(7CEs)

JULY 31: PERFECTING DIRECT RESTORATIONS WITH CONSERVATIVE DENTISTRY

Lou Graham, DDS: Expert in "conservative dentistry," uses interactive formats and relevant cases to make this a don't miss hands-on course!

Course series sponsored by:

COURSE TOPICS

Intro to Implants and Bone Grafting: Speakers will discuss introductory implant placement techniques, basic treatment planning considerations, related surgical procedures, and biologic width considerations ♦ Concepts of bone grafting include: development of the recipient site, synthetic vs. other bone grafts and detailed case presentations showing materials and techniques

Restoring Implants: This program will discuss the evolution of restoring implants in a general dentistry practice over the last 20 years, including: Mandibular overdentures on 2 implants and Mandibular/Maxillary bar overdentures ♦ Locator attachments ♦ Fixed/Detachable dentures ♦ Mini Implants ♦ Selecting alloys for implant restorations ♦ “All-on-4” concepts ♦ Pre-treatment considerations for proper treatment outcomes ♦ Treatment planning for crowns and bridges ♦ Cases from single tooth implant restoration to full mouth reconstructions utilizing implants will be shown

Endo Update: This seminar will discuss the latest practical information regarding endodontic diagnosis and treatment including: What is affecting treatment outcomes? ♦ Diagnosis and treatment planning ♦ Rational, evidence-based case selection ♦ Endo-perio interrelationship ♦ Procedural errors and their prevention ♦ MTA and its many applications in complex cases ♦ Restoring endodontically treated teeth with bonded core composites ♦ Diagnosis of cracked teeth & treatment options ♦ Endodontic retreatment vs. implants—when, where & how to decide

What’s Hot in Dentistry: A program about real dentistry for real people by a real dentist! He includes a potpourri of materials and techniques that will make your days easier, more productive and fun ♦ Topics include: desensitization and adhesives, composites for esthetic fillings, sandwich techniques, impression materials, cements, tissue retraction and fluid control, reducing sensitivity, whitening systems that work and assessing clinical situations and their impact on treatment

Adding Ortho to Your Current Practice: Most orthodontics is now done by GPs and this course will explain how you can treat non-complex ortho cases, including: an intro to the straight wire system ♦ The role of functional appliances and Invisalign in patient treatment ♦ A description of a complete system to become fully competent in orthodontics ♦ A hands-on exercise on placing brackets

Hands-On Direct Restorations: (An additional fee is required for this course)
This course will try to bring a full understanding of how and what materials to use, choices for successful restorative care, and provides hands-on practice to improve your direct restorations. The premise of the course is “additive” dentistry, where one preserves tooth structure, versus “subtractive” dentistry where there is often too much tooth structure removed.

REGISTRATION

TUITION	6 COURSE SERIES MEMBERSHIP	EACH INDIVIDUAL COURSE
Registration 14 Days Before Event	Dentist: \$475, Staff: \$235 (Add \$199 for the Hands-on)	Dentist: \$139, Staff: \$119 (Add \$265 for the Hands-on)

Dr. Graham is an internationally recognized lecturer extensively involved in continuing education for dental professionals, focusing on incorporating current clinical advancements through “conservative dentistry.” He emphasizes in his teachings the same concepts he practices: dental health diagnosis, treatment plans for medically compromised patients, conservative treatment, cosmetic dentistry, and customized approaches to periodontal care, implants and laser dentistry.

He is the founder of Dental Team Concepts a continuing education company whose philosophy and programs use contemporary, interactive formats to integrate time-proven conservative dentistry with 21st century materials and techniques.

Dr. Graham is a published author in many leading national and international dental journals. He is a member of the American Dental Association, American Academy of Cosmetic Dentistry, Academy of General Dentistry, Chicago Dental Society and Illinois Dental Association.

Dr. Graham is a graduate of Emory Dental School. He is the former Dental Director of the University of Chicago’s Department of Dentistry. He enjoys providing dental care at his private practice, University Dental Professionals, in Chicago, IL – Hyde Park.

“Advancing your vision in restorative dentistry”

This course challenges the audience to new direct approaches in long term restorative success. We go far beyond bond strengths into many other insightful thoughts on which restorations to choose given clinical situations with step by step clinical casework presented. Everyday dentistry with everyday answers.

Highlights of the course:

- Taking the “sting” out of sensitivity with common sense approaches that avoid the chemistry lessons of bonding
- Do you have to remove all the decay? When do you stop drilling? New thoughts, burs and much more!
- Composites...they aren’t all the same, come learn what goes where and see where the new trends are and why these can really assist you in decision making
- Lights...the hidden truths you need to know
- Direct Pulp Capping, you see “pink”, don’t panic, a clinical approach to save pulps and tooth structure
