

The logo features the text "XCEL SEMINARS" in a bold, black, sans-serif font, centered within a yellow oval. This oval is framed by a thick, yellow rope with a black outline, which is coiled into a rectangular shape with rounded corners. The rope has frayed ends at the top. The entire design is set against a solid brown background.

TULSA DENTAL
SPECIALTIES

COURSE TOPICS

Hands-on Removable Prosthodontics (an additional fee is required for this course): *Like most dentists, you are probably doing less denture cases than you should be, because your confidence level is not high enough! Dr. Shuman will teach "how to simplify the process of denture fabrication". Topics to be covered include:* Case planning and selection ♦ Case preparation ♦ Instrumentation ♦ Relining ♦ Immediate denture duplication ♦ Custom Tray fabrication ♦ Impressions and tissue control ♦ Record base fabrication ♦ The use of baseplate wax ♦ Establishing vertical dimension ♦ Tooth selection ♦ Materials and much more!

Current Scientific Evidence in Endo: *This course is designed for the dental clinician who desires to stay at the forefront of the latest scientific advancements, endodontic techniques and schools of thought. Discussion will include:* NiTi metallurgy and irrigation technologies that are cutting edge and changing endodontics ♦ The Science & Physics of Instrumentation: Advances in metallurgy and file engineering that address cyclic fatigue and file separation. ♦ Efficiency with Fewer Files: Design enhancements that deliver consistent canal shapes in less time and with fewer instruments ♦ Energized Irrigation Protocols: New technologies and techniques for removing bacteria and the smear layer ♦ Obturation: State of the art, centrally condensed gutta-percha technologies vs. single-cone techniques.

Introduction to Dental Sleep Medicine: *This course is intended to provide a comprehensive overview of diagnosis and treatment of sleep apnea cases for dentists interested in adding this growth area to their practices. Dr. Veis will cover all aspects diagnosis and the sleep study, deciding which appliances to use for treatment, measuring and fitting the appliances, interacting with the fabricating lab, and how to manage the billings to medical insurance, including:* Introduction to sleep stages, disorders and why there is a need for treatment? ♦ Sleep apnea signs/symptoms/clinical issues and treating sleep apnea via dental appliances ♦ Protocol review ♦ Services to do and read sleep tests ♦ Overview of Appliances - pro's and con's of all of the major sleep appliances ♦ Model analysis, Mixed dentition and how to take construction bites for making certain appliances ♦ Group work on an actual case and diagnosing appliance ♦ Services to fully take care of the medical billing for these services

We Are Esthetic Professionals. Are you?

Advanced Fixed Prosthodontics Residency

Starts September 26th, 2014

140 CE - \$7,660

If you are intimidated or unsure of how to work up and treat complex reconstruction cases, this is the residency for you!

Clinically Treat A Complex Reconstruction As Part Of The Residency and Gain The Confidence To Be Successful. The primary goal of this residency program is to show every dentist how to be successful in diagnosing, staging, and completing the comprehensive restorative cases that every practice contains.

Course Highlights

Pre-Restorative Procedures

- Demystifying and applying occlusal philosophies
- Simplifying articulators and how to use them
- Digital pantographic tracing in 15 minutes
- Diagnosis: The "key" to success
- Treatment planning vs. plan of treatment
- Pre-treatment occlusal therapy using fixed and removable applications
- Sequencing cases so anyone can be successful

Treatment Procedures

- Mastering tissue control and simplifying impression making
- Radiosurgery and laser hands-on workshop
- Provisional restorations to be proud of: the foundation for success
- Tooth preparation, esthetic vs. metallic posts
- Minimizing post delivery adjustments
- Digital occlusal adjustment

Supportive Topics

- Mastering esthetic results using optimal techniques, materials & communication
- Contemporary adhesive vs. traditional cemented ceramic restorations
- Laboratory steps for optimal success with no remakes
- Using attachments to create contingencies and segmenting options
- Extensive case analysis

Would you like to see fewer patients and make more money?

Do you know how to segment a case to do it in stages for financial reasons?

Do you know how to work with a lab to minimize problems and chair time?

Do you know how to develop an optimal occlusion?

Can you treat cases like this, make a profit, and stay out of trouble?

The primary goal of this residency program is to show every dentist how to be successful in diagnosing, staging, and completing the comprehensive restorative cases that every practice contains.

This Is An Opportunity You Won't Want To Miss!

"I guarantee we will expand your treatment comfort zone"

Bruce J. Crispin DDS, MS (Program Director)

Esthetic Professionals Faculty:

Dr. Bruce Crispin

Dr. Kristi Crispin

Dr. Bernie Villadiego

Dr. Todd Snyder

Dr. Ziv Simon

Dr. Tony Daher

Dr. Phil Melnick

Dr. Paul Meserkhani

Dr. Joseph Kan

Dr. James Peyton

Dr. Edmond Hewlett

Dr. Bruce Baird

"My practice has been so much more enjoyable because I have incorporated the techniques I learned at Esthetic Professionals. After I came to Esthetic Professionals and I got hands on training on the right way to prepare teeth and why things fail and how I could improve."

- Marilyn R. Calvo, DDS

"I'm able to offer patients, with confidence, larger and more complex treatment plans that we can complete. Patients understand the confidence that I can present to them and they are accepting the treatment plans. It allows me to do larger and more interesting cases that are also more profitable."

-Mark D. Cave, DDS
