COURSE TOPICS

Geriatric Care: (Lecture) *The biggest boom in dentistry will be the ever growing geriatric population. What is a geriatric patient? Is it age dependent and the answer is not really! Decisions are often very challenging on what is best for the patient. Treatment planning and case presentations and other highlights are:* Prevention is for all ages and doesn't stop here! ♦ Customizing your approaches for plaque, xerostomia and so much more. ♦ Reparative dentistry, when, where and why and what materials are best to utilize ♦ Grafting decisions and why you need to incorporate these into your practice ♦ Direct restorative materials that are must haves for this group ♦ Indirect options that are essential to understand and how embrasures and margins are age dependent

Direct Composite Experience: (Lecture) *In today's competitive market, many patients are seeking to achieve an esthetically pleasing smile, yet may have limited resources. This program will offer conservative solutions based on clinical fundamentals and the latest technologies and materials, to yield simple, reproducible, and efficient techniques for composite restorations, including:* Use of unique matrices to make composites easier and predictable ♦ Low shrink/low strain composites ♦ Tight interproximal contacts every time in posterior composites ♦ Creating full resin veneers as nice as porcelain ♦ Layering vs. bulk fill ♦ Bases and liners: glass ionomers, flowables, or? ♦ Bonding agents: total-etch or self-etch? ♦ Single appointment fiber-reinforced direct composite bridges ♦ Aesthetic dilemmas: what would you do if this were your patient? ♦ Dental trauma – patient assessment, contemporary management of luxation injuries, treating the avulsed tooth, unique restorative options for the sports-related dental injury ♦ Current status of mouth guards – including fabrication techniques for a custom mouthguard and the performance enhancing appliances ♦ Concussions and dentistry

Hands-On Smile Design and Case Prep: *Behind the artistic elements of smile design are basic objective principles that satisfy the requirements for beautiful smiles. Research has revealed the proportions that are preferred by dentists. Learn how to confidently determine the ideal smile for your patients prior to initiating active treatment and then we will practice Hands-on the techniques necessary for success, including:* Dental Photography is vital for today's practitioner to objectively evaluate, diagnose, and design a smile. In groups, attendees will use the principles taught to photograph and treatment plan cases, using the latest digital cameras hands-on ♦ hands-on crown cementations

Practical Endo: (Lecture) *This seminar will discuss the latest practical information regarding endodontic diagnosis, treatments, new game-changing materials and files and a plethora of new cases that attendees will discuss in an interactive format, including:* What is affecting treatment outcomes? ♦ Rational, evidence-based case selection ♦ Endo-perio interrelationship ♦ Procedural errors and their prevention ♦ Dentine replacement materials and its many applications in complex cases ♦ Restoring endodontically treated teeth with bonded core composites ♦ Diagnosis of cracked teeth & treatment options ♦ Endodontic retreatment vs. implants—when, where & how to decide
