typodont and troubleshoot in a supportive environment."

-Maya Johar DDS

OCCLUSAL DISEASE MANAGEMENT WORKSHOP

THE ENTIRE OCCLUSAL PHILOSOPHY AND APPLICATION!

SYNOPSIS

In this very practical workshop you will learn how to implement a methodic and incremental approach to diagnosis and treatment which can be easily performed in any practice and used on every single patient. During this workshop you will perform examinations to assess the seven signs and symptoms of Occlusal Disease, learn when and how to take Phase II occlusal analysis records, CR bites, mounted cast, etc. You will learn how to develop a restorative diagnosis implementing an occlusal strategy. You will also learn and perform additive and subtractive equilibration. This course also includes a system to educate patients about Occlusal Disease, leading to excellent treatment acceptance and added profits, while maintaining a highly ethical practice.

WHAT PARTICIPANTS HAVE TO SAY:

"I highly recommend Dr. Ruiz's Advanced Occlusal Disease Workshop. He has an amazing ability to translate the complicated language of occlusion in to an extremely clear and practical form that will elevate your dentistry."

– Thomas Ludlow DDS, Folsom California

2 Day Lecture & Workshop: Nov. 11-2, 2011

14 CE hours

IMPLEMENTATION OF SIMPLE IMPLANT DENTISTRY USING SHORT, NARROW PLATFORM AND MINI IMPLANTS

FROM SURGERY TO REHABILITATION...WORKSHOP

SYNOPSIS

Patients today are no longer willing to have their teeth sanded down for fix bridges; implant dentistry is here to stay. The demand for implants is growing exponentially... it is the fastest grown are in dentistry. It is clear that implant dentistry is not the domain of specialist, the demand is too great. Similar to extracting teeth, GPs and restorative dentist should perform the majority of implant procedures and refer the difficult cases to the specialist. In this practical workshop Dr. Ruiz will present the most logical system to select, place and restore simple implants in normal to narrow bone. These techniques can be implemented on Monday, and are in accordance with provisions placed by the 2010 Guidelines of the Academy of Osseointegration. Dr. Ruiz will also explain how to avoid unsatisfactory results. Placing and restoring implants in normal to narrow bone without bone grafting is an indispensable skill, which will increase you bottom line at least 20 to 30% each year.

WHAT PARTICIPANTS HAVE TO SAY:

"I have taken several Implant courses and I learned more in 2 days about doing easy, predictable, Implant dentistry than any other course I have attended. Even better then a 4 month long Implant Course!"

– Charles Scholler DDS, Somis, CA

SUPRA-GINGIVAL DENTISTRY: POSTERIOR WORKSHOP

**EASY, PREDICTABLE PORCELAIN ONLAYS,
FULL CROWNS, ETC...**

SYNOPSIS

In this practical workshop, Dr. Ruiz will first demonstrate on a live patient, a new paradigm in preparation and cementation for porcelain onlays. Dr. Ruiz will show step-by-step how using "Supra-gingival Dentistry" techniques and understanding the specific characteristics of these new materials, dentistry can become easier and more predictable than ever. He will show step-by-step, the techniques and principles for tooth preparation, temporization, and sensitive-free easily bonded cementation.

During the workshop, participants will perform many tooth preparations specific to Supra-gingival dentistry for non-metal onlays, and full crowns in very realistic simulators, using the techniques and information learned. Participants will also bond porcelain onlays using the techniques learned.

**2 Day Course / Live
Patient Demonstration
& Workshop:**

Jan. 20-21, 2012

14 CE hours

\$1490 (\$1290*)

***early registration
30 days prior to event**

**Advanced Technology Center
2111 Kenmore Street
Burbank, CA 91504**

WHAT PARTICIPANTS HAVE TO SAY:

"Since taking the supra-gingival workshop, fixed prosthetics has truly become simplified and much more predictable than ever before ... Preps, impressions & cementation are easier, cleaner and more predictable ... If you are looking for a course that truly improves the way you do dentistry with the utmost efficiency I cannot recommend any other course over supragingival dentistry."

– Dr. Ali Sheikholislam, Sacramento, CA

DR. J. LUIS RUIZ

Dr. Ruiz was named by *Dentistry Today* as one of the **"Top Clinicians in CE in 2006-2011 in the US."** He is the Director of the Los Angeles Institute of Esthetic Dentistry, and former Director of the "University of Southern California's Esthetic Dentistry Continuum" from 2004-2009.

He is also an Associate Instructor at Dr. Gordon Christensen's PCC in Utah and an independent evaluator for CRA. Currently Dr. Ruiz maintains a private practice in the studio district of Los Angeles where he has been practicing for the past 18 years.

