

PINHOLE SURGICAL TECHNIQUE

Root Coverage Transformed: No Incisions, No Sutures, No Grafting Ten Teeth in One Hour

Gingival Recession

Patented PST instruments
Raising and advancing flap

Collagen placed with PST
patented Chao pliers

Flap fixated with no sutures

Root coverage has been transformed by the advent of the Pinhole Surgical Technique (PST)^{TM*}. PST has been described as needing **no incisions**, **no sutures**, and **no grafting**. PST is virtually painless and gives instantly pleasing results. Quick healing follows PST. Any tooth can be treated with PST. **Ten or more teeth can be treated in one hour.** One Pinhole used for up to 6 teeth.

A 33-month study published in the *International Journal of Periodontics and Restorative Dentistry* concluded that "PST may be deemed a predictable, effective, minimally invasive, and time- and cost-effective alternative to FCTG [graft] techniques for obtaining optimal patient based outcomes." (*International Journal of Periodontics and Restorative Dentistry* 2012: 32: 521-531)

I invented, patented and published this method* and instruments** in *The International Journal of Periodontics and Restorative Dentistry*.

I want to share the benefits of this breakthrough, peer reviewed method with you.

For abstract and further information, such as news clips, videos, and animation please visit me at: www.PinholeSurgicalTechnique.com

PST has caught the attention of local and national media.

So far, 14 TV stations, including KABC, Los Angeles, have featured PST as a desirable alternative to traditional grafting methods.

Many dentists from across the country will be attending these seminars which will be held at my office.

THE PINHOLE SURGICAL TECHNIQUE^{TM*}

Doxa

COURSE TOPICS

Minor Ortho and Appliance Therapy (Lecture): Dr. Veis will teach how to add interceptive orthodontics for children and appliance therapy minor tooth movement to your cosmetic cases, including: Helping children with simple space maintenance, anterior crossbites, posterior crossbites and eliminating bad habits from causing malocclusion ♦ Recognize the stages of dental disease ♦ Techniques to fix anterior crowding ♦ Minor tooth movement and veneers ♦ An easy 6 month braces technique ♦ Keeping patients by making final retainers ♦ New proven to control periodontal disease

Modern Ceramic Restorations (Lecture): With the explosion in ceramic material choices in today's indirect restorative arena, practitioners often find themselves puzzled about what type of crown to prescribe for a given indication. Special emphasis will be placed on strategies and techniques that lead to optimal outcomes with regards to quality, while increasing speed and productivity. Real strategies will be provided to the audience to maximize the efficiencies in their crown and bridge practice while delivering long lasting and beautiful restorations that increase patient satisfaction! The course aims to demystify the selection criteria. The audience will learn: current ceramic classes ♦ selection rubric ♦ indications across anterior, posterior, single and multi-unit ♦ preparation design ♦ full-proof impression techniques ♦ cementation vs. bonding rational ♦ modern supportive armamentarium and gadgetry

Restoratives Update (Lecture): It is estimated that more than 80% of restorative failures are due to clinical error. This lecture course provides an overview of the restorative options and a comprehensive discussion of the ever-changing world of dentinal adhesives, guiding you through the collection of materials and techniques available for both direct and indirect restorations, including: The options available in adhesive systems including the new advancements in Glass Ionomers ♦ Eliminating the frustration of post-operative sensitivity and restorative failure ♦ The materials and techniques for Class I, II & V restorations ♦ Techniques and materials for repairing porcelain fractures ♦ Achieving predictable esthetic results with anterior implants ♦ Techniques for the preparation, impressions, temporization, lab communication, material selection and cementation of indirect restorations.

