Dr Francisco A. Banchs

Francisco A. Banchs graduated from the Central University of Venezuela School of Dentistry in 1997. In 2001 he was the recipient of the Jacob Freedland Scholarship Award. He was awarded a Certificate in Endodontics and a Master's of Science degree in Oral Biology at the University of North Carolina at Chapel Hill School of Dentistry in the summer of 2002. In 2004 he became a Diplomate of the American Board of Endodontics and also completed his D.M.D. Degree at Temple University School of Dentistry. In 2005 he completed his second specialty training and obtained a Certificate in Endodontic Emergency Management at Temple University School of Dentistry. Dr. Banchs has written and collaborated in several papers in the field of dental traumatology and revascularization.

From 2002-2005 he was the Director of the Endodontic Emergency Service and Advanced Emergency Dentistry Course at Temple University School of Dentistry where he was actively involved in teaching at the graduate and undergraduate level. Dr. Banchs currently serves as Board of Trustees for the Hispanic Dental Association and is currently enjoying private practice in Philadelphia, PA and Saratoga Springs, NY.

This seminar will cover

The full-day seminar "Innovative Endodontics" will introduce the participants on how to create proper coronal and radicular access preparations, achieve accurate length control before and during instrumentation by using state of the art electronic foramen locators and to safely and effectively incorporate NiTi Rotary Instrumentation Systems into their endodontic instrumentation protocol. A new system that incorporates fiberpost technology and a new thermoplastic resin bonding material with all the properties of gutta-percha, but with vastly superior sealing abilities as a root canal filling material and with root strengthening properties will also be presented.

At conclusion, participants should be able to understand:

- The dynamics of endodontic pathology.
- How your treatment protocol affects your prognosis.
- The principles and techniques of canal disinfection.
- Indications and contraindications of different filling materials.
- Management of postoperative complication.

A decorative banner with a rope border and a central oval containing the text "PROFESSIONAL PRACTICE SALES". The rope is yellow with a black outline and is arranged in a rectangular shape with rounded corners. The central oval is yellow with a white outline. The text is in a bold, black, sans-serif font.

PROFESSIONAL PRACTICE SALES

“When I sell my practice,

I want.....

- ...to get the most money for my hard work,
- ...to keep the “For Sale” status confidential,
- ...the process to flow smoothly and quickly with my being in control,
- ...and to talk to interested buyers right away.

Professional Practice Sales has spent 40 years in carefully crafting the business of brokering dental practices into a practiced art. We truly understand the issues.

Talk to us.

Learn how Professional Practice Sales can help you meet your goals at this time in your career. We are big enough to provide the services you require, yet small enough to deliver the personal attention you deserve. At Professional Practice Sales we have always operated at a higher standard. Expect it, demand it! Our reputation depends upon it. Do not settle for less.

ADVANCED ENDODONTICS MADE EASY

California Dental Institute Presents: Dr. David C. Brown B.D.S., M.S.

Dr. Brown is Assistant Professor in Endodontics at the University of The Pacific in San Francisco. He is a Diplomat of the American board of Endodontics. He received his BDS from Newcastle Upon Tyne, England and MDS in Operative Dentistry. He completed the specialists program in Endodontics and obtained a Masters in Endodontics from Indiana University, USA. He has lectured widely in the UK and USA.

Topics of discussion:

1. Making the endodontic diagnosis.
2. Taking the stress out of access cavity preparations.
3. Finding that difficult canal.
4. Modern concepts of canal preparation, including crown down concepts and nickel titanium rotary file techniques.
5. Canal obturation - latest methods.
6. Treating the endodontic emergency.
7. Reducing post-operative discomfort.
8. Management and prevention of endodontic failures.

Radiosurgery Made Simple

Going Beyond Electrosurgery
for Tissue Control
and Soft Tissue Management

Monrovia, California

Hands-On / Sunday, October 8th, 2006 - Don't Miss!

John Brescia, D.D.S.

John Brescia, D.D.S. a graduate of the Chicago College of Dental Surgery, Loyola University Medical Center, has practiced family and cosmetic dentistry in the Oak-River Forest suburb of Chicago for the past 25 years. He is a former pre-clinic instructor at Loyola University School of Dentistry, Maywood, Illinois. Dr. Brescia has lectured extensively on radiosurgery. He has also worked on product development and anesthesia technique. He currently serves on the Advisory Committee for the Richmond Institute for Continuing Dental Education.

In an era of great technological growth there can be confusion as to what surgical devices to employ in our dental practices and what techniques to be utilized.

AM Lecture & Discussion:

1. Historical background
2. Technology / Physics
3. Comparison of other techniques and surgical modes (scalpel, Laser, electrosurgery and bipolar)
4. Equipment design
5. Safety

PM Lecture & Hands-On Lab:

1. Incision
2. Incision / Excisional Biopsy
3. Trough for Crown & Bridge
4. Gingivectomy / Plasty
5. Operculectomy
6. Conservative Access Therapy C.A.T.
7. Expose Decay
8. Frenectomy
9. Implant Recovery
10. Cosmetic Smile Line

A decorative banner with a rope border and a central oval containing the text 'PEAKDENT'. The banner is set against a dark brown background. The rope border is yellow with a black outline and is styled to look like a thick, braided rope. The central oval is filled with a solid yellow color and has a white outline. The text 'PEAKDENT' is written in a bold, black, serif font, centered within the oval. The rope border is slightly irregular, with some fraying at the top and bottom edges, giving it a handcrafted appearance.

Speakers

Putting the case together – clinical sequencing

Dr. Snyder received his D.D.S. in 1994 from the University of California at Los Angeles, School of Dentistry. He subsequently completed a general practice residency at the V.A. Medical Center, La Jolla, California. In 1995, Dr. Snyder returned to the UCLA School of Dentistry. As faculty in UCLA's Center for Esthetic Dentistry (CED) he co-developed and was co-director of the first and only two-year postgraduate program in esthetic and contemporary restorative dentistry. He still maintains his faculty status at UCLA in the section of biomaterials. Dr. Snyder is also a faculty member at Esthetic Professionals training facility in Los Angeles.

Dr. Todd Snyder

Selection of indirect restorations that will fit case's desired results.

In today's dentistry choice is in no short supply, but making the right selection from all of the available options can get complicated. Even doing your homework and sorting through the manufacturer's advertorials and solid research, it is still difficult to make the right choice of materials for each patient's unique needs. David French from Burbank Dental laboratory will share what an esthetic / commercial lab has seen after doing thousands of the various brand name restorations over the past 12 years. Learn what the strengths and weaknesses of various materials, and then when & where to use those materials.

David French
Burbank Dental Laboratory

7 Secrets to Case Acceptance

Did you know that each interaction creates a ripple effect in building trust and relationship? Did you know that, KNOWING your patient could be the key to having your patients say YES. Join Suzanne Black, President of The Coaching Center, sponsor of the original Dental Boot Kamp as she takes you through the 7 secrets that every dentist and team member need to know to succeed in building the Trust required for patients to say Yes. Be ready to laugh while you are learning and We promise you will have pearls you can use on Monday morning to create that ripple effect for your practice.

Suzanne Black

Is it safe? Yes it is.
FDA approved

The external backscatter shield and internal radiation shielding are specifically designed to protect the operator from exposure. In fact, the exposure is less than 1% of the allowed occupational doses.

It's so easy to use and it saves time.

Compatible with both film and digital sensors.

Using the NOMAD is quicker and more comfortable for the patient.

NOMAD™
 Portable X-Ray
