The logo consists of a thick, dark brown background. A yellow rope with a black outline is coiled into a rectangular shape with rounded corners, framing the central text. Inside this rope border is a yellow oval with a white outline. The text "XCEL SEMINARS" is written in a bold, black, sans-serif font across the center of the oval. The word "XCEL" is on the left and "SEMINARS" is on the right, with a space between them.

COURSE TOPICS

Crown Lengthening and Tissue Grafting: *Crown Lengthening and soft tissue grafts are some of the most commonly required procedures to enhance restorative results, yet they are often underutilized. This course provides evidence based concepts and practical applications for both modalities and how they WILL enhance your restorative results. Crown length concepts include:* How to handle uneven gingiva in the anterior region; ♦ Getting predictable impressions EVERY TIME; ♦ Preservation of esthetics in the final tissue contours; and relocation of all structures that comprise the biologic width, namely: sulcus, junctional epithelium, connective tissue fibers, and bone ♦ Coordinating restorations with surgical interventions. Grafting concepts include: ♦ Having the gingiva stay in place by the margins of newly placed esthetic crowns How Gingival Grafts will create zones of attached gingiva providing a predictable way to stop recession from progressing ♦ How Connective Tissue Grafts can achieve root coverage in cases of severe recession, especially in the maxilla where esthetics are important

Restorative Trends: *Modern dentistry is ever changing with new materials and techniques. Long held beliefs may not always be accurate and it is difficult to decide which to implement. With our aging population it is also important to use age-appropriate restorative materials. His subjects will include:* review the development of dentin bonding agents and understand the challenges including post operative sensitivity, MMPs, aprismatic enamel and hydrolyzatio ♦ Review the improvements in composites including pre-polymerized, glass ionomer, spherical, and nano fillers and new resin polymers ♦ Updated pulp capping protocols ♦ New products that improve patient- new tooth whitening systems, anesthesia buffering solutions, sonically activated composite systems, and resin infiltrated micro-invasive techniques ♦ Crown and bridge materials that simplify treatment ♦ Innovative smile design to predictably produce esthetic smile outcomes

OSHA, Infection Control and the CA Dental Practice Act (Lecture): This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, the California Dental Practice Act and Infection Control.

Hands-on Composite Restorations: Esthetic, Versatile, Simple & Cost Effective: *Learn how to do life-like composite restorations efficiently and cost effectively while using versatile materials and minimal inventory, including:* Produce composite fillings that are esthetic and fast ♦ minimize inventory by managing the materials used ♦ Using materials that have solid studies backing them. ♦ Decrease post-operative sensitivity. ♦ Appropriate materials for high caries-risk patients. ♦ Tips on improving the quality, speed and beauty of your daily procedure. ♦ Managing polymerization shrinkage stress. **Hands on will include:** Proper bonding techniques latest generation materials ♦ Achieving predictable, reliable Class II interproximal contacts ♦ Selecting & placing the proper restorative material for any situation. ♦ Understand the rationale for selecting Class V materials

Pediatric Dentistry for GP's: *Are you overwhelmed with angst when you know children will be coming to your office? The presentation will address topics such as behavior management, anesthesia, sealants, esthetic restorative dentistry, pulp therapy and space maintenance generally without use of high tech and expensive gadgets. It will also include a segment on medical emergencies. Objectives include:* Understand and utilize esthetic and resin based materials in restorative techniques ♦ treatment plan and utilize appropriate dental materials for maintenance of a devitalized primary tooth and immature permanent tooth ♦ understand the importance and options for space maintenance in the primary and mixed dentition ♦ Identify medical and sedation emergencies in children ♦ Develop an appropriate emergency kit and emergency protocol ♦ Identify risk factors for pediatric patients based upon their unique anatomy, physiology and childhood diseases

Endo for GPs: *This course provides techniques, tips, and tricks to increase endodontic confidence and mastery, including:* Endodontic diagnosis and pulpal testing, case selection, and anesthetic associated with a "hot" tooth Irrigation protocols during negotiation, instrumentation, and prior to obturation ♦ Discuss in detail access, coronal negotiation, coronal flare, negotiation to working length, obtaining an accurate working length, and an open glide path ♦ Nickel-Titanium rotary and reciprocation files ♦ Sealer and obturation of the root canal system ♦ Post-op instructions and pain management

Achieving Composite Success: *This course will review the very latest products and techniques that truly will allow you to take a refreshed look at composite procedures and ensure your long term success, including:* Understanding and solving the top three reasons why sensitivity does occur and how easy they are to resolve ♦ How lights, glass ionomers and composites all fit together to ensure long lasting asymptomatic restorations ♦ The very latest in caries removal, single tooth anesthesia, low shrink/stress composites and how these will all change your approach to composites ♦ Case-by-case examples of Class I, II, IV, V, composites and the very latest on sealants ♦ Anterior combination casework that combines direct and indirect approaches with lab communication tools, all with the philosophy of "Conservative Dentistry"

REGISTRATION

TUITION	6 COURSE SERIES	EACH INDIVIDUAL COURSE
More than 14 days before an event	Dentist: \$499 , Staff: \$329 Add \$229 to attend the Hands-on Course	Dentist: \$139, Staff: \$119 Hands-on Composite Restorations: \$329
Less than 14 days before an event	Dentist: \$519 , Staff: \$349 Add \$249 to attend the Hands-on Course	Dentist: \$159, Staff: \$139 Hands-on Composite Restorations: \$349

Fees include continental breakfast, CE credits and free hotel parking. Registration is at 7:30am, the course is 8am-3:30pm. It is an extra \$20 fee for all onsite and walk-in registrations.

If you haven't learned to place mini implants yet, now is your chance

Raymond Choi, DDS of Tustin, CA, is an expert on mini implant therapy. He will show us why every office should have a mini system immediately available as a profitable solution to most lower denture and partial denture retention problems, and what to look for during oral examination of these patients *before* placing the implants. Dr. Choi has created Mini Dental Implant University (MDIU), an extensive mini implant online clinical video collection to help dentists achieve clinical success.

Robert Phillips, CPA of Santa Ana, CA is an accounting expert with particular knowledge about dental offices and how they should be financially managed as well as how the doctor's business and retirement plans should be structured. SCAGD management has worked with the Phillips Accountancy Corp for almost ten years.

Anita York, Esq. is a partner with the law firm of Scott & Whitehead in Newport Beach, CA and devotes her practice to the representation of employers, including over 100 dental practices. Her counseling practice includes advising employers on personnel issues, policies and practices, as well as the review and preparation of employee handbooks. Ms. York also represents employers in legal disputes brought by former and current employees in issues such as wrongful termination, discrimination, harassment, retaliation and Labor Board claims.
