Top 10 Benefits of the Pinhole procedure for patients:

1. Can correct gum recession in as little as 1 treatment session. Long term results are documented in the International Journal of Periodontology & Restorative Dentistry. (October 2012)
2. Minimal discomfort and swelling in most cases because the method is scalpel-free, suture free and graft free.
3. Typically, only 1-2 pinholes are made in the gums per quadrant of treatment.
4. The pinholes heal in 24 hours in most cases.
5. Only 2 over-the-counter pain pills required after treatment on average per the study in the International Journal of Periodontology & Restorative Dentistry. (October 2012)
6. Can prevent tooth loss and the need for other costly procedures such as implants or dentures.
7. Treatment sessions can be completed in as little as 1-2 hours in many cases.
8. Can enhance a more youthful and attractive appearance.
9. It is not unusual for patients to describe feeling happier due to being able to smile proudly without the shame or guilt associated with an ugly smile.
10. Most patients are back to work and normal light activities within 24-48 hours.

(1) Sharon: Before PST, on full upper arch (December 2009, removed 7mm restoration on tooth #6).

(2) **After** completion of PST on full upper arch. (This photo 5+ years later May 2014).

**(Scalpel-free, Suture-free, Graft-free)*

Visit PinholeAcademy.com to view the 33 month study on The Pinhole® Surgical Technique as published in the International Journal of Periodontics & Restorative Dentistry*.

***Conclusion on page 530:** "PST may be deemed a **predictable, effective, minimally invasive,** and **time and cost effective** alternative to FCTG techniques for obtaining optimal patient based outcomes".

Professor at The Ohio State University and in private practice.*

COURSE SERIES
SPONSORED BY:

COURSE TOPICS

Minor Ortho and Appliance Therapy: *Dr. Veis will teach how to add interceptive orthodontics for children and appliance therapy minor tooth movement to your cosmetic cases, including:* Helping children with simple space maintenance, anterior crossbites, posterior crossbites and eliminating bad habits from causing malocclusion ♦ Recognize the stages of dental disease ♦ Techniques to fix anterior crowding ♦ Minor tooth movement and veneers ♦ An easy 6 month braces technique ♦ Keeping patients by making final retainers ♦ New proven to control periodontal disease

OSHA, Infection Control and CA DPA: *This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, the California Dental Practice Act and Infection Control.*

Geriatric Care: *The biggest boom in dentistry will be the ever growing geriatric population. What is a geriatric patient? Is it age dependent and the answer is not really! Decisions are often very challenging on what is best for the patient. Treatment planning and case presentations and other highlights are:* Prevention is for all ages and doesn't stop here! ♦ Customizing your approaches for plaque, xerostomia and so much more. ♦ Reparative dentistry, when, where and why and what materials are best to utilize ♦ Grafting decisions and why you need to incorporate these into your practice ♦ Direct restorative materials that are must haves for this group ♦ Indirect options that are essential to understand and how embrasures and margins are age dependent

Direct Composite Experience: *In today's competitive market, many patients are seeking to achieve an esthetically pleasing smile, yet may have limited resources. This program will offer conservative solutions based on clinical fundamentals and the latest technologies and materials, to yield simple, reproducible, and efficient techniques for composite restorations, including:* Use of unique matrices to make composites easier and predictable ♦ Low shrink/low strain composites ♦ Tight interproximal contacts every time in posterior composites ♦ Creating full resin veneers as nice as porcelain ♦ Layering vs. bulk fill ♦ Bases and liners: glass ionomers, flowables, or? ♦ Bonding agents: total-etch or self-etch? ♦ Single appointment fiber-reinforced direct composite bridges ♦ Aesthetic dilemmas: what would you do if this were your patient? ♦ Dental trauma – patient assessment, contemporary management of luxation injuries, treating the avulsed tooth, unique restorative options for the sports-related dental injury ♦ Current status of mouth guards – including fabrication techniques for a custom mouthguard and the performance enhancing appliances ♦ Concussions and dentistry

Hands-On Smile Design and Case Prep (This course requires an additional fee): *Behind the artistic elements of smile design are basic objective principles that satisfy the requirements for beautiful smiles. Research has revealed the proportions that are preferred by dentists. Learn how to confidently determine the ideal smile for your patients prior to initiating active treatment and then we will practice Hands-on the techniques necessary for success, including:* Dental Photography is vital for today's practitioner to objectively evaluate, diagnose, and design a smile. In groups, attendees will use the principles taught to photograph and treatment plan cases, using the latest digital cameras hands-on ♦ hands-on crown cementations

