Creating Beautiful Smiles with Functional Stability

Sunday, March 16, 2014 8am to 5pm 8 CE Units

Registration 7:00 am to 8 am

Instructor: Robert G. Rifkin, DDS, Beverly Hills, California

Embassy Suites Hotel-Anaheim South

11767 Harbor Blvd., Garden Grove, California 92840

Robert Rifkin practices in Beverly Hills, the esthetic dentistry “capital of the world,” with a focus on esthetics and comprehensive perio-implant rehabilitation. He studied occlusion with Drs. Peter K. Thomas and Charles Stuart during the `60s to `80s, then esthetics into the `90s. As an international lecturer Bob has spoken on topics such as facial analysis, esthetics on natural teeth & implants and digital photography to enhance your practice. Dr. Bob has created a high degree of case acceptance in one of the most successful practices in the U.S., and his work has been published in several peer-reviewed journals. We can learn much from him. *A 7-minute video of numerous celebrity patients of Dr. Rifkin will be shown to emphasize the importance of what he will be teaching us today.*

The entire dental office team should attend this program in order to improve their communicative skills with patients

At the end of this course participants should be able to:

- Re-create natural e-zone smiling lines by merely reshaping worn incisal edges
- Creating tooth-form esthetic harmony to compliment facial form beauty
- Effectively communicate diagnoses and treatment plans to patients
- Know the importance of “organic atraumatic occlusion” and how to achieve it
- Create occlusal stability and maintain it for a patient’s lifetime
- Recognize occlusal dysfunction and make a correct primary diagnosis
- Take pride in your dentistry and let your patients pass their praise of you around

The Exciting World of General Dentistry

Creating Beautiful Smiles That Have Functional Stability

Robert G. Rifkin, DDS, Beverly Hills, California

Sunday, March 16, 2014

More Information Is On The Other Side Of This Page

Beautiful smiles can be created and maintained by performing a pre-treatment evaluation of all of the contributing factors such as facial-skeletal form, tooth shape and position, incisal contour in relation to the adjacent and opposing teeth, lip contour and position. Then there is the factor of organic occlusion. Does the patient have an anterior/canine guidance mechanism? Do the posterior teeth contact and interfere in lateral movements? Is there a harmful "molar guidance" present? How do you recognize these conditions? Do you need stone models to do this? What does the California Dental Practice Act require about forming a diagnosis, then a treatment plan? Have these patients carefully observed their own mouths before you render treatment?

All Credit Card Information is Safe and Secure with the SCAGD

Fax this completed form to SCAGD at 310-472-6729

RUIZ DENTAL SEMINARS

LOS ANGELES INSTITUTE of Clinical Dentistry &

RUIZ DENTAL SEMINARS

THE MOST PROGRESSIVE INSTITUTE IN DENTISTRY

Established 2005

*Learn Why So Many Dentists Are Choosing The
LA Institute Over Dawson, Spears, Kois And Pankey!*

*“Excellent course, as good as the Frank Spears course I took
at half the price and you simplify it a lot more.”*

Dr. Jay Kansal, DMD, Atlanta, GA

*“Absolutely the best course I've ever taken. Good Job! Thank you.
And you could NOT DO BETTER in this course. This is it!”*

Georgia Radfar, DDS, Kois Graduate Calabasas, CA

*Learn Supra-gingival Minimally Invasive Restorative Dentistry...
Onlays... Veneers, It Will Change Your Dental Life.*

Mechanically retained full crowns ruled dentistry for a century.
this is a new century and full crowns are old news.
learn from one of the leaders in this field how to succeed
using supra-gingival minimally invasive onlays and veneers
even in the most difficult cases.

*“Dr. Ruiz breaks down a complicated subject into real world dentistry,
not pie-in-the-sky stuff. He presents things in a clear and concise manner.*

*I would recommend this course to anyone who wants to learn
the skills necessary to do predictable Supra-gingival dentistry.”*

Dr. Charles Scholler, Somis, CA

Easy, Predictable Porcelain Onlays, Full Crowns, etc. Using Supra-gingival Dentistry Principles

Two Day Course • 14 CE Hours

"Since taking the Supra-gingival workshop, fixed prosthetics has truly become simplified and much more predictable than ever before... Preps, impressions and cementation are easier, cleaner and more predictable. If you are looking for a course that truly improves the way you do dentistry with the utmost efficiency. I cannot recommend any other course over Supra-gingival dentistry."

