## COURSE TOPICS

**Hands-on Removable Prosthodontics:** Like most dentists, you are probably doing less denture cases than you should be, because your confidence level is not high enough! Dr. Shuman will teach "how to simplify the process of denture fabrication". Topics to be covered include: Case planning and selection ♦ Case preparation ♦ Instrumentation ♦ Relining ♦ Immediate denture duplication ♦ Custom Tray fabrication ♦ Impressions and tissue control ♦ Record base fabrication ♦ The use of baseplate wax ♦ Establishing vertical dimension ♦ Tooth selection ♦ Materials and much more!

**Comprehensive & Endo Restorative Continuum (Lecture):** Today's dentists truly have a transformative arsenal of treatments and materials that can enable them to predictably save more teeth and provide their patients comprehensive restorative care that has endodontic therapy as its centerpiece. Dr. Salehrabi's decades as both a general dentist and endodontist give him the unique perspective to teach this course and he will show many cases in an interactive format that will cover: The absolute necessities of successful endodontic outcomes ♦ Protocols for accurate diagnosis, communication between GPs and endodontists and evidence-based case selection ♦ Preventing procedural errors ♦ File selection and treatment possibilities with new file options ♦ The new paradigm of "restorative endodontics," including cutting edge pulp therapies, core composite build-ups, bonding techniques and how new materials are revolutionizing endodontics and tooth restoration

**OSHA, Infection Control and the CA Dental Practice Act (Lecture):** This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, the California Dental Practice Act and Infection Control.

**Restorative Success with Esthetic Composites and World Class Crown & Bridge (Lecture):** Improve your direct and indirect restorations with these gems, including: Step-by-step techniques to create lifelike and morphologically precise direct composite restorations ♦ The use of composite tints to create characterized restorations that rival those produced in the laboratory ♦ A review of indirect restorative materials and options in dental ceramics ♦ A review of prep design and tissue management for perfect impressions ♦ Provisionalization for full coverage and veneers ♦ No prep veneers: A realistic option? ♦ Prosthetic tooth repositioning and "orthodontic" tooth preparation ♦ Minor tooth movement with Essix appliances ♦ Computerized shade matching ♦ Digital impression making ♦ Cementation protocols for provisional cementation ♦ Cementation protocols for total etch and conventional cements: Which materials for which cement ♦ Occlusal adjustment during the cementation process

**Worn Dentition—Demystifying Full-Mouth Rehabilitation (Lecture):** This course is designed for the progressive restorative dentist who wants to feel more confident in providing full-mouth rehabilitation. Well-documented cases will be covered from the initial workup to the post treatment follow-up, detailing all TMJ treatment, Perio, Surgery, Occlusal Management, Aesthetic considerations, and future risk mitigation. The participant will leave with a thorough understanding of the necessary steps to take a nervous patient with multiple dental issues and bring them to a state of dental health and self-esteem. Objectives include: The proper examination, treatment planning and case protocols for full-mouth rehabilitation ♦ How to break difficult cases down to the 5 basic elements of dental health ♦ The tools (education and equipment) necessary to finish these cases predictably.

**Restoring Your Confidence in Pediatric Care (Lecture):** An extensive review of all procedures in pediatric restorative dentistry, including: Diagnosis (Clinical and Radiographic), treatment planning (including cases that participants diagnose and treatment plan from bitewing x-rays), primary anterior and permanent posterior restorations, primary pulp therapy, stainless steel crowns, anterior strip crowns and preventive restorations with air abrasion technology. Become familiar with all forms of space maintainers and many simple active appliances.

## REGISTRATION
