Sunday, September 16, 2012 Registration 7:00 am to 8 am
Program: 8:00 am to 5:00 pm

Embassy Suites Hotel-Anaheim South, 11767 Harbor Blvd., Garden Grove, CA 92840
Phone: 714-539-3300 8 CE Units

Free Parking Continental Breakfast Fabulous Buffet Lunch

The modern restorative dental practice today is rapidly converting to modern industrial type CAD/CAM systems that will produce quality restorations whose contours and harmony with the other teeth in the mouth can be controlled by the doctor, a trained staff member or a dental technician, often while the patient sits and watches TV or reads a magazine, eliminating the need for temporary crowns. Moreover, if you place your own implants (you should learn to do this) you will be able to easily fabricate, by machine and CBCT, surgical placement guides that can eliminate error, improve accuracy and increase your office production efficiency. Dr. Patel's honorarium today is being provided jointly by SCAGD and Sirona.

Dr. Neal Patel is a graduate of Ohio State University where he earned degrees in both molecular genetics and dentistry. Having excelled in the arts, he chose dentistry as a career that would allow him to combine his artistic passion with his scientific training. After completion of an implant prosthodontic fellowship under world-renown prosthodontist, Dr. Edwin McGlumphy, Dr. Patel helped to train oral maxillofacial surgeons in the field of 3-D imaging, computer-generated guided implant surgery and the art of steriolithography in dental applications. In addition to his high-tech private practice in Powell, Ohio, Dr. Patel travels internationally, sharing his perspective on cutting-edge 3-D cone beam radiographic technology and its practical applications. This audience will learn how to integrate cone beam computed tomography (CBCT) into their practices to improve their patient care.

The Registration Form and Additional Information are on the Other Side

The logo consists of a thick, dark brown background. A yellow rope with a black outline is coiled into a rectangular shape with rounded corners, framing a central yellow oval. The text "XCEL SEMINARS" is written in a bold, black, sans-serif font across the center of the oval. The rope has frayed ends at the top and bottom, suggesting it is a lasso or a similar tool.

XCEL SEMINARS

4th Annual Comprehensive Dental Skills Series

The Knott's Berry Farm Resort Hotel

Aug. 26, 2012: Updates & Advances In Anesthesia - Including Medical Emergencies *Dr. Sean Boynes is a practicing dentist, expert witness, professor, author and expert on anesthesia in relation to dental procedures.*

COURSE TOPICS

Anesthesia Updates: Dr. Boynes will comprehensively cover anesthesia, including maintaining the standard of care (drawing upon his extensive experience as an expert witness and clinician) and preventing poor outcomes in your practice, review of current and advanced techniques available to providers and an overview of the new materials, agents, protocols, and practice techniques used in dental anesthesia, including: Appropriate responses and management of adverse events ♦ Emergency management protocols and effective preventive strategies ♦ Basic techniques for safe and effective administration for the injections discussed ♦ Fundamental approaches to a pain free injection techniques ♦ The development and implementation of the dental team anesthesia administration approach ♦ New research and agents that impact the practice of anesthesia in dentistry

Perfecting Your Restorations: This seminar will help you plan the materials, techniques and procedures for optimal clinical success with adhesives, composites and ceramic restorations, based on the most current scientific evidence, including: How the tooth location and preparation configuration determines the adhesive system, composite materials and placement technique utilized ♦ Factors most affecting successful or failed clinical results ♦ Describe treatment planning and material choice for Class I, II and V restorations ♦ Application techniques for improving long term durability of dentin bonding, reducing polymerization shrinkage and contraction stress, micro-leakage, and eliminating post-operative sensitivity for etch and rinse adhesives and self-etch adhesives ♦ Describe the controlled placement and delayed polymerization technique for optimum long term results of direct posterior restorations ♦ Proper treatment planning for anterior and posterior esthetic ceramic restorations ♦ Step-by-step prep techniques for all ceramic crowns, inlays and onlays ♦ Impression techniques for simplified retraction and hemostasis ♦ Simplified provisionalization for indirect restorations ♦ Lab considerations for all ceramic inlay, onlay and crowns-how to direct your lab to produce better fitting margins

OSHA, Infection Control and the CA Dental Practice Act: This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, the California Dental Practice Act and Infection Control.

Practical Endo: This seminar will discuss the latest practical information regarding endodontic diagnosis, treatments, new game-changing materials and files and a plethora of cases that attendees will discuss in an interactive format, including: What is affecting treatment outcomes? ♦ Rational, evidence-based case selection ♦ Endo-perio interrelationship ♦ Procedural errors and their prevention ♦ Dentine replacement materials and its many applications in complex cases ♦ Restoring endodontically treated teeth with bonded core composites ♦ Diagnosis of cracked teeth & treatment options ♦ Endodontic retreatment vs. implants—when, where & how to decide ♦ The latest on canal irrigation techniques.

Comprehensive Perio for GPs: This course will emphasize advances in periodontal diagnosis and treatment planning, for more predictable non-surgical and surgical therapies. Topics will include: Ultrasonics ♦ selective use of systemic antibiotics ♦ local drug delivery systems ♦ concepts of periodontal and implant surgeries, including regeneration ♦ case presentations will include non-surgical and surgical periodontal therapies, implant, site preparation and ridge preservation surgeries.