Dr. Ali Sheikholislam, Sacramento, CA

"Not only did the course meet my expectations, it was fun! I will not hesitate in taking another one of his seminars."

Claudia Navarro, DDS, Inglewood, CA

In this practical workshop, Dr. Ruiz will first demonstrate on a live patient, a new paradigm in preparation and cementation for porcelain onlays. Dr. Ruiz will show step-by-step how using Supra-gingival dentistry techniques and understanding the specific characteristics of these new materials, dentistry can become easier and more predictable than ever. He will show step-by-step, the techniques and principles for tooth preparation, temporization and sensitive-free easily bonded cementation.

During the workshop, participants will perform many tooth preparations specific to Supra-gingival dentistry for non-metal onlays and full crowns in very realistic simulators. Using the techniques and information learned participants will also bond porcelain onlays using the techniques learned.

Learning objectives for this live patient workshop:

- Understand the benefits of Supra-gingival dentistry by observing a live procedure and performing, onlay and crown preparations on a very realistic simulator.
- Understand and perform simple, predictable impression techniques.
- Learn how to choose the correct type of restorative material and translucency that will allow for Supra-gingival dentistry.
- Participants choose which bonding systems and cements are most esthetically appropriate to achieve good margin blending and allow for supra gingival dentistry.
- Understand and perform sensitive-free and easy cementation techniques specific to posterior onlays.
- Participants will learn and perform, margin elevation, and enamel preservation techniques.
- And much, much more...

Schedule

March 14 - 15
September 12 - 13

Los Angeles, CA
Los Angeles, CA

\$2,599 or \$2,399 for early registration
(30 days prior to event - Payment options available)

Predictable Success with Porcelain Veneers, PJs & All Ceramic Crowns Using Supra-gingival Dentistry Principles

Three Day Course • Live Patient Demonstration & Workshop • 21 CE Hours

"For the first time I feel confident about a veneer class. This hands-on course is a great workshop for anyone wanting to learn how to do veneers in their practice. Dr. Ruiz is exceptional, a phenomenal instructor/clinician, who explains everything very clearly."

-Maya Zuniga DDS, Laredo, TX

Easy, Predictable Porcelain Veneers, PJs & All Ceramic Crowns

Workshop Objectives:

- Understand how to record patients' unique esthetic perspective and goals and how to blend it with our own and perform a smile design.
- Prepare and cement several veneers using learned techniques.
- Understand how proper diagnosis and smile design dictates proper tooth preparation and restorative material selection.
- Learn and perform easy and predictable techniques for temporization.
- Adjust the occlusion after porcelain veneers or JVCs and their relationship with longevity.
- What restorative materials and porcelains to use for long term stability?
- What bonding systems and techniques will yield better longevity and low sensitivity?
- Step by step techniques and much, much more...

Schedule

April 24 - 26

September 25 - 27

Los Angeles, CA

Team and Practice Building

Assistant Boot Camp

Two Day Workshop for Assistants and Dentists • 14 CE Hours

Faculty: Dr. Patricia Ryan-Martin

Experience shows that a motivated and qualified dental assistant is very valuable to any dental practice and can increase productivity and the enjoyment of dentistry. In this highly practical workshop, your assistant will be educated and motivated.

At the end of this workshop your assistant will:

- Learn how to make beautiful provisionals for veneers and onlays.
- Learn principles of communication and education to improve treatment acceptance.
- Learn specific techniques to assist for adhesive dentistry procedures.
- Learn specific techniques to assist for occlusal therapy and how to take occlusal records.
- And much more...