Practical Endo: *This seminar will discuss the latest practical information regarding endodontic diagnosis, treatments, new game-changing materials and files and a plethora of new cases that attendees will discuss in an interactive format, including:* What is affecting treatment outcomes? ♦ Rational, evidence-based case selection ♦ Endo-perio interrelationship ♦ Procedural errors and their prevention ♦ Dentine replacement materials and its many applications in complex cases ♦ Restoring endodontically treated teeth with bonded core composites ♦ Diagnosis of cracked teeth & treatment options ♦ Endodontic retreatment vs. implants—when, where & how to decide

"The best thing I've ever done in my career!" - Dr. J Westmoreland

President's Message

I am happy to share the results of a survey of some of the over 9000 AAFE members:

AAFE members who have introduced Botox, dermal fillers, TMJ orofacial pain trigger points, bruxism monitoring, AAFE dental sleep medicine have seen an average increase of \$26,500 of production per month.

And their patients get better therapeutic and esthetic treatment than ever before.

What would you do with an extra \$26,500 a month? This is based on new clinical skills that you will have for the rest of your career. This is pure extra production with no extra overhead or lease payment.

Isn't it about time to invest in yourself and have the practice you always wanted?
To your future success,

To bring Dr. Malcmacher or any AAFE faculty to your dental/medical meeting, please contact info@facialesthetics.org.

See full faculty list at facialesthetics.org

ADA CERP® Continuing Education
Recognition Program

The American Academy of Facial Esthetics is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

The American Academy of Facial Esthetics is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing education programs of this program provider are accepted by AGD for Fellowship, Mastership and membership maintenance credit. Approval does not imply acceptance by a 4/1/2014 to 3/31/2016. Provider ID# 321332

JOIN THE GROWING AAFE FAMILY TODAY!

THE AAFE IS THE LEADER IN NEXT GENERATION EDUCATION

ADVANTAGES TO AAFE ON-DEMAND / LIVE COURSES

- Learn at your own pace in the comfort of your office or home
- Complete your training at live patient sessions around the country
- Your entire team can now easily be trained with no out of office downtime
- Save thousands of dollars on travel and lost production time
- Exquisite education with HD quality video demonstrations

Full on-demand course library includes 100% case acceptance strategies, treating gummy smiles, making the right technology choices, how to use a bruxism monitor, and an entire array of facial pain and facial esthetic procedures.

AAFE courses provide training equal to and often exceeding the education taught in academic communities around the world over the last 5 decades.

AAFE Level 1 Course, Atlanta, GA

Botulinum Toxin (Botox® / Xeomin®) Training for Every Practice

THE #1 BOTOX® LIVE PATIENT TRAINING COURSE!

The use of Botox in dentistry has been around for over 20 years in the treatment of TMD and myofascial pain and is well known for its esthetic uses in the oral and maxillofacial areas. Nearly everyone knows the benefits of Botox – it is about time your office offers these highly desired patient services – your office team will want them too!

OPTIONAL LIVE DAY UPCOMING COURSE DATES

May 8 / Cleveland

May 29 / Boston

COURSE HIGHLIGHTS

- ≡ The complete dependence between OSA/bruxism/orofacial pain that you must know before you make any oral or bruxism appliance for a patient
- ≡ Only the AAFE teaches you how to treat dental sleep medicine with either no or a minimal capital investment - don't spend tens of thousands of dollars on unnecessary equipment.
- ≡ Learn how to analyze sleep studies that will also test for bruxism and clenching
- ≡ The AAFE protocols for choosing the right oral appliances for each patient whether it is for clenching, bruxism, occlusal disease, restorative dentistry, or sleep apnea
- ≡ Fee structures and practice management integration so you can get started providing these services immediately

**ATTENDEES AVERAGE A 92% INCREASE IN BRUXISM, SNORING,
AND SLEEP APPLIANCE PRODUCTION.**

Medicare & Medical Insurance Billing for Every Dental Practice

AVAILABLE ON-DEMAND

By June 1st, 2015, dentists are required to opt-in or opt out of Medicare. The wrong decision will cost you thousands of dollars, many patients, and countless headaches. This course will help you make the right decision for your practice and tell you what you need to know about medical insurance reimbursement.

- ≡ AAFE exclusives in understanding Medicare and medical insurance for dentistry – you won't learn this anywhere else:
- ≡ Accepting Medicare/medical insurance is the #1 no cost way to getting many new patients and not lose the patients you have
- ≡ The best strategy for becoming credentialed by medical insurance
- ≡ Learn the process to becoming a Medicare/medical insurance provider in your area
- ≡ Learn the language of medical insurance and Medicare
- ≡ Understanding the credentialing process for Medicare and medical insurance – this is the important first step for your dental office
- ≡ Should you be a participating or non-participating Medicare/medical insurance provider?

AAFE has partnered with STATDDS to provide the best Medicare enrollment services for your practice. Visit STATDDS.COM for more information.
