COURSE TOPICS

Oral Surgery for GPs: *Participants will learn how to properly examine a patient, correct and simplified oral surgical techniques with proper instrument selection and their use, appropriate pre and post op use of medications and other post op considerations, including:* Surgical removal Of Impacted 3rd molars: Maxillary and Mandibular ♦ Surgical removal of erupted molars, erupted 3rd molars and retained roots ♦ Surgical removal of Hyperplastic Tissue and tumors ♦ Surgical removal of Tori: Torus Mandibularis, Torus Palatinus ♦ Surgical exposure of Impacted Cusps: (pre-orthodontic treatment) ♦ Frenectomies: Maxillary labial frenectomies, (pre-prosthetic and pre-orthodontic) and Mandibular lingual frenotomy (ankyloglossia) ♦ What to do when things go wrong and fail. How to solve the problems ♦ The "ART" Mandibular Block. A NEW approach to regional anesthesia involving the Inferior Alveolar Nerve (V3) ♦ Post-Op. Treatment of Dry Sockets.

Improving the Patient Anesthesia Experience: *Dental providers are judged by the pain experienced during patient's care. This presentation covers the patient experience and reviews the new anesthesia agents, devices, and techniques that improve outcomes and build practices, including:* Discuss new research and anesthetic agents that impact the practice of pain management in dentistry ♦ Discuss occurrences and basic management of local anesthesia adverse events ♦ Gain knowledge on new anesthetic products that impact patient outcomes ♦ Discuss basic anesthetic armamentarium with updates in methodology

OSHA, Infection Control and CA DPA: This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, the California Dental Practice Act and Infection Control.

Esthetic Composites and World Class Crown & Bridge: *Improve your direct and indirect restorations with these gems, including:* Step-by-step techniques to create lifelike and morphologically precise direct composite restorations ♦ The use of composite tints to create characterized restorations that rival those produced in the laboratory ♦ A review of indirect restorative materials and options in dental ceramics ♦ A review of prep design and tissue management for perfect impressions ♦ Provisionalization for full coverage and veneers ♦ No prep veneers: A realistic option? ♦ Prosthetic tooth repositioning and "orthodontic" tooth preparation ♦ Minor tooth movement with Essix appliances ♦ Computerized shade matching ♦ Digital impression making ♦ Cementation protocols for provisional cementation ♦ Cementation protocols for total etch and conventional cements: Which materials for which cements ♦ Occlusal adjustment during the cementation process

Pedo and Treating Trauma: *This course will explore the additional skills needed to provide dental care to the pediatric patient including tried and true procedures as outlined below:* Effective use of stainless steel crowns ♦ Necessary and effective pulp therapy ♦ Benefits of bilateral and unilateral space maintainers ♦ How to successfully take an impression ♦ How to diagnose and provide treatment plans ♦ Determine appropriate X-Ray's for young patients ♦ Appropriate use of fluoride ♦ Current options for repairing anterior primary teeth ♦ Understanding of the healing process for trauma and a Step-by-step evaluation approach ♦ Logical evaluation form that reviews extra and intra-oral soft tissues / facial and dental bones / periodontia and tooth structures ♦ Pre-packaged trauma supply list and a listing of the necessary radiographs, clinical tests, specialists referral list and a timetable for follow-up treatment

Endo for GPs: *This course provides techniques, tips, and tricks to increase endodontic confidence and mastery, including:* Endodontic diagnosis and pulpal testing, case selection, and anesthetic associated with a "hot" tooth ♦ Irrigation protocols during negotiation, instrumentation, and prior to obturation ♦ Discuss in detail access, coronal negotiation, coronal flare, negotiation to working length, obtaining an accurate working length, and an open glide path ♦ Nickel-Titanium rotary and reciprocation files ♦ Sealer and obturation of the root canal system ♦ Post-op instructions and pain management

Hands-on Composite Restoration (an additional fee is required for this course): *This program covers the basics to advanced concepts and techniques in composite placement. Time will be allotted to interact with Dr. Hakim and trouble-shoot the resin dentistry challenges attendees encounter daily. Topics include:* Bonding/adhesive review and composite selection ♦ Trouble shooting sensitivity ♦ Anterior vs. posterior and minimally invasive strategies ♦ 3-D color development and shade selection ♦ Layering vs. bulk fill ♦ Contacts and contour ♦ Optimal armamentarium (curing lights, burs for both prep and finish, matrices, placement instruments and gadgetry to increase speed and efficiency) **Hands-On Will Include:** Building an anterior tooth, that replicates nature, through a layering technique ♦ Restore a class II restoration with ideal proximal contact and occlusal contour.