Schedule

February 14-15 Los Angeles, CA

\$699 or \$599 for early registration

(30 days prior to event)

Evidence Based Minimally Invasive Implant Dentistry

Three Day Workshop • 21 CE Hours

“Dr. Ruiz backs up everything with research and extensive experience. You have NO DOUBT that when he explains something; it is of the highest standard.”

Victor Khatchaturian, DDS, Los Angeles, CA

Learning Objectives:

- 2010 provisions of the Academy of Osseointegration.
- How to choose between regular, narrow and mini-implants.
- Perform four simulated, yet realistic implant placements using correct surgical protocol.
- Perform four simplest and predictable restorative procedures!
- What x-rays and records are really necessary.
- When and how to use surgical templates.
- Simple surgical procedures to ensure safe and predictable results.
- When it's better to refer.
- Detailed equipment and supplies list will be provided for immediate implementation.
- Assistants are encouraged to attend to help implement systems.
- A system to keep implant parts costs down! Charge less to patients and have higher profits.

Schedule

May 29 - 31
October 23 - 25

Los Angeles, CA
Los Angeles, CA

\$3,490 or \$3,290 for early registration
(30 days prior to event - Payment options available)

COURSE TOPICS

Comprehensive & Endo Restorative Continuum (Lecture): *Today's dentists truly have a transformative arsenal of treatments and materials that can enable them to predictably save more teeth and provide their patients comprehensive restorative care that has endodontic therapy as its centerpiece. Dr. Salehrabi's decades as both a general dentist and endodontist give him the unique perspective to teach this course and he will show many cases in an interactive format that will cover:* The absolute necessities of successful endodontic outcomes ♦ Protocols for accurate diagnosis, communication between GPs and endodontists and evidence-based case selection ♦ Preventing procedural errors ♦ File selection and treatment possibilities with new file options ♦ The new paradigm of "restorative endodontics," including cutting edge pulp therapies, core composite build-ups, bonding techniques and how new materials are revolutionizing endodontics and tooth restoration

OSHA, Infection Control and the CA Dental Practice Act (Lecture): This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, the California Dental Practice Act and Infection Control.

Restorative Success with Esthetic Composites and World Class Crown & Bridge (Lecture): *Improve your direct and indirect restorations with these gems, including:* Step-by-step techniques to create lifelike and morphologically precise direct composite restorations ♦ The use of composite tints to create characterized restorations that rival those produced in the laboratory ♦ A review of indirect restorative materials and options in dental ceramics ♦ A review of prep design and tissue management for perfect impressions ♦ Provisionalization for full coverage and veneers ♦ No prep veneers: A realistic option? ♦ Prosthetic tooth repositioning and "orthodontic" tooth preparation ♦ Minor tooth movement with Essix appliances ♦ Computerized shade matching ♦ Digital impression making ♦ Cementation protocols for provisional cementation ♦ Cementation protocols for total etch and conventional cements: Which materials for which cement ♦ Occlusal adjustment during the cementation process

Worn Dentition—Demystifying Full-Mouth Rehabilitation (Lecture): *This course is designed for the progressive restorative dentist who wants to feel more confident in providing full-mouth rehabilitation. Well-documented cases will be covered from the initial workup to the post treatment follow-up, detailing all TMJ treatment, Perio, Surgery, Occlusal Management, Aesthetic considerations, and future risk mitigation. The participant will leave with a thorough understanding of the necessary steps to take a nervous patient with multiple dental issues and bring them to a state of dental health and self-esteem. Objectives include:* The proper examination, treatment planning and case protocols for full-mouth rehabilitation ♦ How to break difficult cases down to the 5 basic elements of dental health ♦ The tools (education and equipment) necessary to finish these cases predictably.

Restoring Your Confidence in Pediatric Care (Lecture): *An extensive review of all procedures in pediatric restorative dentistry, including:* Diagnosis (Clinical and Radiographic), treatment planning (including cases that participants diagnose and treatment plan from bitewing x-rays), primary anterior and permanent posterior restorations, primary pulp therapy, stainless steel crowns, anterior strip crowns and preventive restorations with air abrasion technology. Become familiar with all forms of space maintainers and many simple active appliances.

