

The logo features the text "XCEL SEMINARS" in a bold, black, sans-serif font, centered within a yellow oval. This oval is surrounded by a thick, yellow rope that forms a rectangular border with rounded corners. The rope has a detailed braided texture and is set against a solid brown background.

# **XCEL SEMINARS**

## 5th Annual Comprehensive Dental Skills Series

Crowne Plaza San Jose/Silicon Valley

### **Aug. 19, 2012: Updates and Advances In Anesthesia - Including Medical Emergencies**

*Dr. Sean Boynes is a practicing dentist, expert witness, professor, author and expert on anesthesia in relation to dental procedures.*

### **Sept. 30, 2012: Comprehensive Clinical Perio for GPs**

*Dr. Jon Suzuki is one of the premier periodontists in the country, Director of Graduate Periodontology and Oral Implantology at Temple University, former Dental School Dean at the University of Pittsburgh and lectures internationally.*

### **Oct. 14, 2012: Treatment Planning, Techniques & Materials for Cosmetic Dentistry**

*Dr. Leonard Hess lectures for the Dawson Academy on occlusion, smile design, treatment planning, preparation design, and comprehensive dentistry.*

### **Nov. 4, 2012: Pediatric Dentistry, Minor Ortho and Treatment of Traumatic Injuries**

*Dr. Fred Margolis is a pediatric dentist, an expert on pediatric care, and has been named a "Top Clinician in Continuing Education" by Dentistry Today Magazine.*

### **Dec. 2, 2012: Restorative Techniques & Materials Update**

*Dr. Jeff Brucia is in private practice, an Associate Professor at the University of the Pacific and is the Present Chair of the California Dental Association Board of Managers.*

#### **CROWNE PLAZA SAN JOSE/SILICON VALLEY**

**777 Bellew Drive, Milpitas CA** (Minutes from the 880, 680, 101 & 237 Fwys)

**All Courses are on Sundays 8AM - 4PM (7CA & AGD CEs)**

**5 COURSE SERIES (35 CA & AGD CEs)  
FOR ONLY \$525 OR \$175 EACH**

**BONUS  
HANDS-ON  
PEDO COURSE:  
ONLY  
\$229**

**Dec. 16, 2012, Hands-on Pediatric Restorations - Dr. Carla Cohn**

COURSE SERIES

## COURSE TOPICS

**Anesthesia Updates:** Dr. Boynes will comprehensively cover anesthesia, including maintaining the standard of care (drawing upon his extensive experience as an expert witness and clinician) and preventing poor outcomes in your practice, review of current and advanced techniques available to providers and an overview of the new materials, agents, protocols, and practice techniques used in dental anesthesia, including: Appropriate responses and management of adverse events ♦ Emergency management protocols and effective preventive strategies ♦ Basic techniques for safe and effective administration for the injections discussed ♦ Fundamental approaches to pain free injection techniques ♦ The development and implementation of the dental team anesthesia administration approach ♦ New research and agents that impact the practice of anesthesia in dentistry.

**Comprehensive Perio for GPs:** The course will discuss advances in periodontal diagnosis and treatment planning, for more predictable therapies. Topics will include: Ultrasonics ♦ Selective use of systemic antibiotics ♦ Local drug delivery systems ♦ Concepts of periodontal and implant surgeries, including regeneration ♦ Case presentations of non-surgical and surgical periodontal therapies, implant, site preparation and ridge preservation surgeries.

**Cosmetic Dentistry:** Dr. Hess will cover cosmetic cases from start to finish, including: esthetic smile design, determining proper functional incisal edge position, material selection (including the latest innovations in composite and dentin replacement materials), anterior guidance and envelope of function, keys to photography, and lab communication ♦ Dr. Hess will cover larger restorative cases with both indirect restorations and anterior composite restorations including interdisciplinary cases.