Hands-on Pediatric Restorations: Today's parents demand the best restorations of their children and teen's teeth for function and esthetics. Discussions will include: Glass ionomers, resinomers, composites, and various types of crowns ♦ Esthetic facings for stainless steel crowns and chairside/laboratory steps ♦ Esthetic space maintainers and their easy fabrication ♦ Enamel microabrasion, direct-bonded and porcelain veneers for teenage patients. **Hands-on will include:** Class I and II primary molar prep ♦ Class I and II primary molar restoration ♦ Pulpotomy prep and use of dentin replacement materials ♦ Stainless steel crown preparation ♦ NuSmile crown preparation- molar

Sleep Medicine (2-Day Hands-On Course): **Dec. 8 Topics include:** Introduction to sleep - sleep stages, disorders ♦ Prevalence - why is there a need for treatment? ♦ Sleep apnea signs/symptoms/clinical issues ♦ Treating snoring and sleep apnea in a dental office - protocol review ♦ Patient education; addressing key issues and getting a snoring patient to convert to a sleep apnea treatment case ♦ Prepare Embletta X100 home sleep study for course attendee(s) **Dec. 15 Topics include:** Download previous week's Embletta X100 study, review study data and sleep report with class ♦ Hands on with Pharyngometer / Rhinometer ♦ Working with popular oral appliances like the TAP, Respire, EMA and more! ♦ Appliance review - pro's and con's of all of the major sleep appliances ♦ Medicare and Dental Sleep Medicine. What's it all about and how can this be a benefit to my practice? ♦ Medical insurance billing "From A to Pay" with a review of the latest codes, fees, procedures and recommendations, covering protocols for both private pay medical insurance and Medicare.

SPEAKERS

Dr. Jon B. Suzuki, DDS, PHD, MBA

Presidential Appointment as Professor of Microbiology and Immunology in the School of Medicine and Professor of Periodontology and Oral Implantology in the School of Dentistry at Temple University, Philadelphia, PA. USA. Associate Dean for Graduate Education. Director of Graduate Periodontology and Oral Implantology at Temple University. He has been Dean of the School of Dental Medicine at the University of Pittsburgh and Chief of Hospital Dentistry, UPMC Presbyterian University Hospital.

Dr. Dennis Smiler, DDS

Dr. Dennis Smiler is an internationally recognized expert in implant dentistry and bone grafting and has presented hundreds of lectures worldwide. He is considered to be among the finest and most popular teachers of implant dentistry in the world. He has trained and mentored numerous general practitioners and specialists in the art and science of implant placement techniques and bone graft surgery, some of whom are now recognized as experts and are teaching their own courses. As one of the first to establish an international implant seminar and the implant team concept, Dr. Smiler has been teaching implant dentistry and bone grafting for over 25 years.

Dr. Stephen Kallaos, DDS

Dr. Stephen Kallaos received his Bachelor of Science degree in Biology and Doctorate of Dental Surgery from the University of California, Los Angeles. He completed his specialty certificate in Periodontics from the University of California, San Francisco, with extensive training in implant surgery, oral medicine, intravenous conscious sedation and surgical periodontics. Dr. Kallaos is a Diplomate of the American Board of Periodontology and carries a permit from the state of California in conscious sedation. He maintains a private practice in Moreno Valley, California.

Dr. Luiz Ruiz, DDS

Dr. Ruiz is the Director of the Los Angeles Institute of Esthetic Dentistry and Course Director of numerous CE Courses at the University of Southern California (USC). He is Honorary Clinical Professor at Warwick University in England and a member of the editorial board for Dentistry Today. He is also an Associate Instructor at Dr. Gordon Christensen PCC in Utah & independent evaluator of dental products for CR (CRA). He has been named as one of the "Top Clinicians in CE 2006-2011" by Dentistry Today. Dr. Ruiz has been practicing in the studio district of Los Angeles for over 20 years and enjoys a clientele of many stars and entertainers. His focus is on treating complex Cosmetic, Rehabilitation, and Implant cases.