TUITION	5 COURSES	EACH INDIVIDUAL COURSE
More than 14 days before an event	Dentist: \$449 , Staff: \$249	Dentist: \$139, Staff: \$119

david HORN BROOK

For the past decade, the search for invisible, beautiful dentistry has been the goal of both the clinician and the manufacturers. Coupled with the public's quest for ideal aesthetics and a youthful, white smile, as the journey continues, it has also become more difficult. More difficult because our patients are more demanding for perfection today than ever before and more confusing because of the vast array of new materials and options available to provide this care.

Dr. David Hornbrook

For A 2-day "Over-the-Shoulder" Live Patient Demonstration Program

Participants will observe as Dr. Hornbrook:

Designs • Prepares • Provisionalizes • "Bonds" a Veneer Smile Design Case

March 28th-29th or September 27th-28th

8 am - 4:30 pm • Burbank, CA • 16 CE • Tuition \$ 1495

(Includes Breakfast Lunch and Cocktail Hour)

You will learn:

- Understanding the importance of occlusion when designing the smile
- Systematic advanced smile design, including utilizing a soft-tissue laser to alter gingival contours
- Step-by-step veneer and anterior crown preparation including when and how to utilize the "prepless and minimal prep" veneer
- Step-by-step, predictable Veneer provisionalization using the
- Shrink-to-Fit" technique
- Aesthetic material update and review including dentinal adhesion, cementation options, & ceramic systems ideal to maximize aesthetics

Occlusion Unplugged 2 Day Hands-On / Over The Shoulder

Dr. David Hornbrook & Dr. Mark Montgomery

July 18-19, 2014 or February 20-21, 2015

8 am - 4:30 pm • Burbank, CA • 16 CE • Tuition \$ 1695

(Includes Breakfast Lunch and Cocktail Hour)

You will learn:

- How to take the correct bite
- Equilibration: "how and when"

Dr. Mark Montgomery • Determine the cause of wear and attrition
• The importance of Lab Communication

- How to implement these principles into your practice NOW.
- Use of advanced technologies to enhance long term success
- Dental Materials Review, incl. ceramics, adhesion and bonding
- Understand the science behind tooth contacts and muscle harmony
- How to make a face bow registration for stable function and predictable results
- Learn what is normal, stable and beautiful: parameters of diagnosis and design. Tooth Anatomy, Smile Design, Skeletal Condition, Vertical Dimension, Functional Physiology.
- How to perform a complete examination and diagnosis in a hands-on clinical exercise utilizing several diagnostic recording and evaluation tools.

Hands-On Workshops Include:

- Face Bow Records for mounting a case • Reviewing cases: photos & models of each participant.
- Taking bite records after orthotic wear at the correct vertical dimension

Dr. Edward McLaren

1 Day Photoshop & Tx Planning - Bring Case Friday, October 17th, 2014

• 9am - 5pm • 7 CE Credits • Hands-On • Tuition: \$ 725

Accelerate Your Practice • Sandy Pardue

Friday, June 27th

9am - 5pm • 7 CE • Tuition \$399

Sandy Pardue

Learning Outcomes:

- Understand objections & have the tools to help overcome them
- Have more control over practice production and collections
- Recognize missed opportunities within their own four walls

This course will teach:

- Reactivation Project- get the "gold" out of your files
- Tools to increase new patients without additional marketing
- Unique financial options that will increase case acceptance

This lecture is recommended for doctor and all members of the team

Enhancing Your Restorative Results With Crown Lengthening Surgery

Dr. James Kohner

Friday, March 21, 2014

• 9am - 5pm • \$649 • 7 CE Credits • Hands-On •

- Planning esthetic restorations in the anterior when facing uneven tissue, or a "Gummy Smile? - Evidence Based solutions
- Confirm that you are current in your treatment planning choices.
- In-depth concepts & practical applications for Clinical Crown Lengthening
- learn how to enhance predictability for your restorations and impressions.
- Practice these procedures on pig jaws & anatomical models.
- Techniques are discussed for both Functional & Esthetic Crown Lengthening.

