Top 10 Benefits of the Pinhole procedure for patients:

1. Can correct gum recession in as little as 1 treatment session. Long term results are documented in the International Journal of Periodontology & Restorative Dentistry. (October 2012)
2. Minimal discomfort and swelling in most cases because the method is scalpel-free, suture free and graft free.
3. Typically, only 1-2 pinholes are made in the gums per quadrant of treatment.
4. The pinholes heal in 24 hours in most cases.
5. Only 2 over-the-counter pain pills required after treatment on average per the study in the International Journal of Periodontology & Restorative Dentistry. (October 2012)
6. Can prevent tooth loss and the need for other costly procedures such as implants or dentures.
7. Treatment sessions can be completed in as little as 1-2 hours in many cases.
8. Can enhance a more youthful and attractive appearance.
9. It is not unusual for patients to describe feeling happier due to being able to smile proudly without the shame or guilt associated with an ugly smile.
10. Most patients are back to work and normal light activities within 24-48 hours.

(1) Sharon: Before PST, on full upper arch (December 2009, removed 7mm restoration on tooth #6).

(2) **After** completion of PST on full upper arch. (This photo 5+ years later May 2014).

****(Scalpel-free, Suture-free, Graft-free)***

Visit PinholeAcademy.com to view the 33 month study on The Pinhole® Surgical Technique as published in the International Journal of Periodontics & Restorative Dentistry*.

***Conclusion on page 530:** "PST may be deemed a **predictable, effective, minimally invasive**, and **time and cost effective** alternative to FCTG techniques for obtaining optimal patient based outcomes".

COURSE TOPICS

Removable Prosthodontics: *This class will teach strategies for denture creation to eliminate the need for multiple repairs, additional adhesive or full denture replacement. Topics include:* Explaining today's untapped denture market ♦ Overview of the State of the Art denture technique ♦ Marketing for high end denture patients ♦ Mastering chair side relines with rebase ♦ Adding implant stability to the State of the Art denture techniques ♦ State of the Art dentistry for the dentate patient ♦ Easily fabricate complex provisionals for implant and crown and bridge patients ♦ Pearls to increase your implant success and profitability ♦ Case identification; Learn to see solutions, not problems

Minor Ortho and Appliance Therapy: *Dr. Veis will teach how to add interceptive orthodontics for children and appliance therapy minor tooth movement to your cosmetic cases, including:* Helping children with simple space maintenance, anterior crossbites, posterior crossbites and eliminating bad habits from causing malocclusion ♦ Recognize the stages of dental disease ♦ Techniques to fix anterior crowding ♦ Minor tooth movement and veneers ♦ An easy 6 month braces technique ♦ Keeping patients by making final retainers ♦ New proven to control periodontal disease OSHA, Infection Control and CA DPA: This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, the California Dental Practice Act and Infection Control.

Geriatric Care: *The biggest boom in dentistry will be the ever growing geriatric population. What is a geriatric patient? Is it age dependent and the answer is not really! Decisions are often very challenging on what is best for the patient. Treatment planning and case presentations and other highlights are:* Prevention is for all ages and doesn't stop here! ♦ Customizing your approaches for plaque, xerostomia and so much more. ♦ Reparative dentistry, when, where and why and what materials are best to utilize ♦ Grafting decisions and why you need to incorporate these into your practice ♦ Direct restorative materials that are must haves for this group ♦ Indirect options that are essential to understand and how embrasures and margins are age dependent

Direct Composite Experience: *In today's competitive market, many patients are seeking to achieve an esthetically pleasing smile, yet may have limited resources. This program will offer conservative solutions based on clinical fundamentals and the latest technologies and materials, to yield simple, reproducible, and efficient techniques for composite restorations, including:* Use of unique matrices to make composites easier and predictable ♦ Low shrink/low strain composites ♦ Tight interproximal contacts every time in posterior composites ♦ Creating full resin veneers as nice as porcelain ♦ Layering vs. bulk fill ♦ Bases and liners: glass ionomers, flowables, or? ♦ Bonding agents: total-etch or self-etch? ♦ Single appointment fiber-reinforced direct composite bridges ♦ Aesthetic dilemmas: what would you do if this were your patient? ♦ Dental trauma – patient assessment, contemporary management of luxation injuries, treating the avulsed tooth, unique restorative options for the sports-related dental injury ♦ Current status of mouth guards – including fabrication techniques for a custom mouthguard and the performance enhancing appliances ♦ Concussions and dentistry

Hands-On Smile Design and Case Prep (This course requires an additional fee): *Behind the artistic elements of smile design are basic objective principles that satisfy the requirements for beautiful smiles. Research has revealed the proportions that are preferred by dentists. Learn how to confidently determine the ideal smile for your patients prior to initiating active treatment and then we will practice Hands-on the techniques necessary for success, including:* Dental Photography is vital for today's practitioner to objectively evaluate, diagnose, and design a smile. In groups, attendees will use the principles taught to photograph and treatment plan cases, using the latest digital cameras hands-on ♦ hands-on crown cementations

Practical Endo: *This seminar will discuss the latest practical information regarding endodontic diagnosis, treatments, new game-changing materials and files and a plethora of new cases that attendees will discuss in an interactive format, including:* What is affecting treatment outcomes? ♦ Rational, evidence-based case selection ♦ Endo-perio interrelationship ♦ Procedural errors and their prevention ♦ Denture replacement materials and its many applications in complex cases ♦ Restoring endodontically treated teeth with bonded core composites ♦ Diagnosis of cracked teeth & treatment options ♦ Endodontic retreatment vs. implants—when, where & how to decide