Dr. Shervin Molayem, DDS

Dr. Molayem received his Bachelor's degree from UCLA. He continued his education at the prestigious UCLA School of Dentistry for his Doctorate of Dental Surgery degree. He completed a rigorous 3 year specialty program in Periodontics and Implant Surgery at the USC School of Dentistry. He is the Founder of both the UCLA and USC Journals of Dental Research. Additionally, he has presented his research on Immediate Implants nationally and lectured internationally on topics of periodontics and dental implants. Recently, the California Society of Periodontology awarded Dr. Molayem with the Straumman Research Scholarship Award. He is a course instructor for Hiossen's AIC Implant Training courses and Sinus Lift Seminars.

Dr. Eugene Kim, DDS

Dr. Eugene Kim received his Doctorate of Dental Surgery degree and Certificate in Advanced Prosthodontics from the University of California at Los Angeles, School of Dentistry, where he held a part time teaching position from 2001 to 2006. He is one of the founders and director of the Comprehensive Dental Academy in Southern California, director of numerous implant education courses including AIC Implant Training Courses and director of many other CE courses. He maintains a private practice limited to prosthodontics and implant dentistry in Buena Park, California.

Dr. Jone Kim, DDS, MS

Dr. Jone Kim, DDS, MS, was raised in Anaheim, California. He began his undergraduate studies at UCLA and graduated from the UCLA School of Dentistry in 1994. He then went on to residency in Oral & Maxillofacial Surgery at the University Medical Center in Fresno (affiliated with UCLA), graduating in 1998. While he was in residency he received his Master of Science degree in Oral Biology from UCLA's graduate school in 1996. His Master of Science thesis earned him resident research awards from both the American Association of Oral & Maxillofacial Surgeons and the American College of Oral & Maxillofacial Surgeons.

How To Use Botox Therapy in Your Dental Practice

Speaker-Instructor: Andrew Blumenfeld, MD

Introductory Presentation by John S. Bettinger, DDS, Past-president of
The Dental Board of California

Sunday, September 15, 2013 Registration 7:00 am to 8 am

Program: 8:00 am to 5:00 pm

Embassy Suites Hotel-Anaheim South, 11767 Harbor Blvd., Garden Grove, CA 92840

Phone: 714-539-3300 8 CE Units

Free Parking Continental Breakfast Fabulous Buffet Lunch

Botox therapy has many uses in dentistry. Your California dental license permits you to treat various dental related conditions by injecting botulinum toxin (Botox). This course will cover the uses and instructions for botulinum toxins, their history, dosage preparation and injection techniques for a variety of dental related procedures. These include: TMJ pain and muscle spasms, bruxation therapy, lip and masseter muscle smile contour, and treatment of associated migraines. Informed consent and the risks, benefits and alternatives (RBAs) will also be included in this course. The entire office team should be able to convey this information to patients

Andrew Blumenfeld, MD, is a neurologist and the director of the Headache Center of Southern California, located in San Diego. He is the Co-director of the Sleep Center of Southern California and a partner in the Research Center of So. Calif. in Oceanside.

Dr. Blumenfeld is chair of the American Headache Soc. Special Section: Peripheral nerve block and other interventional procedures for headaches and facial pain. He served as Chief of Neurology at Kaiser Permanente in San Diego and was the chairman of the bioethics committee. Dr. Blumenfeld has published and taught the use of Botox to health care providers including dentists nationally and internationally and has been treating patients with Botox since 1990.

Botox Therapy in Dental Practice

At this meeting you will learn the following:

1. Introduction to botulinum toxins, where they come from, how they work, are they toxic?
2. Historic development for therapeutic uses of botulinum toxins, more than a cosmetic treatment.
3. Botulinum toxins in migraine, a trigeminal nerve disorder and often dental related.
4. Botulinum toxins in TMJ dysfunction: myogenic and trigeminal nerve modulation.
5. Botulinum toxins in shaping the lips and masseter muscles for smile improvement.
6. Reconstitution of of Botox vials, getting ready for injections, what you need to have.
7. Dilution, dosing and injection sites to accomplish various dental cosmetic results.
8. Informed consent and patient pre-treatment discussions about risks and benefits.
9. Injection sites for migrane, TMJ dysfunction and dental cosmetic improvement.