DECEMBER 18, 2011: COSMETIC & MINIMALLY INVASIVE DENTISTRY

Lou Graham, DDS: Expert in "conservative dentistry," uses interactive formats and relevant cases to make this a don't miss hands-on course!

COURSE SERIES SPONSORED BY:

COURSE TOPICS

OSHA, Infection Control and CA DPA: This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, the California Dental Practice Act and Infection Control.

The Ultimate Materials Course: This seminar will cover the latest dental techniques and materials, including: how dental sensitivity can be totally eliminated and prevented, 7th and 5th generation adhesive materials, innovations in composites and matrix systems, and single step etch, bond and desensitization ♦ Minimally-invasive Fissurotomy burs – an anesthetic-free approach to caries restoration and repair ♦ Indirect procedures are simplified by easier to use, impression materials and one-step resin cements ♦ One-step post cementation and core build-up techniques ♦ Innovative carbide crown and bridge preparation (GW Ultra) with constant torque high speed electric handpieces. ♦ Predictable digital shade matching ♦ Photo-Activated Disinfection technology offers caries control and remineralization.

Dentures and Implants: This presentation will cover the most important aspects of partials, complete removable dentures and implant retained over-dentures, detailing helpful tips to eliminate problems and obtain predictable fit and esthetics, including: The most important aspects for successful complete, partial, immediate and implant retained over-dentures ♦ Techniques for accurate jaw registrations, reline and denture impressions ♦ Direct implant pickup and accurate jaw relations ♦ Stud vs. Bar-type implant attachments and the elimination of partial and denture adjustments

Endo Update: This seminar will discuss the latest practical information regarding endodontic diagnosis and treatment, including: What is affecting treatment outcomes? ♦ Diagnosis and treatment planning ♦ Rational, evidence-based case selection ♦ Endo-perio interrelationship ♦ Procedural errors and their prevention ♦ Dentine replacement materials and its many applications in complex cases ♦ Restoring endodontically treated teeth with bonded core composites ♦ Diagnosis of cracked teeth & treatment options ♦ Endodontic retreatment vs. implants—when, where & how to decide

Pediatric Dentistry for GP's: Dr. Cohn shares her daily practices, instruction on behavior management, restorative options and many of the “everyday questions” that parents ask, the latest trends in decay management, and a plethora of preventative strategies and restorative techniques applicable to GPs. Attendees will learn how to: complete an examination for infant, toddler and school aged children and effectively manage kid's and parental behavior ♦ recognize the stages of dental disease ♦ use a risk assessment tool ♦ prevent caries from progressing ♦ provide different restorative options

The Esthetics of Implants: Implant, abutment and final restoration selection all play a vital role to the success of implant treatment. The seminar covers proper impressioning techniques, lab communication, abutment selection, provisionalization, tissue management and prosthetic design ♦ Learn easy techniques to implement in your practice.

Hands-On Cosmetic and Conservative Restorations: (An additional fee is required for this course) This course will discuss choices for successful restorative care and lets you practice hands-on to improve your direct restorations with composites. The premise of the course is “additive” dentistry where one preserves tooth structure versus “subtractive” dentistry where there is often too much tooth structure removed.

YOU WILL LEARN HOW TO:

- Perform an efficient comprehensive live patient evaluation for best esthetic and therapeutic outcomes
- Understand the indications and contraindications for these treatments and techniques
- Locate the ideal anatomical sites and injection depths as they relate to the pericranial anatomy of the head and neck
 - Understand the physiology and pharmacology of facial injectibles
 - Implement these treatments into your comprehensive treatment plans
 - Apply safety, risk and side-effects of botulinum toxin and Hyaluronic acids
- Combine botulinum neurotoxin and dermal filler therapy with dental therapeutic and esthetic treatment plans
- Understand Botulinum toxin therapeutic treatment of migraines, TMD, facial pain and parafunctional clenching cases
 - Know when not to use Botox with bruxers
- Smooth lip lines and eliminating vertical "smokers" lines - determining whether Botox or fillers are ideal
- Learn the best dilutions for the different anatomical structures that result in better facial esthetics
 - Prevent and treat adverse reactions
- Diagnosis, treatment planning, dosing and delivery of neurotoxins and fillers
 - Sell, bill and be paid for these treatments
- Complete proper patient documentation and informed consent (see link - www.dentox.com - for your practice)
- Compare the differences in malpractice liability insurances and which to choose - this course helps you qualify
 - Observe many model patients during the day
 - Recognize and treat 6 different types of gummy smiles and chin profiles
 - Use Botox for myogenic diagnoses and as a pharmaceutical dental splint
 - Use the beneficial effects of dental therapies on facial esthetics
- Control the pull on the periosteum following periodontal and implant procedures - the perio splint
 - Frame your cosmetic dentistry with beautiful, youthful smiles and faces
 - Accelerate orthodontics and implant integration by controlling clenching
