1-YEAR FELLOWSHIP PROGRAM IN IMPLANT DENTISTRY

California Implant Institute offers 1 - year comprehensive fellowship program in implant dentistry. This program is made of 4 sessions (Five days each) designed to provide dentists with practical information that is immediately useful to them, their staff and their patients. The four sessions combined, offer over 160 hours of lectures, laboratory sessions and LIVE surgical demonstrations. Whether you're just starting out, or looking to enhance your existing surgical and prosthetic implant skills, our fellowship program is exactly what you're looking for.

Sessions:

Session I April 21-25, 2010
Session II May 19-23, 2010

Session III June 23-27, 2010
Session IV September 22-26, 2010

James Rutkowski
DMD, PhD, DABOI

Suheil Boutros
DDS, Periodontist

Freida Brookshire
DDS, Prosthodontist

Christopher Church
MD, ENT

Sally McKenzie
Practice Management

12 month 0 down no interest financing available

Your course is very good due to your focus on specific techniques and procedures from the start. Again, thanks a lot for everything, your course has seriously changed my life. I am now excited about dentistry again.
Robert Taylor, Seattle, WA

I think it is the excellent organization and sequential presentation of Dr. Louie Al-Faraje's implant training courses that enabled me to safely start and build my implant practice. I feel that had I not gone to Dr. Louie Al-Faraje's sequence of dental implant training courses first, that I still would not have placed my first implant.
Linda Boehm DMD, Oneida, NY

I would like to simply say: "Well thought, well organized, well managed, well presented, well taught, and finally well done Louie" for your superb performance. The whole curriculum using high-tech equipments and materials including: given binders and handouts, related articles, live surgeries, hands-on section of the course, and visual supplements were flawless. You went above and beyond to make sure that everyone learns and take home something and start applying it, by encouraging them continuously
Malekshah Oskoui, DMD, MScD
Endodontist and Implant Surgeon, Los Angeles, CA

DR KURTZMAN

Dr. Kurtzman is in private general practice in Silver Spring, Maryland and is a former Assistant Clinical Professor at the University of Maryland, Department of Endodontics, Prosthetics and Operative Dentistry. He has lectured both nationally and internationally on the topics of Restorative dentistry, Endodontics and Implant surgery and prosthetics, removable and fixed prosthetics, Periodontics and has over 150 published articles. He is privileged to be on the editorial board of numerous dental publications, a consultant for multiple dental companies, a former Assistant Program Director for a University based implant maxi-course he has earned fellowship in the AGD, International Congress of Oral Implantology, Pierre Fauchard Academy, American College of Dentists, Mastership in the AGD and Prosthetic Section of the ICOI and Diplomat status in the ICOI. For further information on Dr. Kurtzman or a listing of his published articles visit www.maryland-implants.com.

Lecture highlights:

- 1. *Treatment planning to achieve esthetics***
How to plan esthetic cases to satisfy both the practitioner and patients expectations, from treatment planning through waxups, to stents and onto the clinical restorations.
- 2. *Soft Tissue Management for restorative treatment***
Management of soft tissue to improve the esthetic aspects of restorative dentistry. Determining when to lengthen the incisal, or adjust the gingival tissue to achieve the best results.
- 3. *Provisional Restorations: Techniques for easier temporaries***
Easy techniques for provisionalizing indirect restorations and how to use provisionals as a guide for the lab to fabricate the final restorations.
- 4. *Identifying and Correction of Impression Errors***
How to take great impressions and identify issues when problems occur with your impressions.
- 5. *Direct Resin Restorations: Achieving complex results with simple techniques***
Understanding bonding and what the latest materials can do to improve the quality and longevity of your direct restorations while providing better esthetics.
- 6. *Occlusion and protecting your restorative treatment***
How occlusion impacts on the longevity of your treatment and how to fabricate occlusal guards.