**Every attendee will receive a syllabus covering this entire course
Included with the Tuition**

One-on-One Private Implant Dentistry Mentorship

The future of dentistry is in your hands!
Make headway with Implant dentistry...

63 CE

GLOBAL • DENTAL • IMPLANT • ACADEMY

The One-on-One Mentorship™ Training in Implant Dentistry

The One-on-One Mentorship™ Program

One-on-One Dental Implant training program is design for clinicians with a minimal exposure and interested in advancing in the field of implant dentistry. The One-on-One mentorship program offers a team of qualified faculties for you to choose from. Along with the private mentor, the participating clinician will also have access to innovated lectures given by our GDIA directors and special guest lecturers throughout the year. This private mentor program training consists of 9 Modules and participants will receive **63 CE** units from the California Dental Board at time of completion.

Detailed course description [9 full days of training]:

[1-2 Modules] All day lectures

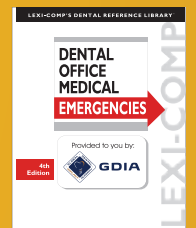

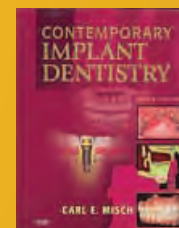

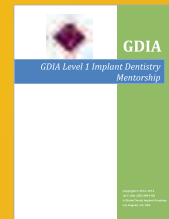

[3-8 Modules] Total of 6 full-days of clinical case mentoring on: x-ray, treatment planning, case selection and hands-on live patient surgery.

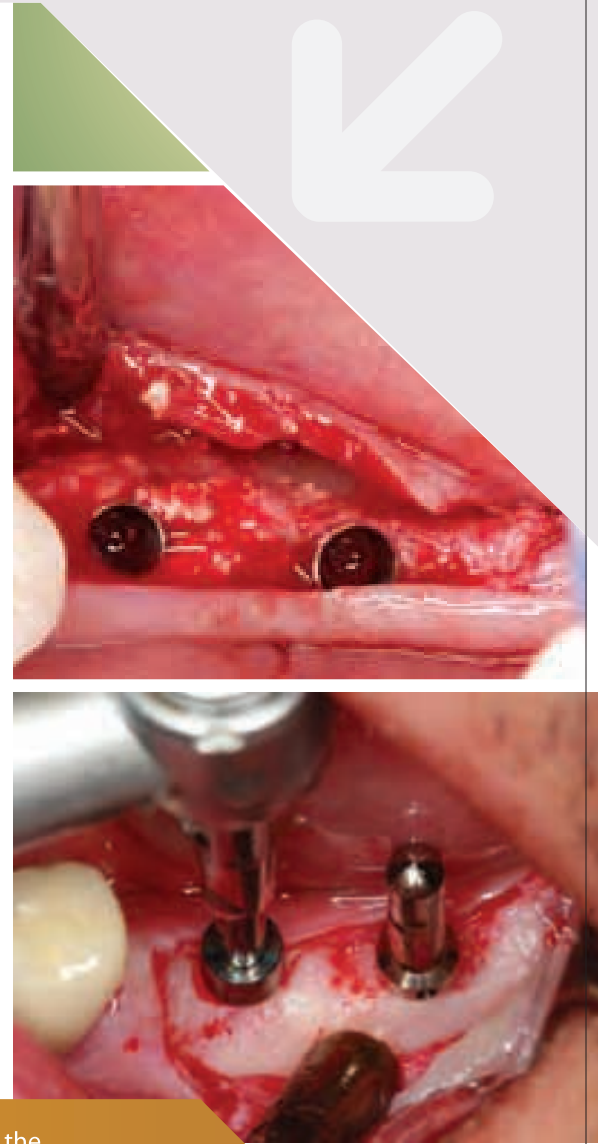

[9 Modules] Lecture: "Incorporating dental implants to your everyday practice" all office staffs welcome!