Dr. John Sorensen

Date TBA

All On 4 Continuum By: Dr. John Sorensen

Date & Tuition TBA • Estimate 28 CE Credits

Day 1 Lecture & Clinical - patient workup for impressions, treatment planning, prosthesis design. Hands-on exercise of conversion of the prosthesis.

Day 2 Lecture - Clinical- surgery with extractions, implant placement, prosthodontic conversion of prosthesis, laboratory processing, delivery of temporary screw-retained prosthesis.

Day 3 Lecture & Clinical- impressions of implants, jaw relations, prosthesis design,

Day 4 Lecture - delivery, prosthesis design, maintenance and trouble shooting.

2014 Hot Topics In Esthetics Update

David Hornbrook Sharing The Latest Concepts

Friday, May 30, 2014

• 9:00am - 5:00pm • 7 CE Credits • Tuition: \$249

For the past decade, the search for invisible, beautiful dentistry has been the goal of both the clinician and the manufacturers. Coupled with the public's quest for ideal aesthetics and a youthful, white smile, as the journey continues, it has also become more difficult. More difficult because our patients are more demanding for perfection today than ever before and more confusing because of the vast array of new materials and options available to provide this care.

The astute clinician, if he or she desires not only to provide beautiful aesthetics, but also for these aesthetics to continue to function long term, must be willing to take the steps necessary to truly understand the advantages, disadvantages, indications, and contraindications of these new materials. Without this knowledge, the quality of care delivered will be compromised.

Join Dr. David Hornbrook as he explores our options for aesthetic, metal-free dentistry for our patients in applications including smile design, posterior restorative, bridge applications, and full mouth rehabilitation. Discussion will include updates of dentin adhesion, ideal cementation of the new materials using the new resin cements, and addressing the role function plays in our decision making. This truly is the "Platinum Age" of dentistry and the potential for what we can offer to our patients, both aesthetically and functionally, is more exciting and rewarding than ever before.

- Objectives and subjects covered will include:
- Understanding the advantages of the new ceramics ideal for smile designs
- The use of lasers to enhance the Aesthetic result, including "Closed-Flap" osseous crown lengthening
- Deciphering what, when, and how the "Prepress" veneer case can be successful
- Learning how to predictably choose the correct cements for different materials that enhance aesthetics and long term success
- Understanding how we can truly be metal-free, even with posterior bridges
- Eliminating the need for traditional core build-ups in the posterior when using "bonded"
- And much, much more

Our outstanding post-course support will ensure successful procedure integration into your practice and is only available through the AAFE.

Botulinum Toxin (Botox®) Training for Every Practice

THE BEST COMPREHENSIVE LIVE PATIENT TRAINING AVAILABLE

The use of Botox in dentistry has been around for over 20 years in the treatment of TMD and myofascial pain and is well known for its esthetic uses in the oral and maxillofacial areas. Nearly everyone knows the benefits of Botox – it is about time your office offers these highly desired patient services – your office team will want them too!

DERMAL FILLER TRAINING FOR EVERY PRACTICE

THE BEST COMPREHENSIVE LIVE PATIENT TRAINING AVAILABLE

Dermal fillers are used to correct soft tissue volume deficiencies in the oral and peri-oral areas and are now considered essential to every anterior dentistry case. The course objective is to enable dental professionals to offer practical concepts, techniques and new dental services, and be proficient with the materials, techniques, and instrumentation of dermal filler treatment.

NEW! Frontline Dental Sleep Medicine, Bruxism Therapy and Medical Insurance for Every Practice

THE BEST COMPREHENSIVE LIVE PATIENT TRAINING AVAILABLE

In this hands-on course, you will learn the bottom line about frontline dental sleep medicine, obstructive sleep apnea and bruxism treatment and the successful billing of medical insurance in the dental office. These topics are among the most confusing areas in dentistry. This course will explain how to successfully incorporate these areas into your office in a step by step easy to understand way as only the American Academy of Facial Esthetics (AAFE) and Dr. Louis Malcmacher can teach.