**Pediatric Dentistry, Minor Ortho and Treatment of Traumatic Injuries:** Today's parents demand the best restorations of their children and teen's teeth for function and esthetics. Discussions will include: Glass ionomers, resinomers, composites, and various types of crowns ♦ Esthetic facings for stainless steel crowns and chairside/lab steps ♦ When space maintainers are indicated and their easy fabrication of removable and fixed appliances, including a reference chart of when space maintainer are indicated for each development stage ♦ Band seating, band removing and band cementation. ♦ Enamel microabrasion, direct-bonded and porcelain veneers for teenage patients ♦ Learn how to "numb" a tooth in 30 seconds, perform gingivectomies, frenectomies, fibroma excisions, crown lengthening, troughing for crowns and bridges. etc. with a laser—no shots ♦ Review of traumatic injuries and their treatments, including pulp therapies ♦ Invulsions, dislocations, avulsions and the Ellis Classification of injuries ♦ Radiographic techniques for hard and soft tissue injuries ♦ The protocol for reimplantation of permanent incisors, including splinting mechanisms ♦ The dark primary incisor and treatment of trauma to primary teeth.

**Restoratives Update:** It is estimated that more than 80% of restorative failures are due to clinical error. This lecture course provides an overview of the restorative options you should be considering today as well as a comprehensive discussion of the ever-changing world of dentinal adhesives, guiding you through the collection of materials and techniques available for both direct and indirect restorations, including: The options available in adhesive systems including the new advancements in Glass Ionomers ♦ Eliminating the frustration of post-operative sensitivity and restorative failure ♦ The materials and techniques for Class I, II & V restorations ♦ Techniques and materials for repairing porcelain fractures ♦ Achieving predictable esthetic results with anterior implants ♦ Techniques for the preparation, impressions, temporization, lab communication, material selection and cementation of indirect restorations.

**Hands-On Pediatric Restorations** (An additional fee is required for this course) Kids comprise both the life and the growth for your practice. This course will give you practical points on how to treat your little patients well, discussing preventive protocols and current materials available for restorations. Both anterior and posterior esthetic options will be included. Pre-veneered crowns, glass ionomers, and composites will be highlighted. Participants will have the opportunity to use the most outstanding restorative materials available today. You've heard it before - treat the kids well and your practice will soar. Learn to keep the kids and their parents IN your practice. **Hands-on will include:** Preventive tools, including bacterial testing, fluoride varnish, composite and glass ionomer sealants ♦ Glass ionomer and resin modified glass ionomer placement techniques ♦ Composite placement techniques - anterior strip crown and posterior indications ♦ Pulpotomy procedures with dentine replacement materials ♦ NuSmile crown placement - anterior and posterior procedures. ♦ Chair side band and loop space maintainer procedures.

## Dr. Foroud Hakim

Dr. Hakim has balanced private practice and dental education for over 18 years in the San Francisco Bay Area. He has a true passion for restorative dentistry ranging from complex rehabilitation to optimal and conservative single tooth restoration. He is Vice Chair of the Department of Restorative Dentistry at University of the Pacific and is course director for "Occlusion, TMJ & Advanced Restorative Concepts". He is also a director in the "Esthetic and Complex Care Clinic" at Pacific.

Dr. Hakim has lectured nationally in many venues including seminars, continuums and hands-on-workshops on topics ranging from **technology, esthetic dentistry, occlusion, smile design, CAD/CAM, photography, and adhesive and composite dentistry**. Dr. Hakim has several publications and has authored two chapters in the soon to be released book "**Esthetic Dentistry in Clinical Practice**" from Blackwell Publishing.

### **Esthetic Dentistry – "REDEFINING THE CLICHÉ"**

No longer is "esthetics" considered an option, upgrade or election for patients in the contemporary restorative practice; rather, it is an expectation.

Ranging from a simple posterior resin to full smile rehabilitation, the desire for an optimal esthetic outcome is essentially universal amongst patients. Meanwhile, about a decade has passed since the perfect storm of influences, both internal and external to our profession landed us in the middle of the era of "cosmetic dentistry". Since then, several factors including economic turmoil, emerging concepts of "conservative restorative dentistry", the introduction of new materials and technologies, market place demands and realignment of priorities within the profession all have ushered in a new and exciting era for restorative dentistry.

This presentation will provide updates on new materials (direct and indirect) as well as technologies essential to contemporary practice. Special emphasis will be placed on modern techniques and ancillary products that allow practitioners to design and deliver restorative treatment with precision - leading to optimal esthetics, efficiency, productivity and doctor and patient satisfaction.

Topics covered:

- Adhesive advancements and bonding
- Impressions yesterday, today and tomorrow
- Direct resin restorations
- Indirect ceramic options
- Treatment planning and design
- Latest product entries and technologies costing under 10K
- Pre prosthetic orthodontics to optimize restorative results (Invisalign)
- Developing esthetic restorations while respecting tooth structure