**Participants of One-on-One Mentorship program are encouraged to charge patients for dental implants placed.

Benefits of Participants

- 1) Certificate of Completion from GDIA
- 2) Program Handbook & Study Guide
- 3) Textbook:
 - Contemporary Implant Dentistry 3rd Ed. by Carl E. Mish (a \$187 value)
 - Dental Office Medical Emergencies 4th Ed. by Lexi-Comp (a \$67 value)
- 4) One year membership for International Congress of Oral Implantologists (ICOI - a \$350 value)
- 5) One year membership for GDIA (a \$295 value)

The One-on-One Mentorship™ Program

This "One-on-One" advanced on-site implant training program offers 64 CE units from the California Dental Board. "One-on-One" training program is integrated with didactic, clinical observation, and hands-on surgery. This program consists of 9 days of hands-on implant training, where an on-site qualified GDIA mentor will guide and supervise live-implant surgery as needed. In addition, the participating office staffs will enhance knowledge in patient care implant procedure and implant equipment set-up and handling, giving you the essential skills and knowledge for a successful future in implant dentistry!

Course Outline

Module 1 & 2	2 full day sessions of didactic course
Module 3 - 8	6 full days of clinical case mentoring, including hands-on, live patient care (surgery and restorative sessions) with the GDIA Mentor
Module 9	1 day team session "incorporating dental implants to everyday practice"

Course Description

The 'Hands-On Live Patient Surgery' course is an advance session that will cover Maxillary Sinus Augmentation, Guided Bone Regeneration (GBR), and Soft Tissues procedures. This program is open to clinicians with previous exposure to implant dentistry. Participants will receive **14 CE Units** from the California Dental Board at time of completion. All hands-on cases are selected and pre-screened by GDIA faculty members before date of surgery. All surgical materials and instruments will be provided. Each participant is expected to see as many patients in the time allocated. This course will be held in Tijuana, Mexico and requires 3 nights stay. Participants are responsible for check-in at San Diego and transportation from San Diego to Tijuana will be provided. Lodging and meals will be provided in a safe and comfortable hotel facility.

Course Schedule

Day 1 Friday

- 5:00PM Meet at San Diego International Airport.
Travel across the border to Tijuana via transportation provided by GDIA
- 7:00PM Check-in at hotel, and orientation begins after dinner

Day 2 Saturday

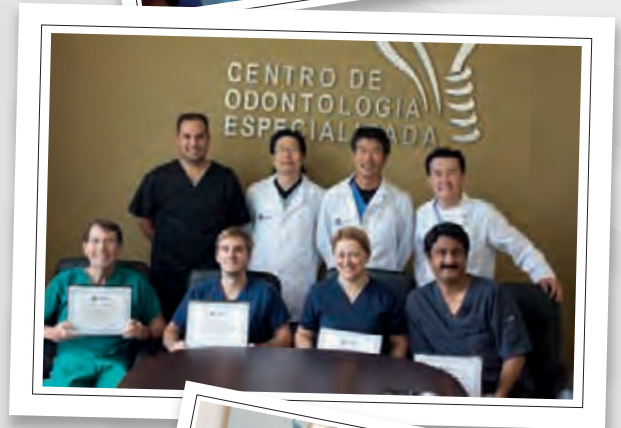

- 7:00AM - 8:00AM Breakfast
- 8:00AM - 9:00AM Introduction : Surgery Planning
- 9:00AM - 12:00AM Surgery
- 12:00PM - 1:00PM Lunch
- 1:00PM - 5:00PM Surgery
- 5:00PM - 6:00PM Back to hotel
- 6:00PM - 8:00PM Dinner & Surgery case review

Day 3 Sunday

- 7:00AM - 8:00AM Breakfast
- 8:00AM - 9:00AM Introduction : Surgery Planning
- 9:00AM - 12:00AM Surgery
